

Strategic Proposal

# TrustMRR: Growth Intelligence

Turning startup benchmark data into actionable growth diagnostics and acquisition guidance.

Proposal for new platform intelligence feature layer.

TrustMRR Product Roadmap 2026

# 1,000 Startups. One Striking Reality.

DATABASE REALITY

The "average startup" is a statistical mirage.

Our database analysis reveals that mean revenue is heavily distorted by extreme outliers (e.g. Stan at \$3.57M MRR). Any standard benchmark given to founders today would set false targets.

### Why Intelligence is Needed

Raw averages mislead founders. Intelligence contextualizes true median peer performance.

### Platform MRR Distribution

# Revenue Correlation Analysis

DATA SIGNAL

Digging into tracked platform variables, we found the single metric that truly predicts success: **Active Subscriptions**.

| Tracked Metric                                                                                         | Correlation to MRR (r) | Predictive Strength | Strategic Insight                                                    |
|--------------------------------------------------------------------------------------------------------|------------------------|---------------------|----------------------------------------------------------------------|
| Active Subscriptions                                                                                   |                        |                     | Core metric that the Intelligence Engine will benchmark against.     |
|  Revenue Last 30 Days | 0.87                   | High                | Strong confirmation signal for short-term recurring momentum.        |
| Domain Rating (DR)                                                                                     | 0.21                   | Low                 | SEO strength does not guarantee monetization efficiency.             |
| X/Twitter Followers                                                                                    | 0.02                   | Negligible          | Social reach is vanity; vanity metrics bear zero correlation to MRR. |

# Bridging the Monetisation Gap

PROBLEM SIZING

1 in 5 startups listed on TrustMRR sit at \$0 MRR. Today, no tool on the platform helps them transition to monetization.

19.7%

Zero MRR Today

197 listed startups generate zero recurring revenue despite active building.

10.1%

Zero Lifetime Revenue

101 startups have never processed a single transaction on record.

100%

Opportunity Gap

Intelligence converts stagnant profiles into active monetization pipelines.

Startup Listing

Founder registers product on TrustMRR directory.

Monetisation Gap

Stagnates at \$0 MRR with no actionable guidance.

TrustMRR Intelligence

Automated subscriber roadmap bridges to recurring MRR.

# Where Monetisation Works

PEER BENCHMARKING

Intelligence avoids generic platform averages — benchmarking startups exclusively against true **category peers**.

## Marketing

**\$1,586**

Highest category median MRR across all tracked sectors.

## Content Creation

**\$1,254**

Strong monetization driven by creator economy tooling.

## B2B Software

**\$1,036**

Consistent recurring revenue with higher average contract values.

## AI Products

**\$446**

High volume of new entries with emerging monetization models.

## B2C Apps

**\$181**

Lower price points require larger consumer volume scale.

## Productivity

**\$42**

Saturated space requiring clear differentiation to monetize.

# The Best Growth Metric Isn't Followers

CORE METRIC

# 0.91

## Active Subscription Correlation

Active subscriptions provide the cleanest apples-to-apples signal of revenue potential across all SaaS categories.

Core Feature Output

## The "Subscriber Gap"

Instead of generic growth advice, Intelligence calculates the precise number of paid subscribers a startup needs to reach their category median.

**Subscriber Gap = (Category Median Subscribers) -  
(Current Active Subscribers)**

# From Directory to Decision Engine

## VALUE SHIFT

### CURRENT PLATFORM

#### TrustMRR Today: "WHAT Exists"

- ✗ Static directory database listings
- ✗ Raw metrics with no category context
- ✗ Founders left to figure out growth alone

### FUTURE INTELLIGENCE LAYER

#### TrustMRR Tomorrow: "WHAT TO DO NEXT"

- ✓ Automated growth & monetization diagnosis
- ✓ Peer-group subscriber gap identification
- ✓ Actionable buyer deal quality scores

# TrustMRR Intelligence Engine

## ARCHITECTURE

The continuous 4-step intelligence workflow running automatically for every startup on the platform:

**Example Engine Recommendation:** "Increase active subscriber count by +18 to enter the top 25th percentile for Content Creation SaaS."

# Startup Acquisition Intelligence

BUYER SIDE

Intelligence also serves buyers browsing listings — highlighting that on-sale startups significantly outperform the non-listed baseline.

**26.2%**

## Listed for Sale

Proportion of total database actively seeking acquisition.

**\$1,055**

## On-Sale Median MRR

Listed startups show 5.6x higher median MRR.

**\$187**

## Not-On-Sale Median

Unlisted baseline median monthly recurring revenue.

**38x**

## Asking MRR Multiple

Average valuation multiple across active marketplace deals.

# TrustMRR Deal Score Funnel

BUYER FEATURE

Transforming raw database rows into an **Acquisition Quality Score**.

Instead of evaluating unvetted spreadsheets, buyers get a multi-dimensional deal score evaluating revenue permanence, valuation realism, and category tailwinds.

## Buyer Benefit

Instant risk-adjusted deal evaluation directly on marketplace listing cards.

1. Revenue Quality & Persistence

2. Customer Traction & Subscriptions

3. Category Growth & Attractiveness

4. Valuation Realism (vs 38x Multiple)

Acquisition Quality Score

# Unifying Platform Stakeholders

USER VALUE

## The Founder

"How do I grow my MRR?"

### Intelligence Output:

Automated monetization diagnostic & category peer gap analysis.

## The Buyer

"What should I acquire?"

### Intelligence Output:

Acquisition deal scoring, risk screening & deal ranking.

## The Investor

"Where is high-growth white space?"

### Intelligence Output:

Macro category growth trends & breakout startup alerts.

# TrustMRR Growth Intelligence Cycle

FLYWHEEL

A self-reinforcing flywheel connecting founder growth, buyer transactions, and category insights.

## 1. Founder Growth Diagnostic

Benchmarks MRR and subscribers to drive active founder retention.

## 2. Acquisition Deal Score

Identifies high-quality deal listings to increase marketplace transactions.

## 3. Category & White Space

Uncovers high-monetization sector opportunities to attract new builders.
