Key Takeaways

Power-law revenue

Top 10 = 50% of 30d revenue. Most startups are micro-revenue; a thin layer of winners captures the majority of dollars.

B2B commands higher ARPU

B2B median 30d revenue is 4x B2C (\$1,240 vs \$304). Fewer B2B companies, more dollars per company.

US still concentrates value

26% of companies, 63% of revenue. Geography remains a strong predictor of revenue scale.

AI is the volume play

197 AI-tagged startups and the largest category revenue (\$2.4M). Also the most listed assets on sale (54).

Acquisitions are accessible

Median asking price \$35K at 2.3x revenue. Wide range of multiples (<1x to 10x+) creates selective opportunity.

Stealth is material

131 stealth companies generate 27% of tracked revenue — important for any market map or competitor scan.
