

Where the *real* revenue is being made.

A verified look at 1,000 live micro-SaaS, AI and creator startups — and the investable signals hiding in plain sight.

MU · Session 3
Frozen 30 Jul 2026

1,000

verified startups.
one signal.

The best startups today don't *pitch* — they *post revenue*.

Traditional deal flow relies on decks, warm intros, and forecasts that rarely survive contact with reality.

TrustMRR flips it: founders **connect their live payment stack** — Stripe, RevenueCat, Lemon Squeezy — and every dollar is verified at the source.

What we're looking at is not a pitch. It's a **live scoreboard of 1,000 businesses**.

THE DATASET IN ONE LINE

**\$334M in verified
lifetime revenue.**
Half a million paying
subscribers.

Aggregated across 1,000 live startups • TrustMRR, frozen 30 Jul 2026

The numbers that matter, before we go any deeper.

STARTUPS

1,000

Live, revenue-generating businesses in the sample.

COMBINED MRR

\$13.5M

Recurring revenue flowing through, every month.

LIFETIME REVENUE

\$334M

Total money earned by these startups, all-time.

PAYING SUBSCRIBERS

500K+

Real customers, actively paying every month.

"This isn't a survey. Every figure is pulled directly from the founder's own payment processor."

VERIFIED VIA

Stripe · RevenueCat · Dodo · Polar · Lemon Squeezy

64% of the dataset flows through Stripe alone.

Where founders are actually *making money.*

The 1,000 startups fall into ~15 major categories. One dominates.

THE TAKEAWAY

1 in 5

*startups in the dataset
is an AI company.*

Nearly 3× the next category — the
clearest signal of where builder
energy is flowing right now.

Silicon Valley leads. But the map is *wider than expected.*

THE NEXT NINE

02	France	79
03	India	59
04	United Kingdom	50
05	Canada	29
06	Germany	24
07	Brazil · Hong Kong · Australia · Spain	72

Founders are shipping paid products from **80+ countries**. Distribution has outrun geography.

Most are small. A few are *quietly enormous.*

Grouping every startup by monthly recurring revenue (MRR) shows a classic power law — and the top of it is where the returns live.

The top 21 startups (≈2% of the sample) account for the vast majority of MRR — this is where our lens focuses.

The names worth *memorising*.

And here's the part
most investors *miss*.

STARTUPS OPENLY LISTED FOR SALE

262

*That's 1 in 4 founders in the dataset,
ready to sell today.*

COMBINED ASKING PRICE

\$86.8M

A live pipeline of businesses ready to change hands — no bankers, no auction pressure.

MEDIAN MULTIPLE

2.3×

of annual revenue.

GROWING MRR

31%

of listings still trending up.

What we invest in — and *why now.*

THESIS 01

Buy the tier.

Target the 196 startups in the **\$10k–\$100k MRR** band. Proven revenue, cheap multiples, real cash flow from day one.

THESIS 02

Ride the curve.

Back the **30%** that are still growing MRR month-over-month. Verified traction is the strongest possible entry signal.

THESIS 03

Own the lens.

No one else has a real-time, revenue-verified feed of 1,000+ builders. **The dataset is the moat** — deal flow compounds every month.

*Verified revenue → obvious winners → fair prices → **asymmetric returns.***

Join us at the *source* of the signal.

A first-close fund built on verified revenue, not vibes.

Here's what we're proposing.

1

RAISE TARGET

\$25M • Fund I

A concentrated 15–20 position portfolio across the top MRR tiers.

2

CHECK SIZE

\$500K – \$2M per company

Buy-outright or majority-stake positions in verified businesses.

3

TIMELINE

First close • Q4 2026

Pipeline is live today. Every week we wait, a deal closes without us.

Let's talk before the next 262 sell.
