

TRUSTMRR MARKETPLACE

What 1,000 Indie Startups Reveal About Building & Selling SaaS

A data snapshot of the TrustMRR listings dataset — 1,000 startups, frozen 30 July 2026

\$13.5M

Combined MRR

1,000

Startups tracked

65

Countries represented

29

Categories

AI Leads the Marketplace — By Count and By Revenue

Startup count vs. total MRR by category (top 10 categories, of 29 tracked)

Takeaway: AI startups are 19.7% of listings but capture 30.8% of category-tagged MRR — the category isn't just hyped, it's actually converting to revenue faster than its headcount share.

Revenue Is a Power Law, Not a Bell Curve

A handful of breakout startups carry the entire marketplace's revenue

MEAN vs. MEDIAN MRR

\$13,472

average MRR per startup

\$282

median MRR per startup

The average is 48x the median — a tiny group of outliers (Stan, Rezi, GojiberryAI) drag the mean far above what a typical listed startup earns.

Top 1%
(10 startups)

48% of total MRR

Top 10%
(100 startups)

81.8% of total MRR

Bottom 50%
(500 startups)

0.2% of total MRR

Followers don't buy revenue:

correlation between X (Twitter) followers and 30-day revenue is just 0.02 — essentially zero. Audience size is a vanity metric here, not a revenue driver.

B2B Startups Monetize Far More Efficiently Than B2C

Median MRR and revenue-per-visitor, split by audience type

Takeaway: B2B listings earn a ~5.7x higher median MRR and convert visitors into dollars ~3.5x better than B2C. If the goal is monetization efficiency (not just traffic), B2B is the stronger model in this dataset.

Growth Is a Coin Flip — But Sellers List Their Winners

30-day MRR growth distribution and marketplace listing behavior

23.8%

of startups shrank in the last 30 days

67

startups grew MRR >50% in 30 days

0%

median 30-day MRR growth — flat is typical

MARKETPLACE FOR-SALE SIGNAL

26.2%

of the 1,000 startups (262) are currently listed for sale

\$1,055 median MRR for listed startups vs. **\$187** for those not for sale
— *sellers are listing their stronger businesses, not their weakest.*

MEDIAN ASKING PRICE MULTIPLE

≈ 3.9x annual MRR

(interquartile range roughly 2.0x – 10.0x, reflecting wide variance in buyer demand across categories)
