

Praxel

A 2-DAY BUILD WORKSHOP

Prompt to *Production*

Build a real app from your own idea.
Then learn how to ship it.

JUNE 6 - 7 · 2026

SWIPE →

**Walk in with an
idea.
Walk out with a
*deployed app.***

Live on a public URL. Plus the fundamentals to
ship the next one on your own. No code required.

Built for people who think *clearly*.

Working professionals and operators who don't write code. If you can describe what you want and reason through a problem, you're ready.

You leave with all of this.

A working app

Built from your own idea, deployed to a public URL.

The know-how

A repeatable way to take any idea from prompt to production.

The fundamentals

Databases, auth, integrations, deploy, testing, security, analytics.

01

SESSION ONE

Setup & app essentials

What an app actually is, in plain language. Get your tools working, then cover the API keys, accounts, and security basics to keep in mind before you build a thing.

Claude Code

Codex

02

SESSION TWO

Plan & build

Your idea becomes a plan the AI can build against. Then you build the core of your app: planning, iterating, and making it work.

03

SESSION THREE

Database, integrations & deploy

Why your app needs a database, and how to set one up on Railway. Wire in the integrations you need, like voice with ElevenLabs. Then get it live on a URL.

[Railway](#)[ElevenLabs](#)

04

SESSION FOUR

Launch, test & secure

You've shipped it. Now make it real: AI-driven testing, the security fundamentals every live app needs, and the analytics to see who's using it.

Two days. Four sessions.

DATES	June 6 & 7, 2026
SESSIONS	4 live, 2 hours each
TIMINGS	9 – 11 AM & 3 – 5 PM, both days
SEATS	20 only
FEE	₹10,000 per seat
BRING	A laptop and an idea

Praxel

**Bring the idea.
We'll help you
*ship it.***

Twenty seats, two days. To claim one,
write to build@praxel.in
