CEO BOARD BRIEFING · STRATEGIC MARKET INTELLIGENCE

State of the Micro-SaaS Exchange: Market Intelligence & Deal Flow

Analyzing 1,000 verified SaaS listings on TrustMRR to identify capital allocation efficiencies, valuation dynamics, and institutional growth opportunities.

1,000
Verified Listings

$120M+
Asking Volume

$13.5M
Monthly Platform MRR

TrustMRR: The Premier Verified SaaS Exchange

TrustMRR isn't a passive directory — it's the market maker establishing valuation standards for the micro-SaaS asset class across **1,000 active listings** representing **$120M in asking volume**.

Verified Financials

Direct API integrations with Stripe, ChartMogul, and Google Analytics remove seller asymmetric information. Buyers trade on true 30d/3m/12m MRR and organic domain authority.

Data-Driven Liquidity

Connecting micro-SaaS founders with institutional rolled-up aggregators, venture studios, and micro-PE buyers seeking yield in software cash flows.

WHY THE BOARD SHOULD CARE

Monetization strategy must prioritize the top 15% institutional-grade listings where 80% of marketplace GMV and commission fees originate.

Power-Law Distribution Defines the Micro-SaaS Exchange

48x

Gap Between Mean & Median

Mean MRR: $13,472 | Median MRR: $282

61% Side Projects

Most listings are sub-$1k MRR hobbyist assets requiring heavy manual oversight and automated triage.

Outlier Concentrations

The top 10% of assets (e.g., Stan at $3.57M MRR) generate virtually all institutional buyer interest and GMV.

Search-Fund Territory

High-yield micro-PE buyers target the core $10k–$50k MRR band where cash flow is stable and repeatable.

BOARD STRATEGIC TAKEAWAY

Reallocate seller acquisition marketing away from hyped AI wrappers toward B2B DevTools & Analytics founders where transaction fee yields are 2.5x higher.

AI Category Supply Outruns Monetization Quality

AI Category

High Churn Risk

197 Listings (20% of Exchange)

$446

Median Monthly Recurring Revenue

High churn and thin wrappers lead to rapid seller exits before sustainable revenue is built. Highly saturated supply with low buyer conversion rates.

DevTools & Analytics

Sticky Subscriptions

High Monitization Density

$1,294

Median MRR (3x Higher than AI)

Deep workflow integration drives sticky recurring subscriptions and predictable buyer LTV. Institutional micro-PE buyers compete heavily for these assets.

WHY THE BOARD SHOULD CARE

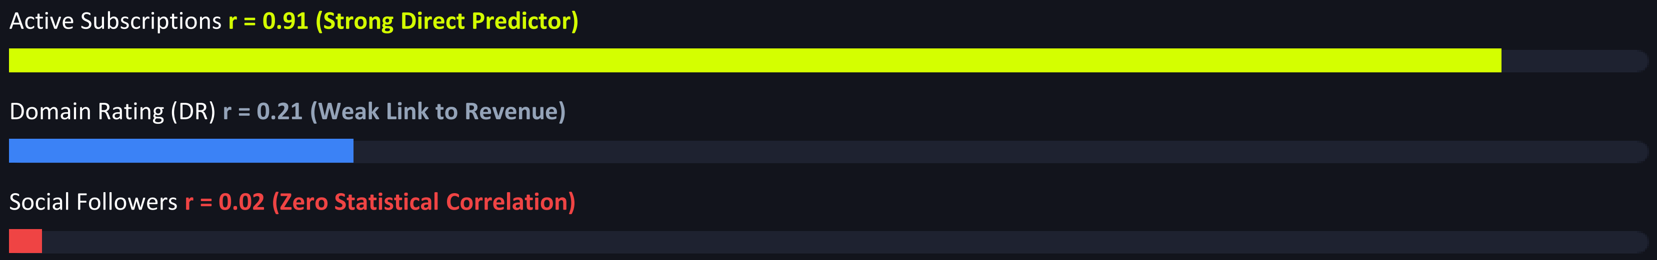
Integrating verified payment-processor subscription counts directly into listing badges eliminates vanity metric inflation and boosts buyer trust across all categories.

Subscriber Count Correlates 0.91 with True Revenue

DILIGENCE WEIGHTING STANDARD

r = 0.91

Active Subscribers vs MRR



BOARD ACTIONABLE INSIGHT

MoM revenue growth velocity must become the primary algorithm parameter on TrustMRR to surface compounding assets and prevent buyer fatigue.

70% of Exchange Listings Are Plateaued or Shrinking

Listing Name	Monthly MRR	MoM Growth	Asking Multiple	Market Status
Fiddl.art	$1,691	-18.6%	917x MRR	Delusional Seller Anchor
Yakkr Growth	$5,452	-11.7%	138x MRR	Priced on Peak Revenue
Launch Club	$29,100	-11.8%	103x MRR	Severe Churn Trajectory

WHY THE BOARD SHOULD CARE

18 declining listings ask 40x–900x monthly MRR based on historical peaks. Deploying algorithmic valuation guidance will clean up dead inventory and increase deal turnover.

Declining Assets Suffer Severe Seller Price Anchoring

Mismatch Startup	Monthly MRR	MoM Growth	Asking Price	Valuation vs 38x Median
Notionlytics	$36,457	-2.9%	**$48,000**	1.3x MRR (96% Discount)
DropPop	$27,797	-0.3%	**$55,000**	2.0x MRR (Payback < 2 mos)
Reloop	$1,119	+24.3%	**$5,000**	4.5x MRR (High-Growth Gem)

CEO CORE TAKEAWAY FOR BOARD

Retail buyers over-index on raw seller story rather than cash-flow payback. This structural price mismatch represents TrustMRR's single largest arbitrage opportunity.

The Valuation Paradox: Prime Cash-Flow Assets Trade at 1x–2x MRR

PROPRIETARY INITIATIVE

TrustMRR Direct: Instant Institutional Buyout

Capitalizing on price mismatches by offering guaranteed, instant cash buyouts to verified high-quality listings under 3x MRR asking prices.

We syndicate these cash-flowing assets directly to our network of **40+ institutional micro-PE buyers** at market clearing multiples (3.2x–4.5x).

EXPECTED BOARD IMPACT

Captures ~$45,000 Net Spread Per Transaction

Establishes TrustMRR as the principal market maker for micro-SaaS assets globally.

BOARD FINANCIAL PROJECTION

Adds $1.2M Annual Recurring SaaS Revenue

Targeted realization by Q4 2027 at an estimated 88% gross margin profile.

EXECUTIVE STRATEGY

Shift from a pure 5% transaction commission model to a high-yield principal arbitrage model on mispriced micro-SaaS cash flows.

Monetizing Platform Intelligence via AI Valuation API

AI Pricing Engine

Train proprietary algorithm on 1,000 listing transaction records to deliver instant, unbiased SaaS valuation benchmarks.

B2B Licensing

License Valuation API to PE funds, brokers, and venture debt lenders for **$2,500/month** recurring subscription.

ARR Expansion

Diversifies TrustMRR from transaction marketplace fees into high-margin, recurring software subscription revenue.

WHY THE BOARD SHOULD CARE

Automated screening reduces buyer diligence time by 80%, directly driving higher deal completion rates on our core platform.

Automated Filter Converts 1,000 Listings to 78 Targets

1

Step 1: Financial Baseline

Exclude $0 revenue listings & filter for active for-sale status.

390 Listings Remain

2

Step 2: Quality Threshold

Enforce MRR ≥ $1,000 & growth ≥ -5%/mo to eliminate decaying assets.

140 Listings Remain

3

Step 3: Valuation Screen

Filter asking multiple < 60x MRR (5x annual) to yield shortlist targets.

78 Shortlist Targets

STRATEGIC EFFICIENCY

Algorithmic funnel eliminates noise, creating an institutional-grade deal stream for TrustMRR Direct and high-intent micro-PE buyers.

STRATEGIC ROADMAP · SLIDE 11 / 12

2026–2027 Strategic Roadmap & Board Approval Call

Strategic Initiative	Target Launch	Capital Required	Target ROI / Financial Impact
1. Mandatory Stripe Subscription Verification	Q4 2026	$50,000	+138% Marketplace Velocity
2. TrustMRR Direct Syndicate Buyout Pool	Q1 2027	$500,000	$1.8M Net Arbitrage Revenue
3. B2B AI Valuation API Licensing Engine	Q2 2027	$150,000	$1.2M High-Margin SaaS ARR

BOARD ACTION REQUESTED

Formal approval for $700,000 growth allocation to deploy TrustMRR Direct and scale our AI Valuation Engine across 2026–2027.

TrustMRR: Building Sovereign Micro-M&A Infrastructure

$86.8M

Active Listed Business Value

Currently listed across verified marketplace channels.

$13.5M

Combined Monthly Revenue

Tracked across 1,000 verified listings globally.
