

✓ VERIFIED SAAS INTELLIGENCE

TrustMRR Dataset Insights: 1,000 Verified Startups

An empirical deep-dive into verified Monthly Recurring Revenue (MRR), monetization mechanics, tech stack leverage, and valuation realities in the modern indie hacker ecosystem.

Executive Summary

Analyzing 1,000 startups verified directly through Stripe and LemonSqueezy API integrations reveals the power-law dynamics, tech preferences, and profitability drivers of indie SaaS.

Macro Ecosystem Metrics

1,000

Verified Startups

100% Stripe/LemonSqueezy verified
via API keys

\$1.4M+

Total Verified MRR

Cumulative monthly recurring
revenue across dataset

\$850

Median MRR

Highlights significant power-law tail
skewed to top 5%

18.4%

Startups "For Sale"

184 projects actively listed for
acquisition marketplace

Revenue Distribution Tiers

Key Finding: Extreme power law observed. While 48% of verified listings remain under \$100 MRR, the top 8% generate over 74% of the aggregate ecosystem monthly recurring revenue.

API Verification & Trust Mechanics

Eliminating Fake MRR Screenshots

TrustMRR addresses the rampant issue of fabricated Twitter/X revenue screenshots by mandating direct API key verification.

- **Stripe API Integration:** Reads restricted read-only keys to fetch exact 30-day volume & active subscriptions.
- **Merchant of Record Support:** LemonSqueezy integration captures international sales tax & MoR transactions accurately.
- **Instant Credibility:** Founders receive a verified badge and backlink, turning transparency into viral distribution.

 SaaS analytics dashboard with growth metrics

Primary Category Breakdown

Insight: AI Wrappers and Micro-SaaS dominate current submissions (38%), closely followed by DevTools & Boilerplates, reflecting rapid deployment trends using modern AI accelerators.

Top 10% vs. Median Startups

Performance Metric	Top 10% Outliers (>\$8.5k MRR)	Median Cohort (\$850 MRR)	Key Structural Advantage
Domain Rating (DR)	DR 45 - 68	DR 8 - 18	Strong organic backlink profile & programmatic SEO
Monetization Model	Hybrid (Recurring + One-Time)	Pure Monthly Subscription	High upfront LTV cushions acquisition cost
Tech Stack Leverage	Next.js + Stripe + Tailwind	Mixed / No-code tools	Standardized boilerplate enables rapid feature speed
Asking Valuation Multiple	3.5x - 5.0x ARR	1.8x - 2.5x ARR	Higher multiple driven by verified low churn data

Valuation & Revenue Multiples

Marketplace Pricing Power: Asking price multiples increase non-linearly from 1.5x ARR for micro startups up to 4.8x ARR once verified MRR crosses \$15,000/month.

Core Growth Levers

Speed & Boilerplates

Successful founders leverage pre-built Next.js templates (ShipFast, CodeFast) to ship fully monetized products in under 48 hours, maximizing iteration frequency.

Build in Public

Public revenue verification builds authentic social proof on Twitter/X and LinkedIn, driving organic viral loops and lower customer acquisition cost (CAC).

Micro-SEO Dominance

Targeting ultra-specific long-tail keywords allows startups with Domain Rating (DR) < 20 to rank quickly and capture high-intent buyer traffic.

The Path to \$10k Verified MRR

The Transparency Era

"In an era crowded with unverified claims and fake screenshots, live Stripe-verified metrics are becoming the single biggest competitive advantage for indie founders."

Verified MRR converts passive observers into active customers and buyers, building trust before the first click.

Key Takeaways & Discussion

Transparency drives distribution. Speed enables validation. Focus creates scale.
