TRUSTMRR

TrustMRR

From verified revenue to an investment decision

Product overview followed by a practical investor screen and a conditional acquisition recommendation.

MBA CLASSROOM | INVESTOR POV | DATA FROZEN 30 JUL 2026

Verify
Revenue-backed startup profiles

Screen
Filter and compare opportunities

Decide
Shortlist, diligence and offer

KEY TAKEAWAY **TrustMRR is valuable when its data is converted into a disciplined investment workflow.**

What is TrustMRR?

A verified revenue database combined with an acquisition marketplace

VERIFY

Connects to payment providers through read-only access and displays aggregate revenue signals.

DISCOVER

Lets buyers browse digital businesses using consistent metrics and product information.

TRANSACT

Supports offers, LOI, diligence, legal documents, escrow and asset transfer.

INVESTOR VALUE Less time spent validating basic traction; more time spent judging business quality and fit.

KEY TAKEAWAY TrustMRR improves the top of the investment funnel; it does not replace due diligence.

Source: TrustMRR FAQ (verification, marketplace and deal process).

How an investor uses the product

The platform converts scattered startup information into a repeatable decision process

1	Search	Define ticket size, MRR, growth and category filters.
2	Compare	Review verified revenue alongside pricing and product context.
3	Shortlist	Select businesses with coherent traction and strategic fit.
4	Diligence	Validate churn, profit, concentration, code and founder dependence.
5	Offer	Negotiate terms and progress through LOI, APA and escrow.

What TrustMRR verifies — Revenue • MRR • subscription counts

What the investor must still verify — Profit • churn • concentration • transferability

KEY TAKEAWAY — **The platform speeds up screening; investment conviction is created during diligence.**

Source: TrustMRR FAQ and marketplace workflow.

Turning the dataset into an investable shortlist

Illustrative mandate: acquire a growing recurring-revenue product for no more than $500K

262 On sale Starting universe	**27** Fit ticket + scale ≤ $500K and ≥ $10K MRR	**13** Positive momentum Revenue growth above zero	**3** Shortlisted Best product-data fit

SCREENING LOGIC

$ **Affordability**

Stay inside the acquisition budget.

↗ **Momentum**

Prefer products showing current demand.

✓ **Coherence**

Avoid obvious metric inconsistencies.

P **Product clarity**

Know who pays and why they buy.

KEY TAKEAWAY **The data is most useful as a filter: it narrows 262 listings to a small set worth real attention.**

Source: Uploaded 1,000-row dataset. Screen is illustrative and not a recommendation.

The shortlist

Three products pass the initial screen; one offers the clearest investment story

SELECTED

SetSmart

SaaS

$15.7K	+29%	$499K
MRR	30D GROWTH	ASK

Clear customer, visible traffic and strong recent demand.

WATCHLIST

Groups Watcher

Marketing

$21.4K	+20%	$500K
MRR	30D GROWTH	ASK

Attractive growth, but weaker external signals and a higher headline multiple.

ANOMALY CHECK

Backlinker AI

Marketing

$26.9K	+577%	$350K
MRR	30D GROWTH	ASK

Strong MRR, but extreme growth needs explanation before conviction.

KEY TAKEAWAY **SetSmart is selected because the product narrative and the financial signals are the most understandable together.**

Source: Uploaded dataset, frozen 30 Jul 2026. Growth is last-30-day revenue growth.

Selected opportunity: SetSmart

AI sales assistant for coaches and creators using Instagram DMs

INVESTMENT THESIS

Automates a revenue-critical workflow

Fast lead response, qualification and booking are directly linked to sales conversion for the target customer.

$97/month

Simple recurring price point

$15.7K	+29%	139
MRR	30D REVENUE GROWTH	ACTIVE SUBSCRIPTIONS

Demand signal

Growth suggests coaches are willing to pay for automated conversion support.

Monetization fit

The price is small relative to the value of a booked sales call.

Expansion path

The workflow can extend to more creator verticals and messaging channels.

KEY TAKEAWAY **SetSmart combines a clear pain point, recurring pricing and visible recent traction.**

Source: Uploaded dataset. Product description and figures are as of 30 Jul 2026.

Investor decision: conditional go

Advance to diligence — but do not acquire at the full asking price based only on headline data

DECISION

PROCEED

Issue a conditional offer only after validating recurring revenue quality and retention.

Illustrative price ceiling

$400K vs. $499K asking price

Why not accept the headline 0.8× multiple?

It is based on annualized 30-day revenue. Using MRR as the recurring base implies ~2.7× ARR.

1. **Retention** — Validate churn, cohorts and how much of the 30-day growth survives.
2. **Revenue quality** — Separate monthly recurring revenue from annual prepayments or one-off fees.
3. **Platform risk** — Test dependence on Instagram access, policy changes and founder-led sales.

KEY TAKEAWAY **The right decision is not “buy” or “reject”; it is “advance with valuation and diligence discipline.”**

Illustrative investor judgment based on the uploaded dataset; not financial advice.

How the investment can create value

The acquisition works only if the buyer can improve retention and reduce platform concentration

1 PROTECT

Stabilize onboarding, support and product reliability to retain the existing base.

2 EXPAND

Move beyond coaches into agencies, consultants and other high-ticket sellers.

3 DIVERSIFY

Add WhatsApp, web chat or email to reduce reliance on one social platform.

4 MONETIZE

Introduce team plans, usage tiers and integrations for higher-value customers.

Final investor view

TrustMRR identifies the opportunity. The investment succeeds only through disciplined diligence and an executable operating plan.

KEY TAKEAWAY **Recommendation: advance SetSmart, negotiate below ask, and invest only if retention and platform-risk checks pass.**
