

LIVE MARKET INTELLIGENCE • CREATOR ECONOMY

AI-PULSE-GRID DASHBOARD

Where internet-native capital meets real-time economic truth.

SEED PITCH • AUGUST 2026

The Data Is Already Stale

Quarterly truth, real-time economy

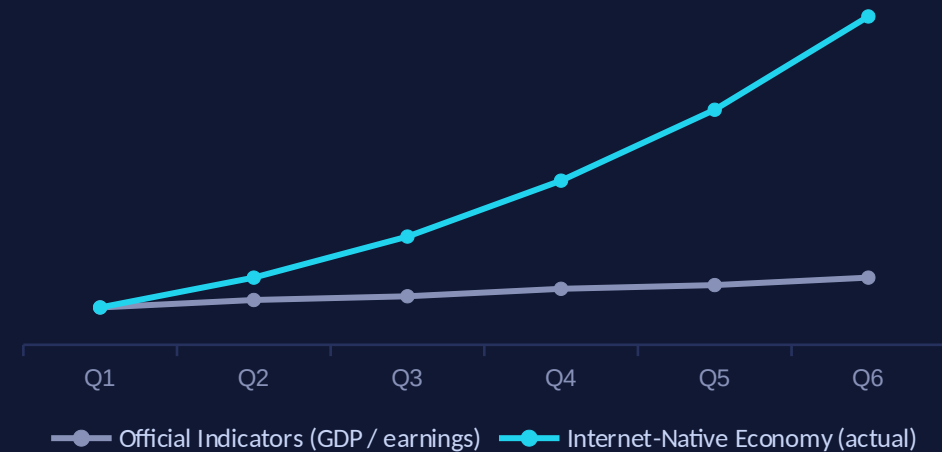

GDP prints and earnings calls report on a world that already changed. By the time official data publishes, the digital frontier has moved again.

The shadow tech GDP goes uncounted

Solo founders, micro-SaaS, and fast-moving AI monetization sit entirely outside standard economic surveys — despite moving real capital, daily.

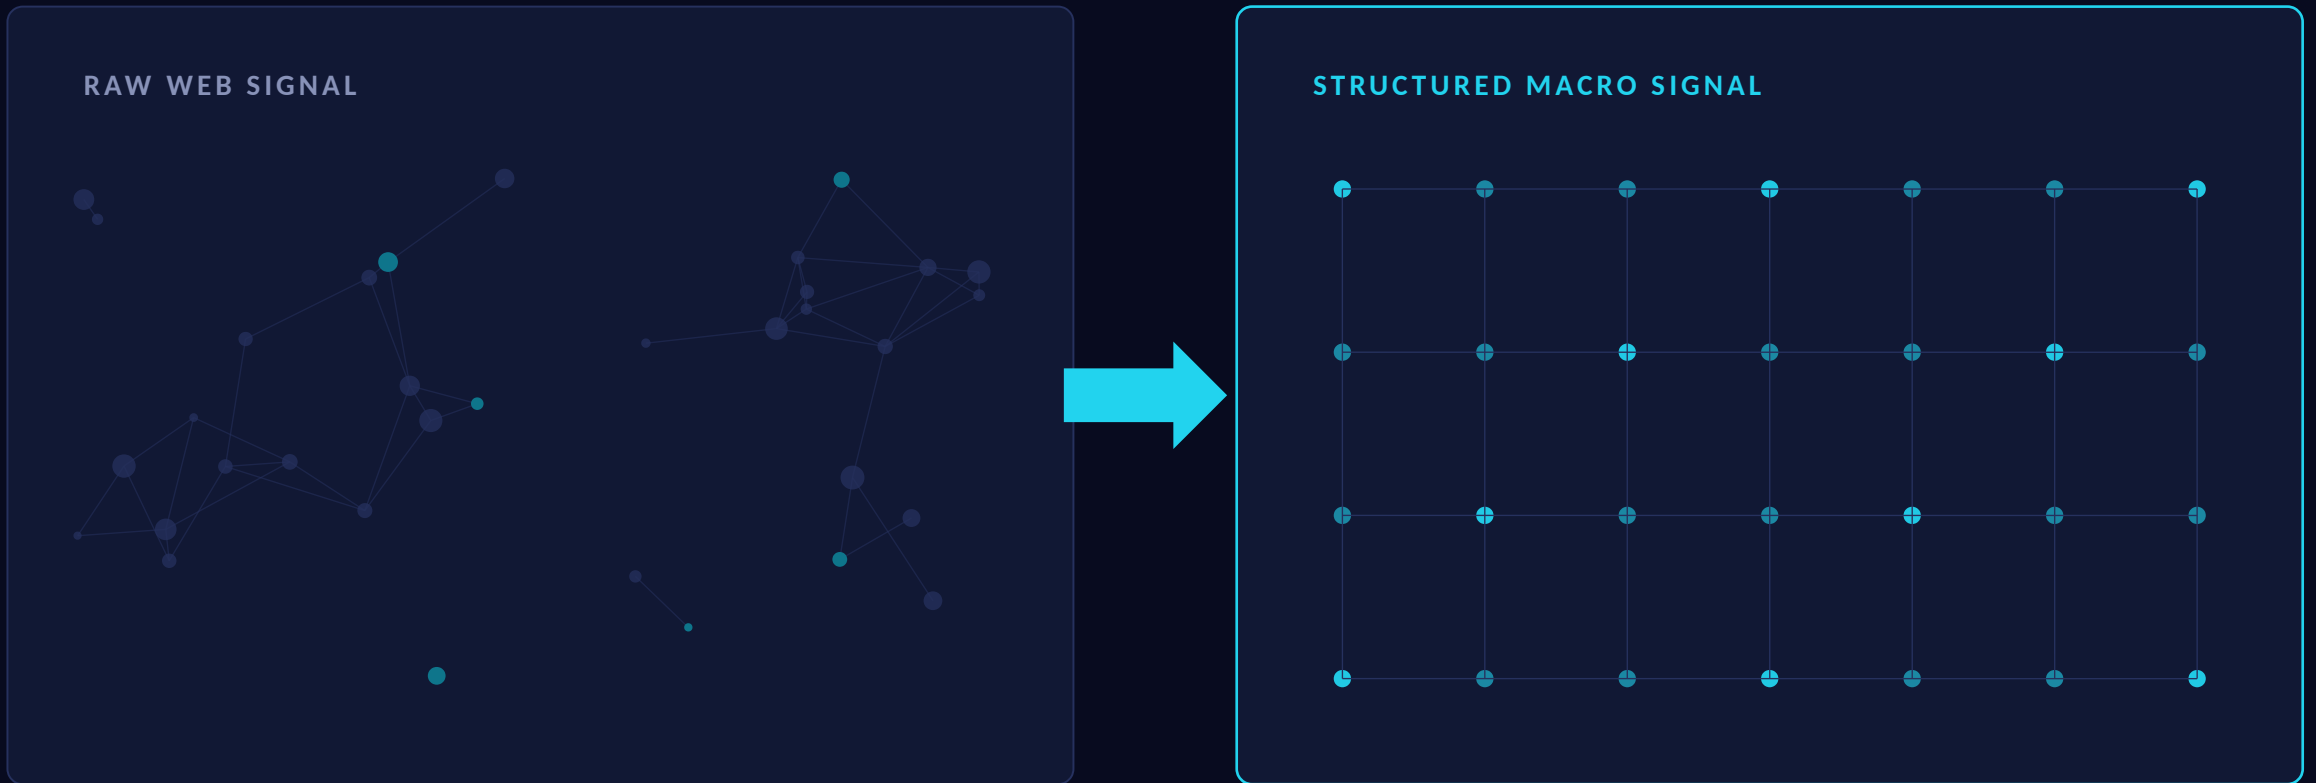

REPORTED vs. ACTUAL ECONOMIC ACTIVITY

The gap between what's reported and what's real widens every quarter.

From Web Chaos to Market Intelligence

AI-Pulse-Grid is a real-time analytics dashboard powered by live intelligence tracked across 1,000+ internet-native startups — continuously structured into the macro signals that matter.

THE PROOF IS IN THE DATA

The AI Economy, In Real Numbers

Live read from AI-Pulse-Grid's tracked cohort of 1,000 internet-native startups.

197

of 1,000 tracked startups are AI-native — nearly 1 in 5

\$31.8M

in total revenue tracked across the AI cohort

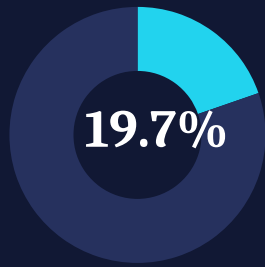

75.8%

average 30-day revenue growth rate, AI cohort

54

AI startups on the market now — avg. ask \$212K

AI-NATIVE
SHARE OF
TRACKED
COHORT

AI-native startups are compounding at 75.8% month-over-month — a velocity no quarterly filing, survey, or GDP print is built to see until it's already history.

The Macro-Economist

USE CASE

“Track the shadow tech GDP — the trillions in economic activity moving through solo founders and micro-SaaS that no national survey captures.”

AI-PULSE-GRID FEATURES

Geographic Wealth Heatmaps

Visualize where internet-native revenue is concentrating, country by country, updated continuously.

Velocity Indexes

Track time-to-revenue globally — how fast new digital businesses convert an idea into real cash flow.

The Educator & Curriculum Director

USE CASE

“Curriculum agility — know which skills the market is actually paying for today, so students are trained for tomorrow's jobs, not yesterday's.”

AI-PULSE-GRID FEATURES

Tech Stack Tracker

See which languages, frameworks, and AI tools winning startups actually build on — in real time, not in a 3-year-old syllabus.

B2C vs. B2B Audience Mapping

Understand which markets are hiring for which skill sets, so program design matches real employer demand.

The Policymaker & Regulator

USE CASE

“Proactive regulation, not reactive cleanup — see the scale of unregulated AI activity before it becomes a headline, not after.”

AI-PULSE-GRID FEATURES

Cross-Border Capital Flow Analytics

Track how revenue and users move across jurisdictions, ahead of the filings that would normally reveal it.

Domain Influence Scoring

Quantify the real reach and market weight of AI ventures operating outside traditional regulatory visibility.

The Investor / Micro-PE Firm

USE CASE

“Proprietary deal flow — surface acquisition and seed targets before they hit a marketplace or a broker's inbox.”

AI-PULSE-GRID FEATURES

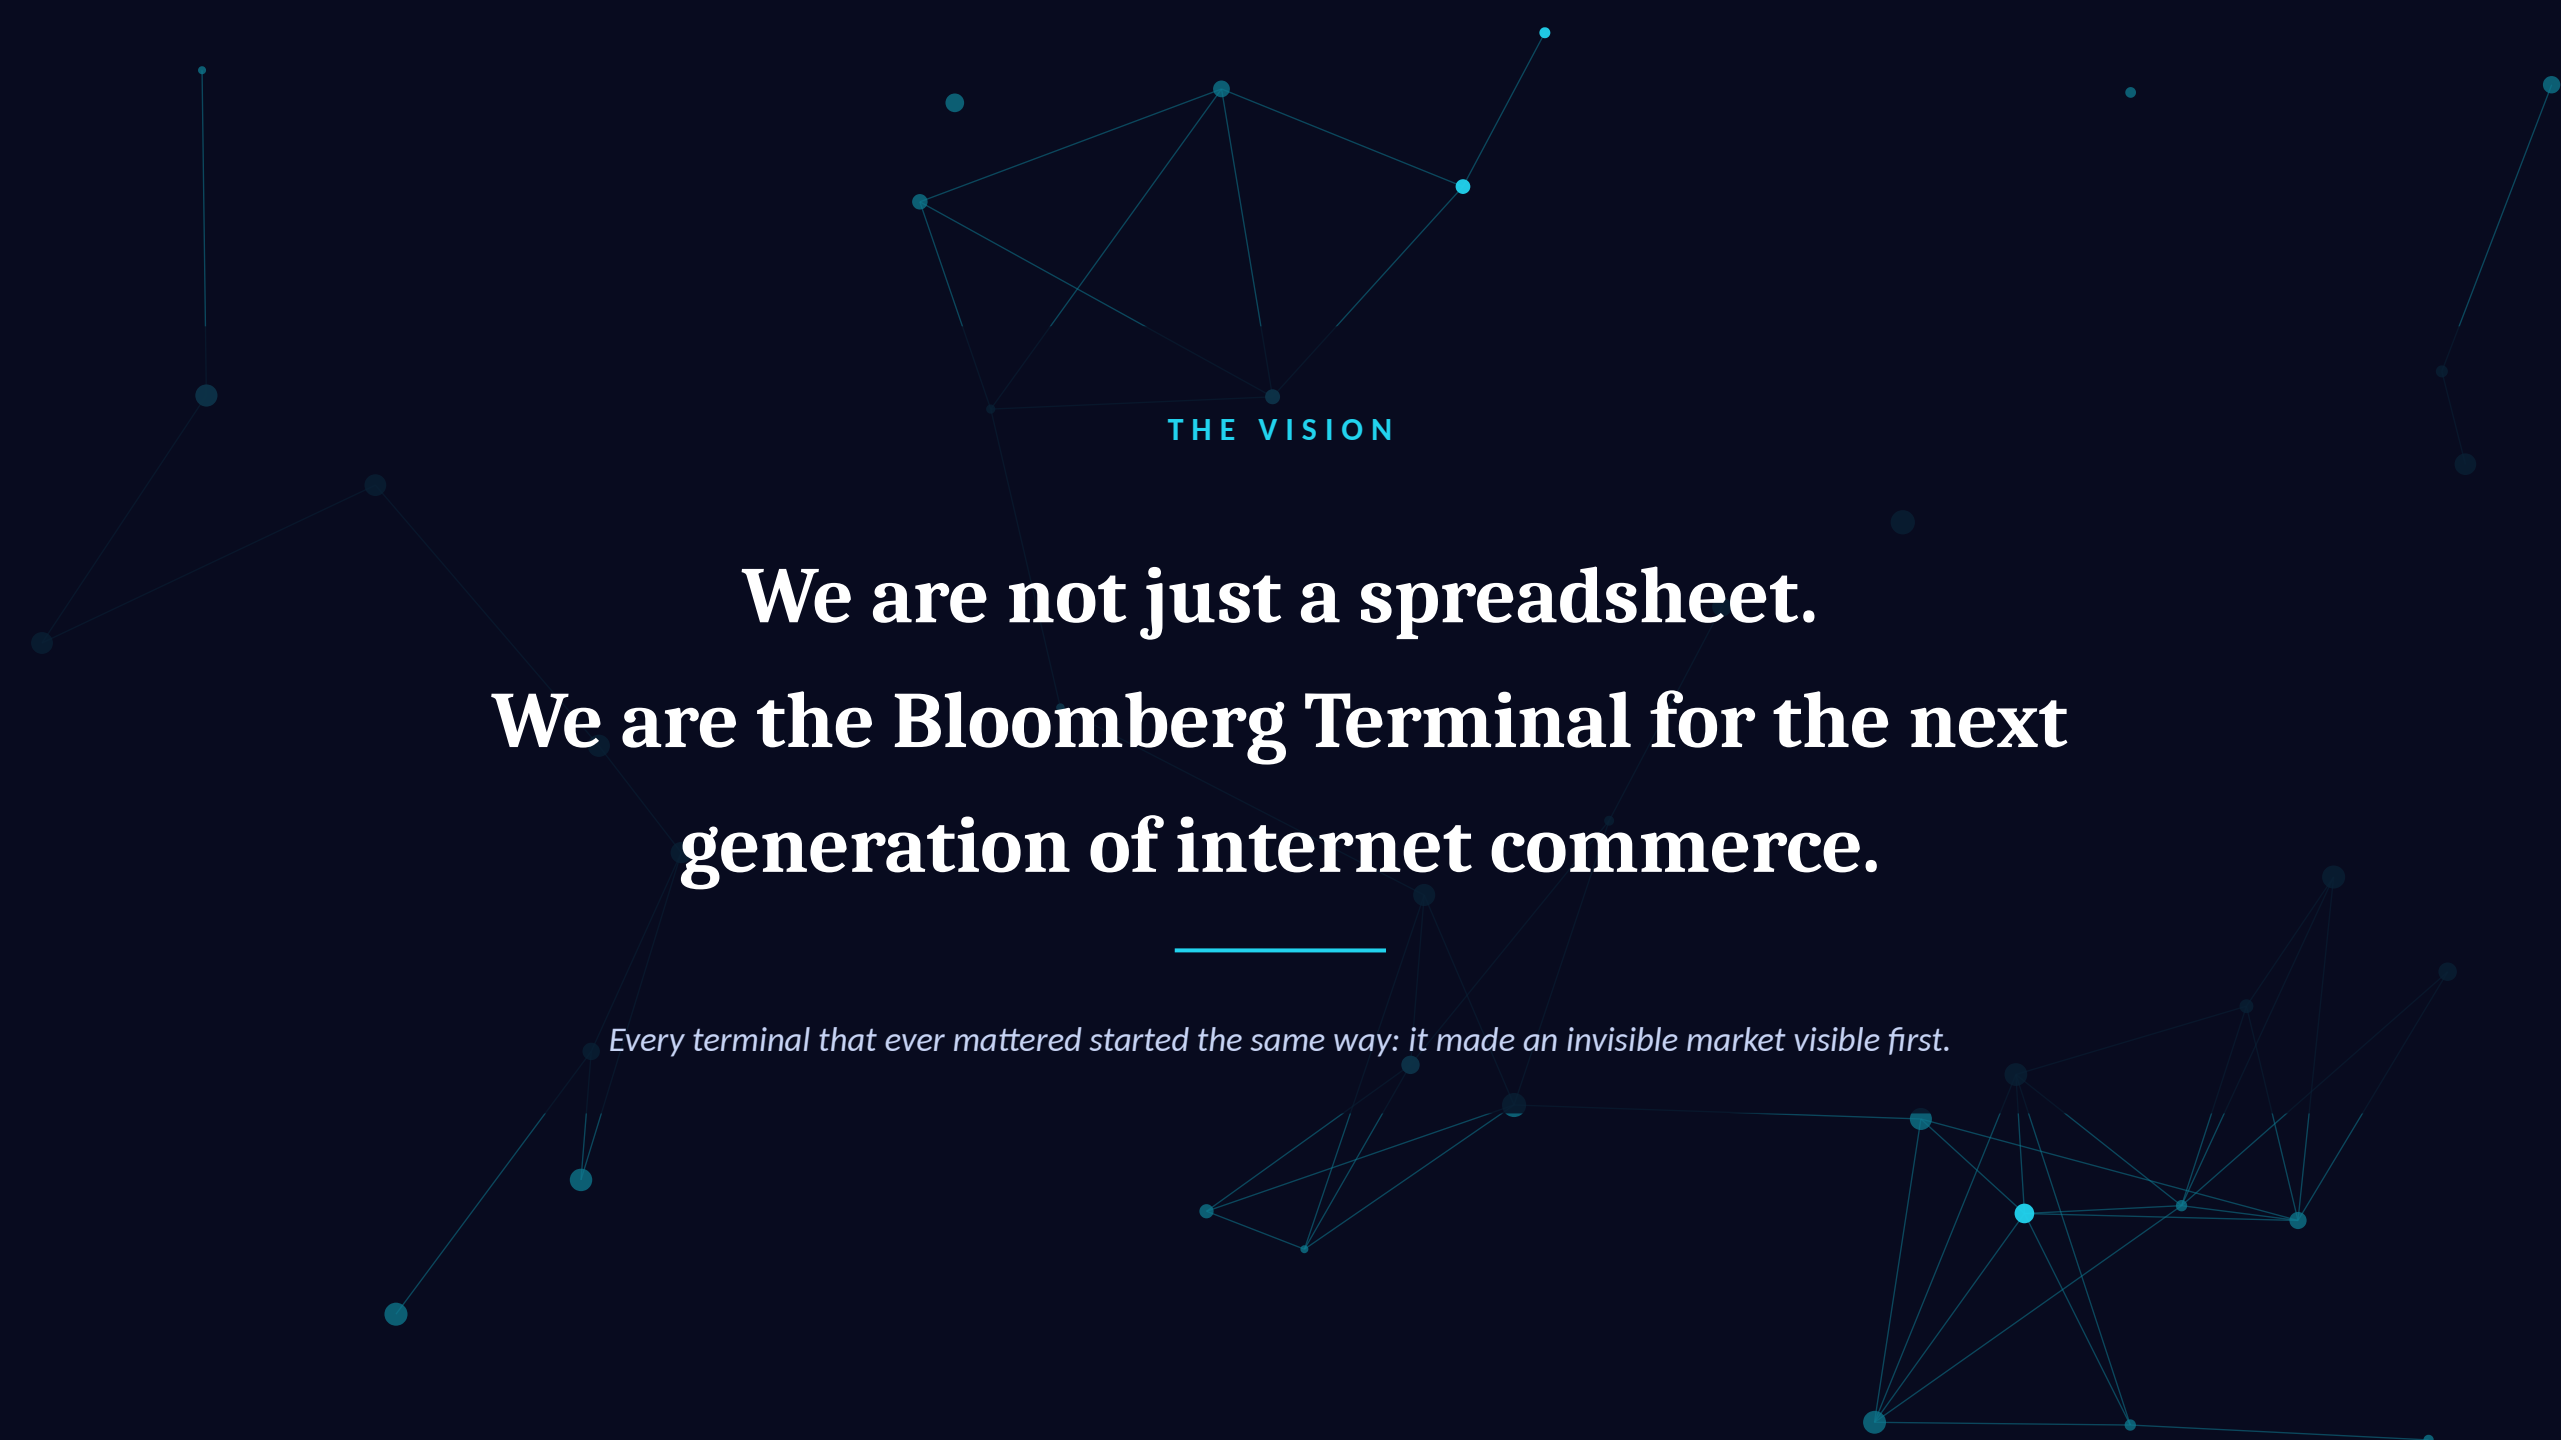

Acquisition Screener

Filter live — today, 54 AI startups are on the market at an average ask of \$212K, ranked and screened by growth and multiple.

Custom Traction Alerts

Get notified the moment a seed-stage target crosses your growth, revenue, or geography thresholds.

THE VISION

**We are not just a spreadsheet.
We are the Bloomberg Terminal for the next
generation of internet commerce.**

Every terminal that ever mattered started the same way: it made an invisible market visible first.

JOIN US

Back The Terminal For The Next Trillion Dollars Of Commerce

We're raising a seed round to expand AI-Pulse-Grid's live-tracked cohort, deepen predictive modeling, and bring macro-intelligence to the economists, educators, regulators, and investors who need it first.
