

VERIFIED BY API, NOT BY CLAIM

TrustMRR *Signal*

A decision-intelligence layer for TrustMRR's acquisition marketplace
— from transparency to transaction.

AI PRODUCT STRATEGY PROPOSAL · 30 JUL 2026 SNAPSHOT

The opportunity is broad.

The value is concentrated.

1,000

Startups with API-verified revenue

\$13.47M

Combined verified monthly recurring revenue

48%

Of all MRR held by just the top 10 companies

If the marketplace is this large, why is finding the right company still hard?

SHARE OF TOTAL VERIFIED MRR

Percentage growth can exaggerate weak economic impact.

AI • 30-DAY REVENUE GROWTH

Wutt.net

+7,900%

= +\$79 in real revenue this month

AI • 30-DAY REVENUE GROWTH

GojiberryAI

+19.7%

= +\$63,467 in real revenue this month

One of these moved the needle this month. It wasn't the one with the bigger percentage.

The loudest category isn't the best hunting ground.

AI collects the listings. Analytics collects the discount.

MEDIAN ASKING MULTIPLE BY CATEGORY

Quality without price is incomplete analysis.

AI · \$0 VERIFIED MRR

AVOID

Hypeflare

\$1.5M

asking price — for zero revenue

ANALYTICS · \$36,457 VERIFIED MRR

Notionlytics

\$48K

asking price — pays back in <6 weeks

Same marketplace. Same verification badge. Worlds apart in what they're actually worth.

DISCOVERY ISN'T A DECISION

TrustMRR helps people find a company. *It stops before it helps them decide.*

01

Discovery

Verified revenue, browsable and searchable.
TrustMRR today.

02

Analysis

Reading value props, growth, and fit by hand. Off-platform.

03

Valuation

Guessing whether an asking price is fair. Off-platform.

04

Decision

Spreadsheets, DMs, gut instinct. Off-platform.

Three of four steps already happen — just not here, and not fast.

Introducing *TrustMRR Signal*TM

AN EXPLAINABLE SCORE, NOT A BLACK BOX

Every Signal score shows its receipts.

Four inputs, plainly weighted, recomputed live — never a single hidden number.

01 · SCALE

Revenue,
log-scaled

Verified MRR, so a \$200K business doesn't drown out a \$2K one on a linear axis.

35% weight

02 · MOMENTUM

Dollar growth,
not percent

Absolute revenue added this month — immune to the small-base trap.

20% weight

03 · DURABILITY

Moat &
spread

Domain authority and subscriber count — one whale customer is a risk, not a strength.

25% weight

04 · VALUATION

Price vs.
peers

Asking price against category-median multiples. Cheap relative to the field scores up.

20% weight

Every field carries a confidence flag — thin sample, stale listing, or unverified metric — before a human sees the score.

Four real companies. Four different reasons to look twice.

STRONGEST	BEST VALUE	HIDDEN GEM	AVOID
Based Labs AI AI · US \$28,537 verified monthly revenue	Notionlytics ANALYTICS · US \$36,457 verified monthly revenue	Linkeddit SALES · CA \$1,036 verified monthly revenue	Hypeflare AI · UNVERIFIED \$0 verified monthly revenue

Domain rating68	Payback<6 wks	MoM growth+90.1%	Domain rating0
Subscribers873	Subscribers63	Subscribers24	Subscribers0

Sorted by raw MRR, none of these would ever sit next to each other.

The ranking isn't fixed. The buyer's objective is the input.

BALANCED

Based Labs AI

Scale, durability, momentum
and price weighted evenly.

GROWTH-SEEKING

Linkedit

+90.1% MoM on a
\$5,000 asking price.

VALUE-SEEKING

Notionlytics

\$48,000 for \$36,457/mo —
pays back in under 6 weeks.

SCALE-SEEKING

1Lookup

\$207,064/mo MRR — the
largest listing on the marketplace.

Sort by raw MRR and 1Lookup always wins — a \$10M commitment. Ask a sharper question, and Notionlytics's \$48K bargain surfaces instead.

The score answers the question you actually asked.

● ASK SIGNAL

Grounded only in TrustMRR's verified facts — never the open web.

“Why does Notionlytics outrank a company with 6× its MRR?”

Because Notionlytics is priced at 0.11× annualized MRR (\$48,000 for \$36,457/month) — a payback of under six weeks — while the larger company carries a much richer multiple. Signal weights price against category peers, not revenue in isolation, so a small, fairly-priced business can outrank a bigger, expensive one. Recommendation: worth a closer look before anything priced above 3–4× in the same category.

Same reasoning engine that scores every card on the shortlist — not a separate chatbot.

262 companies are already for sale here. Nobody is charging for the decision yet.

WHO PAYS

Buyers under time pressure

Acquisition entrepreneurs, search funds, PE and corp-dev scouts, SaaS aggregators — all screening, comparing, and valuing by hand today.

THE WEDGE

Three steps out

1. The 262 companies already for sale — \$86.8M in combined asking price, right now.
2. Professional buyers who need a repeatable shortlist, not a scroll.
3. Broader investment intelligence, once the engine is trusted.

MONETIZATION

Priced on the decision, not the data

A per-shortlist or per-seat fee for buyers, layered on top of the attention TrustMRR already owns — verified revenue is the moat competitors can't fake.

TrustMRR already helps us see the market.

The next opportunity is to help the market *decide*.

FROM TRANSPARENCY TO TRANSACTION
