

The Undergrad's Guide to Building a Business

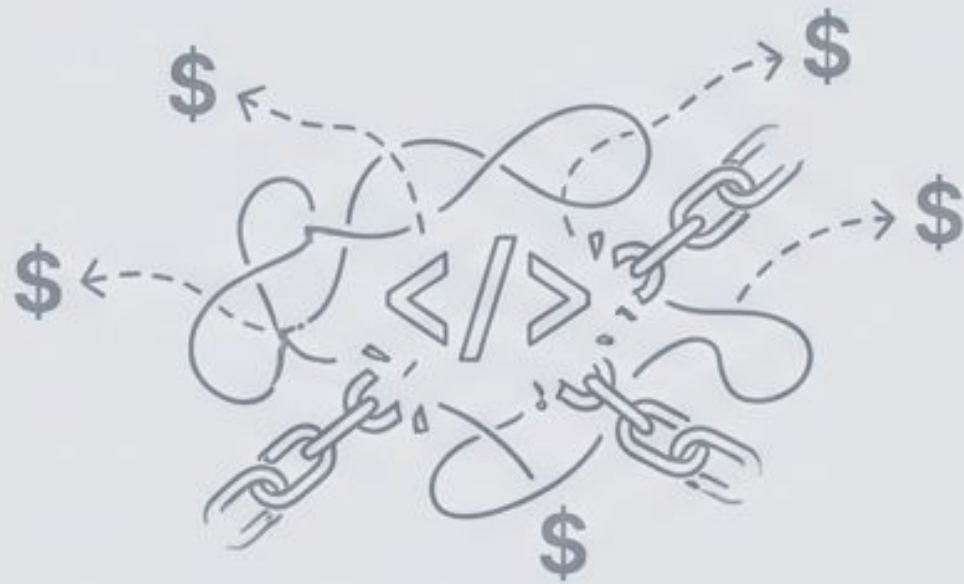

For Undergrad students pursuing business

It has never been easier to start.

Use AI tools to do the heavy lifting for you.

Years Ago

- ~~• Learn to write complex code.~~
- ~~• Pay expensive designers for a logo.~~
- ~~• Spend months building.~~

Today

Type what you want.

AI writes the code.

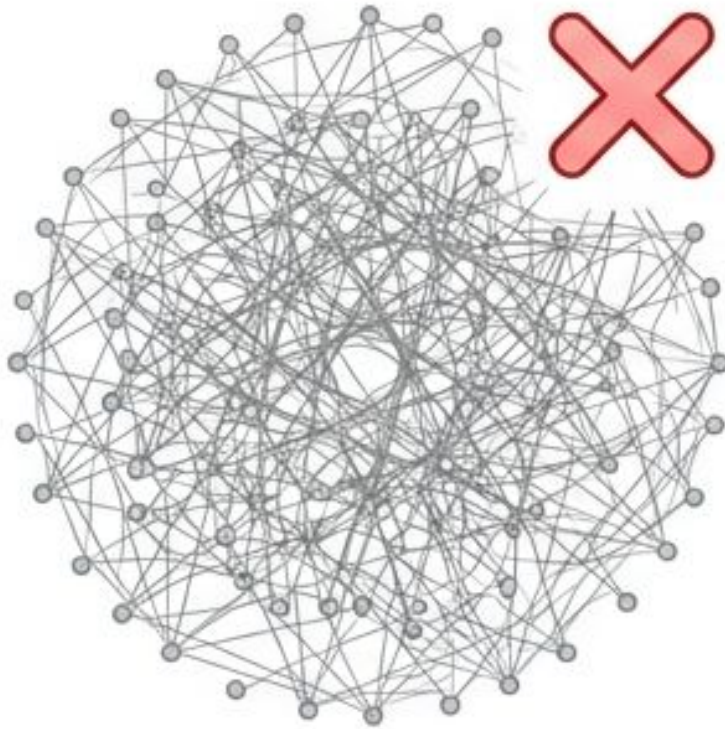

AI designs the logo.

Solve one small problem.

This is how you train your brain to see business opportunities everywhere.

Don't try to build the next Facebook.

Too big. Too confusing. Requires millions of users to work.

Build a simple tool.

Point A

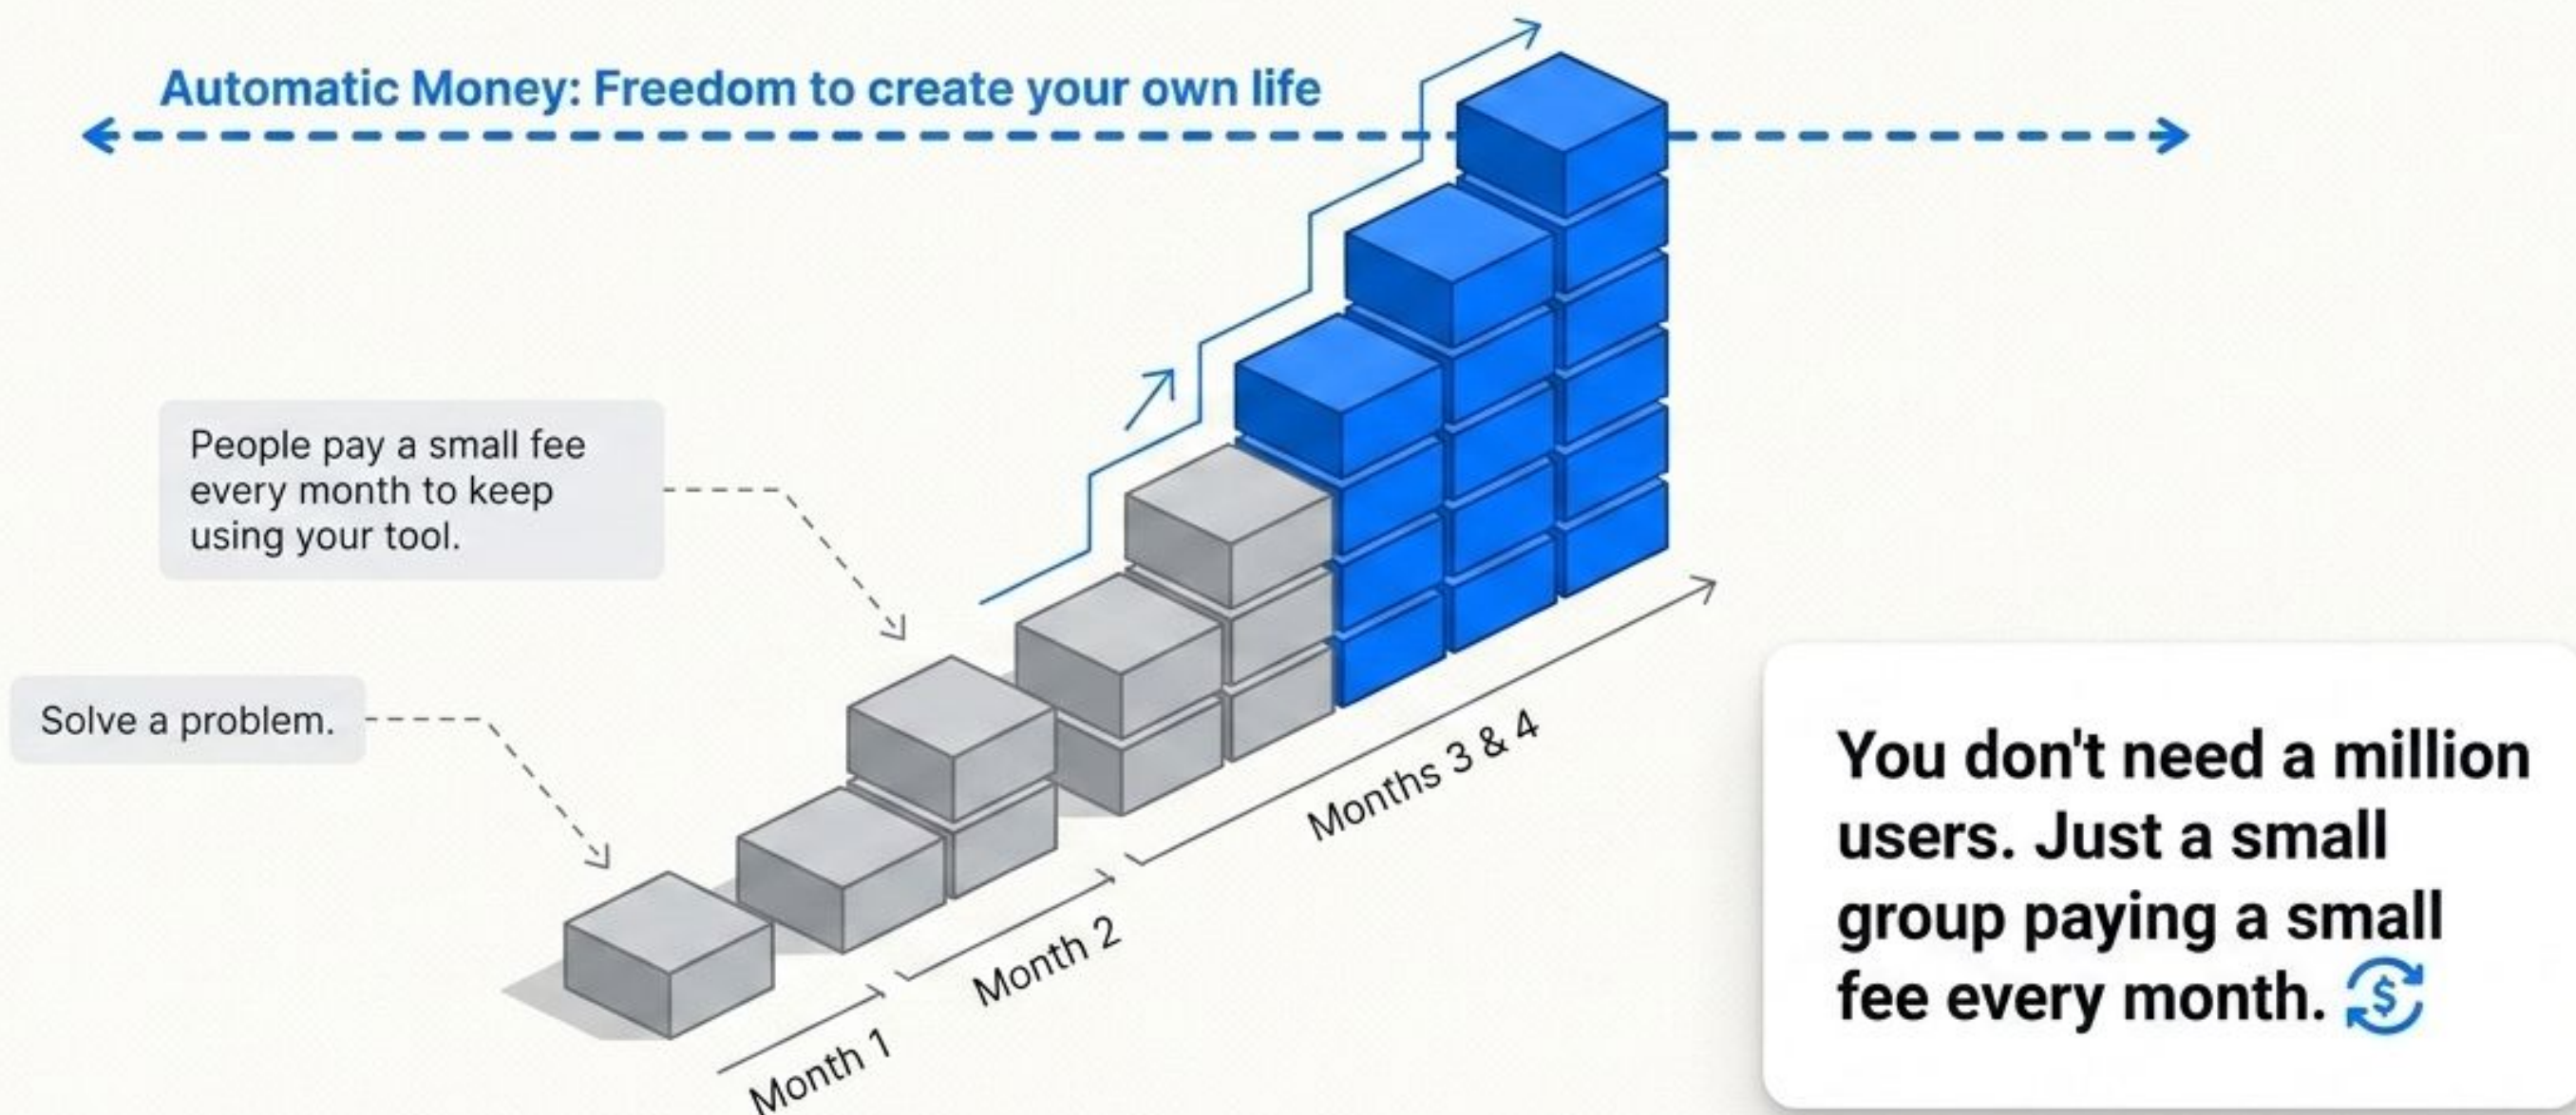

Point B

Help one specific group of people solve one specific problem.

Monthly income equals freedom.

Be your own boss and pay your own bills while still in college.

Real success stories from India.

Simple tools making **automatic** money right now.

Web3Forms

Helps people put simple contact forms on their websites.

\$42,813 every month

Supergrow

Helps people grow their profile on LinkedIn using AI.

\$32,216 every month

MagicSlides.app

Turns simple text into beautiful presentations instantly.

\$10,176 every month

Guidejar

Helps businesses create easy-to-follow user guides.

\$6,151 every month

Start this weekend.

Don't wait for graduation.

Saturday: Build ✨

- ☒ Find one small problem.
- ☒ Use AI to build a basic version of your idea.

Sunday: Launch

- ☒ Show it to the people who have the problem.
- ☒ Get your first user.

The tools are free. The blueprint is proven. Your time is now.
