

The Micro-SaaS Ecosystem X-Ray

Evaluating market composition, revenue health, and exit intent in the current startup dataset.

Volume

AI / SaaS

Heavily dominated categories.

Growth

0%

Flat 30-day median MRR.

Infrastructure

64%

Stripe-powered web SaaS.

Liquidity

26%

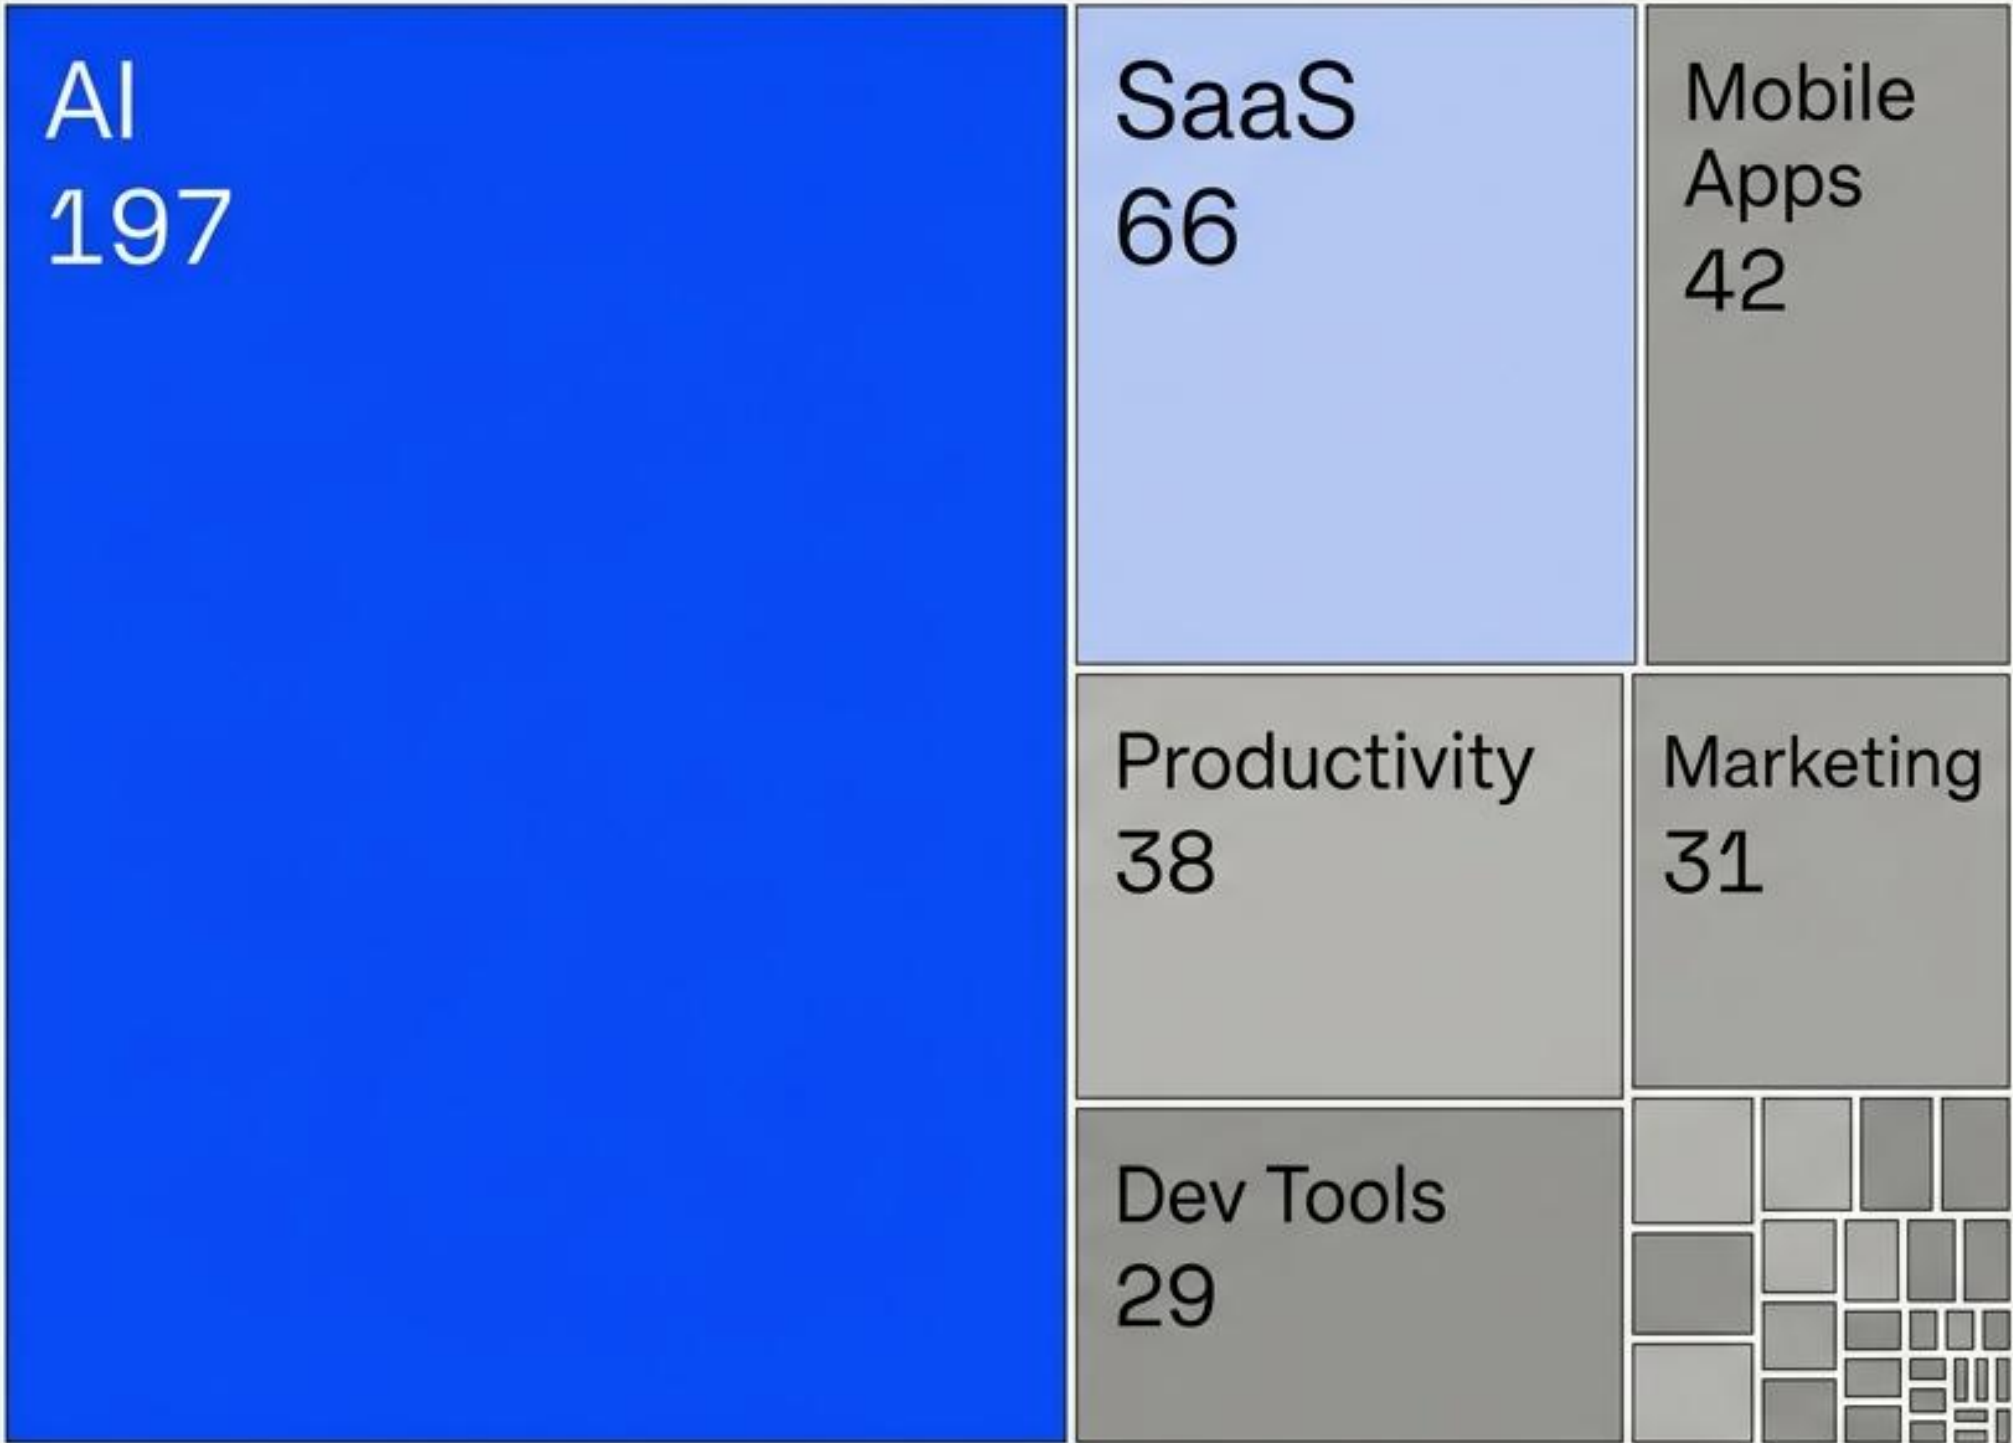

High exit intent (marked for sale).

AI and SaaS dominate the volume while the long tail fragments rapidly.

Data Caveat:

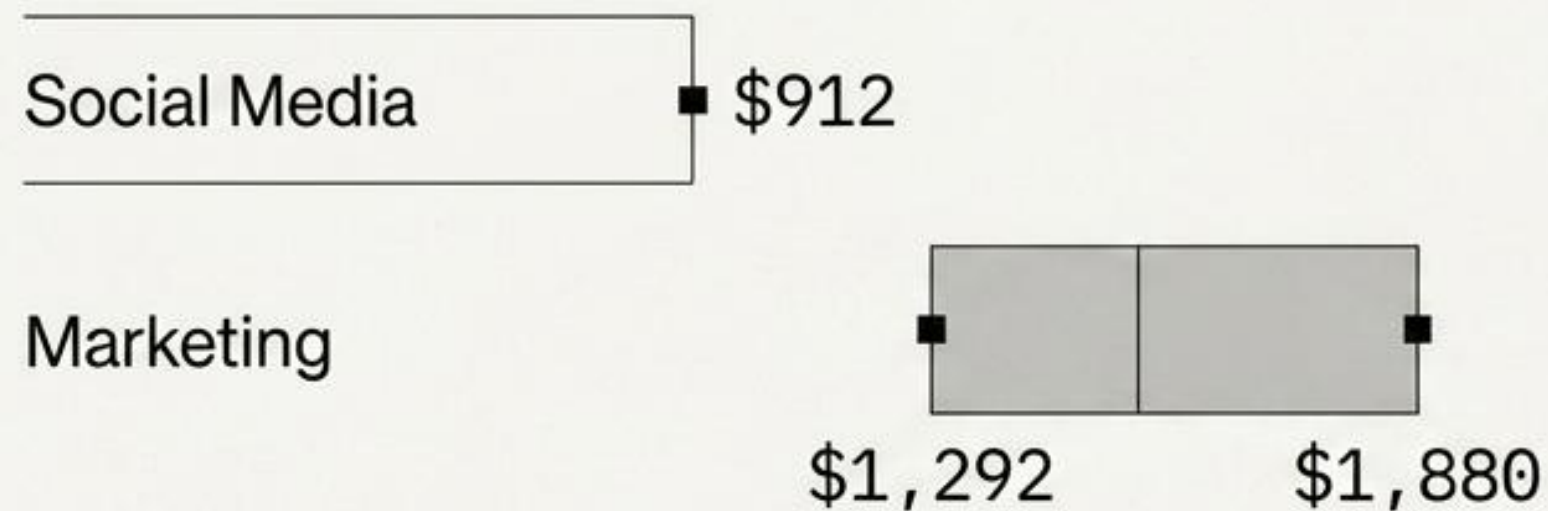

~27% of dataset rows contain no category tag, indicating fragmented data hygiene outside the primary clusters.

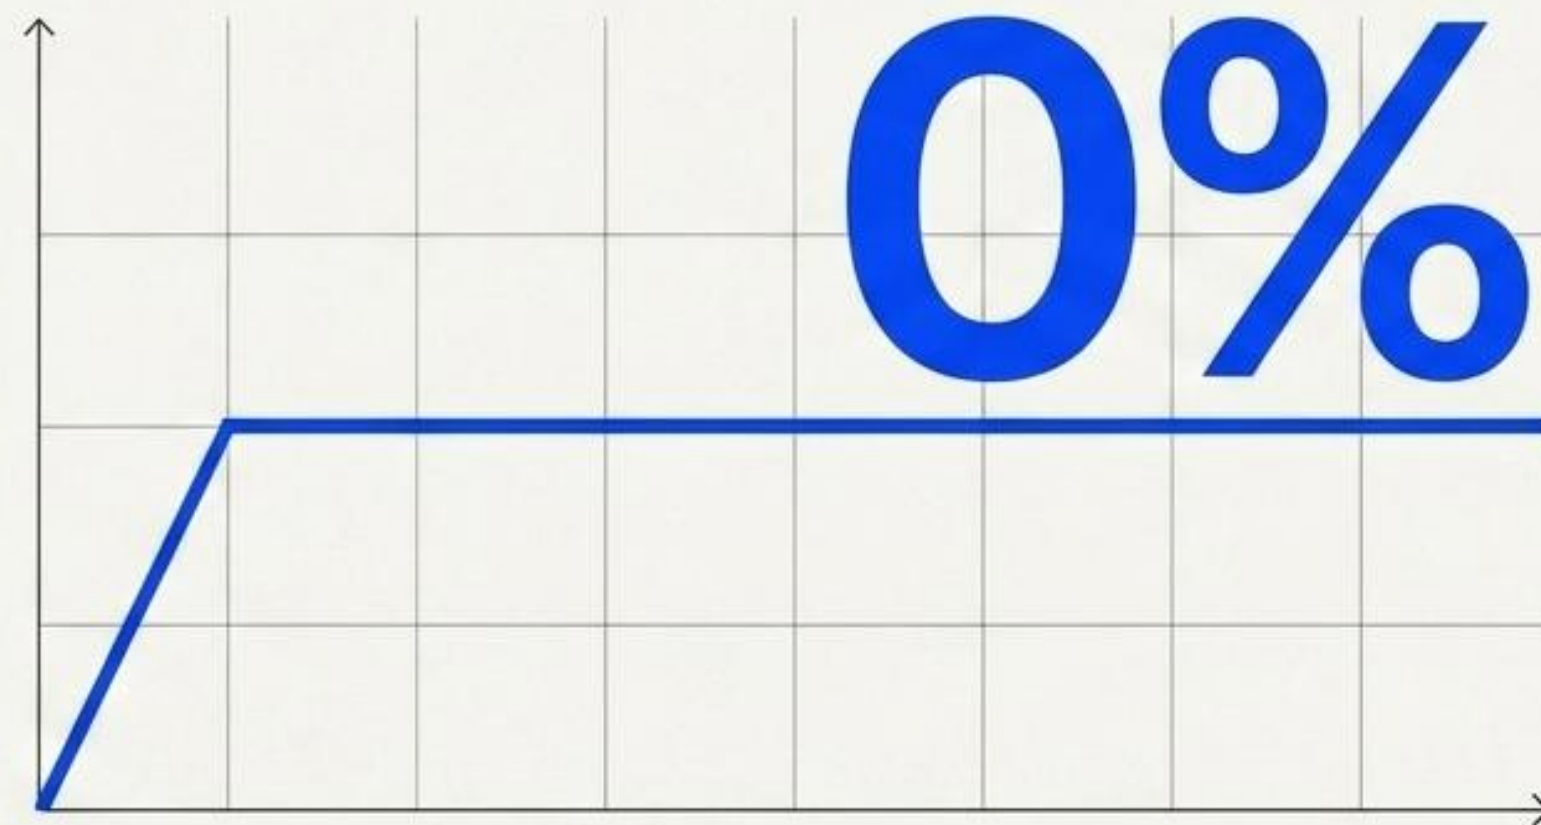

Legal, Crypto & Web3, News & Magazines (1 row each)
Directional only; lacking statistical reliability.

Revenue patterns indicate a maturing pool rather than exponential scaling.

The MRR Baseline

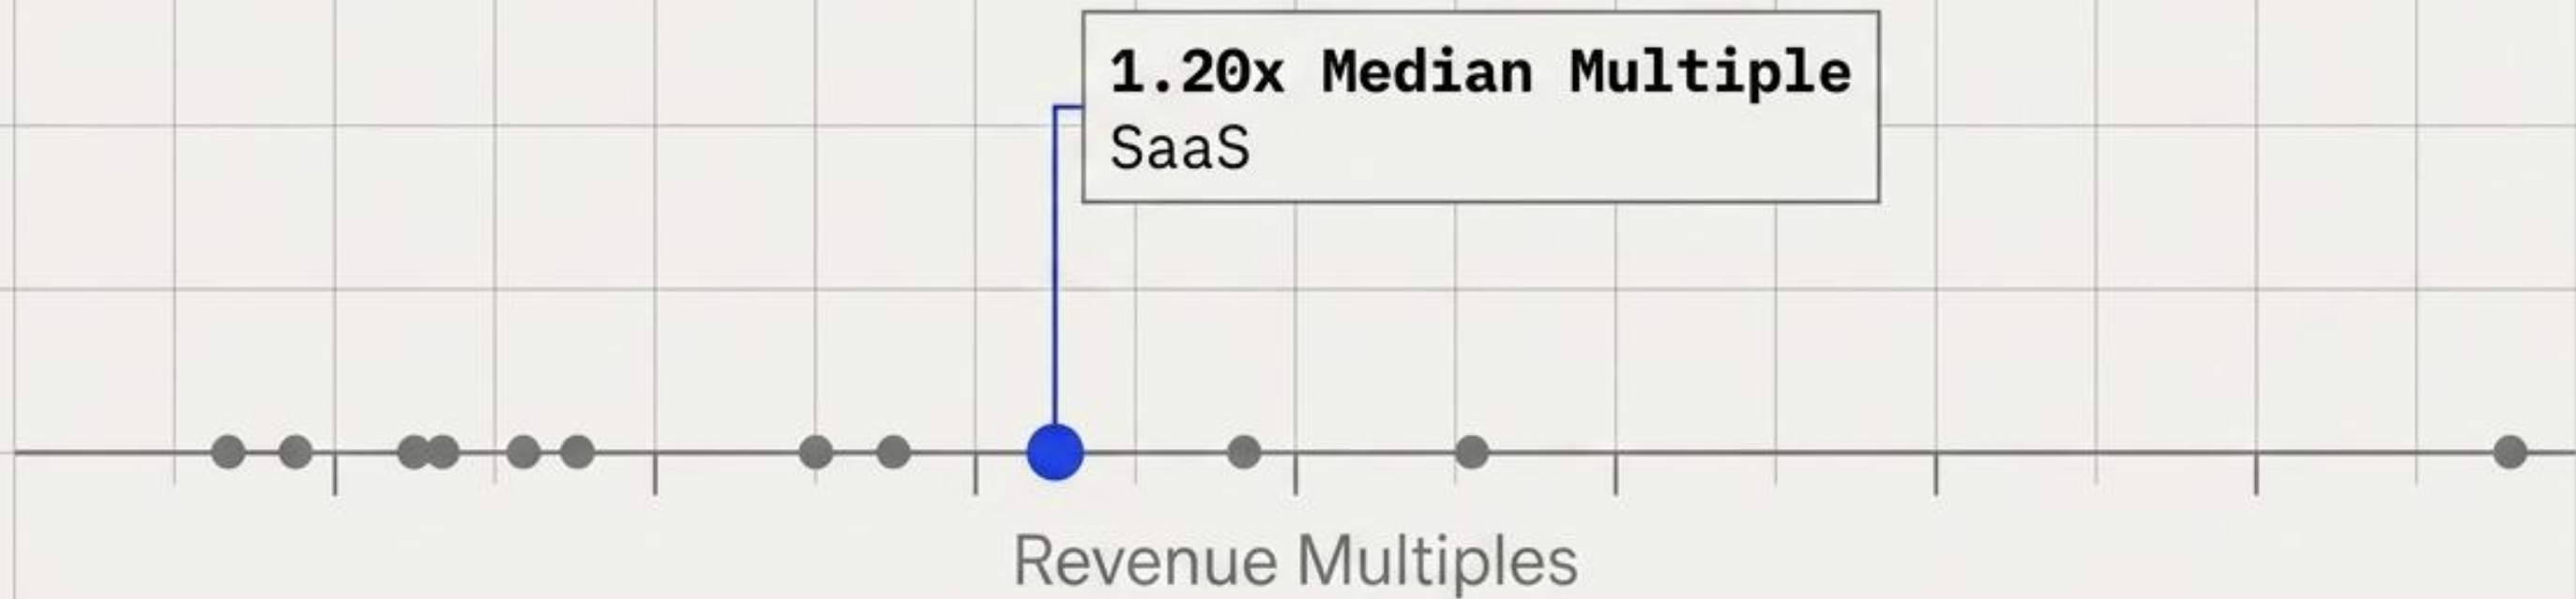

The Growth Reality

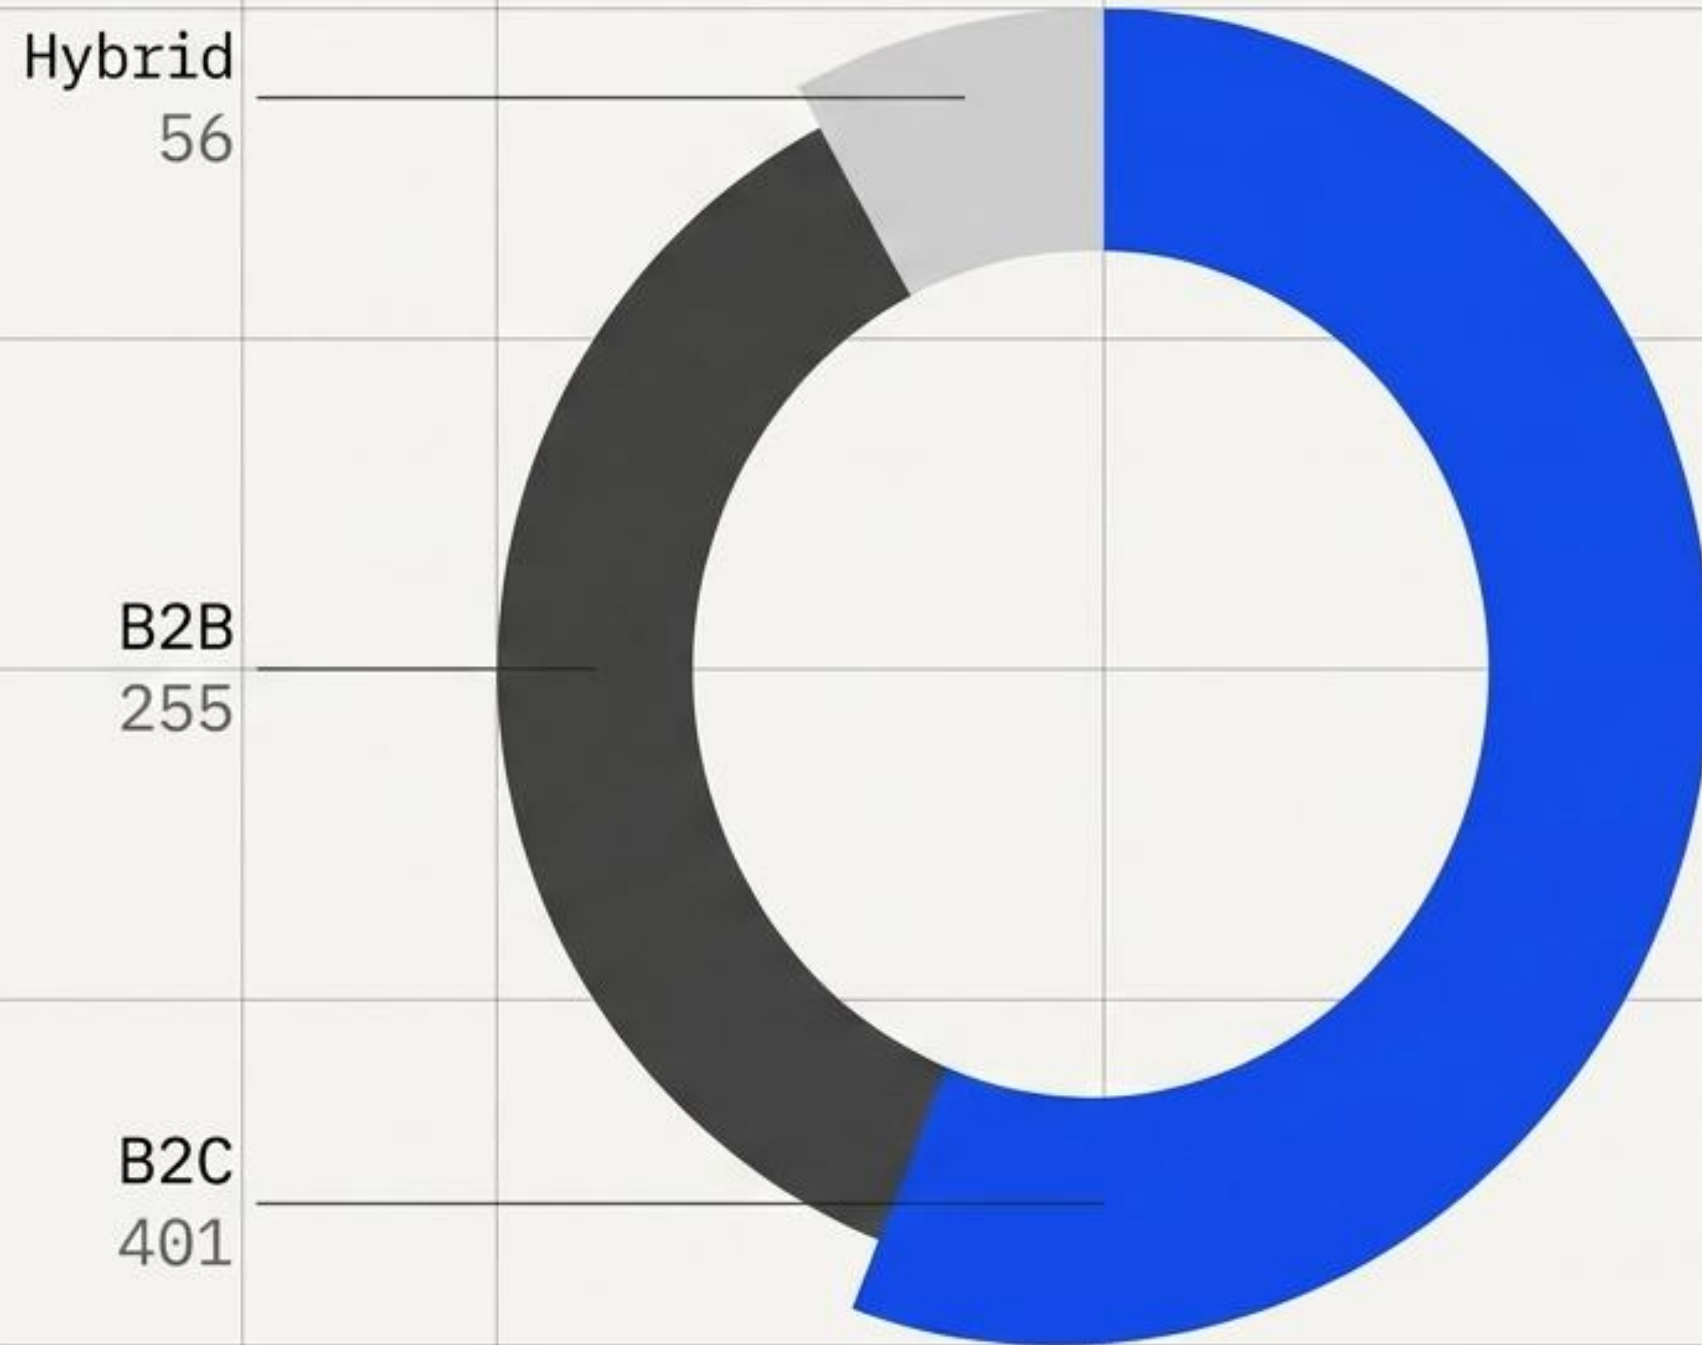

30-day median MRR growth across the dataset is roughly flat. The narrative here is maturity and cash-flow maintenance, not hypergrowth.

Marketplace valuation multiples reflect the reality of cash-flowing assets.

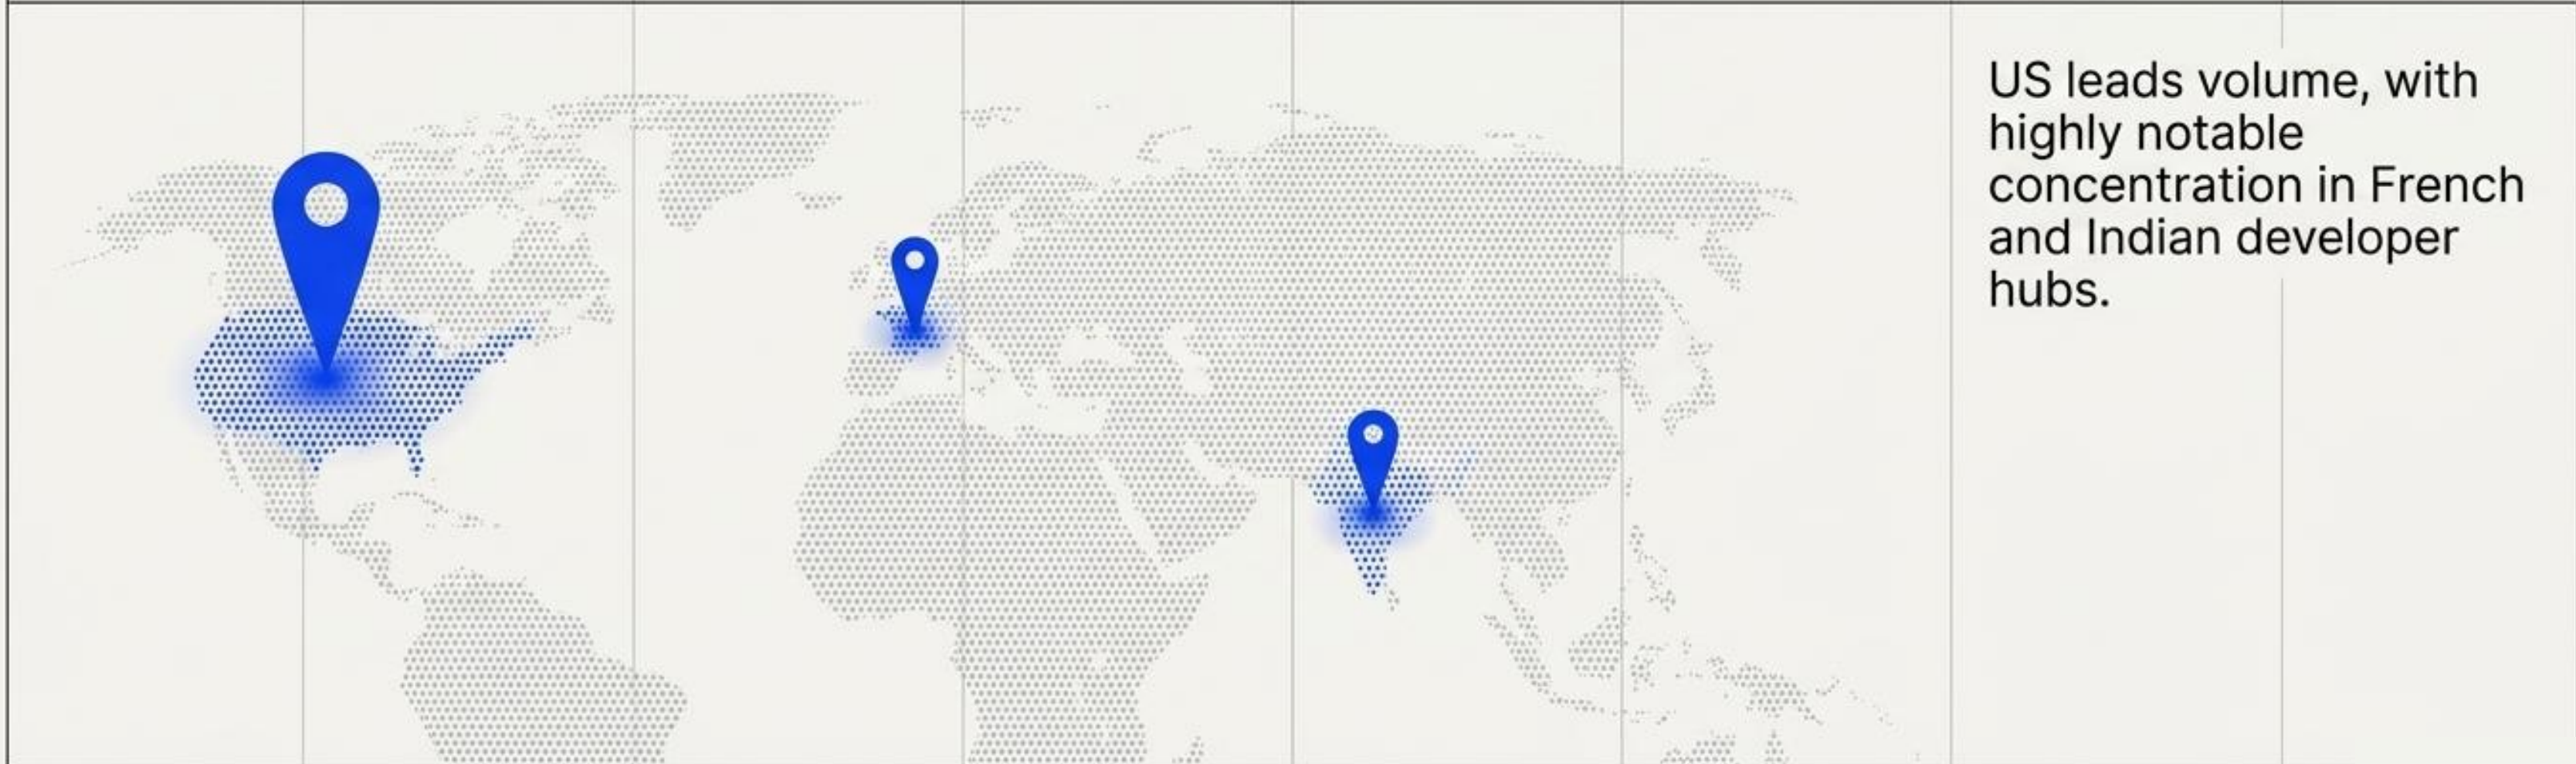

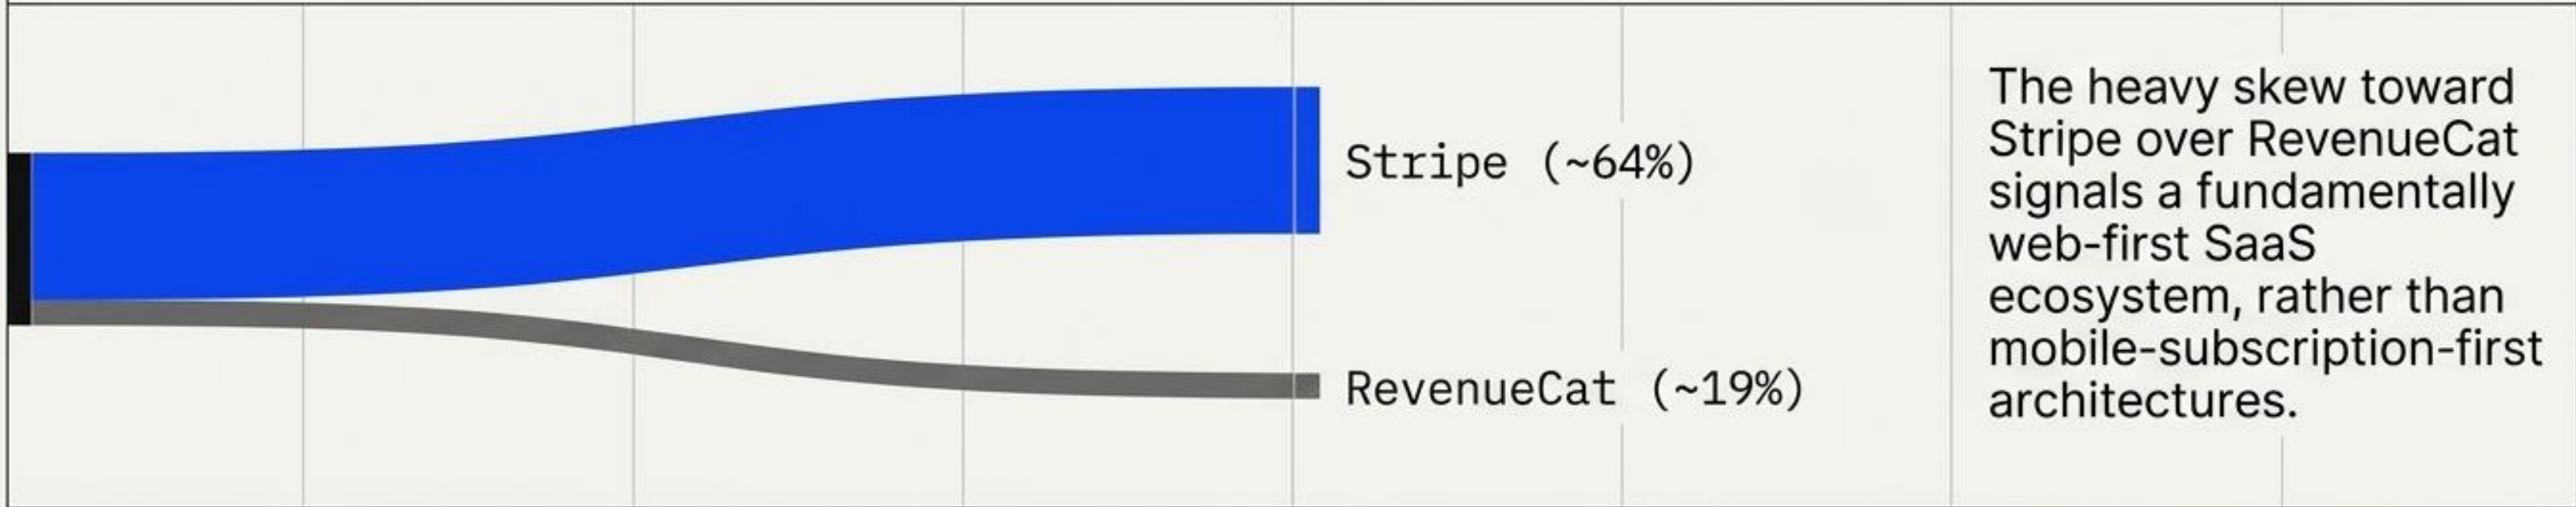

At a 1.20x median revenue multiple, SaaS assets in this pool are priced as mature, stable utilities rather than high-premium growth vehicles.

Consumer-facing applications consistently outpace enterprise volume.

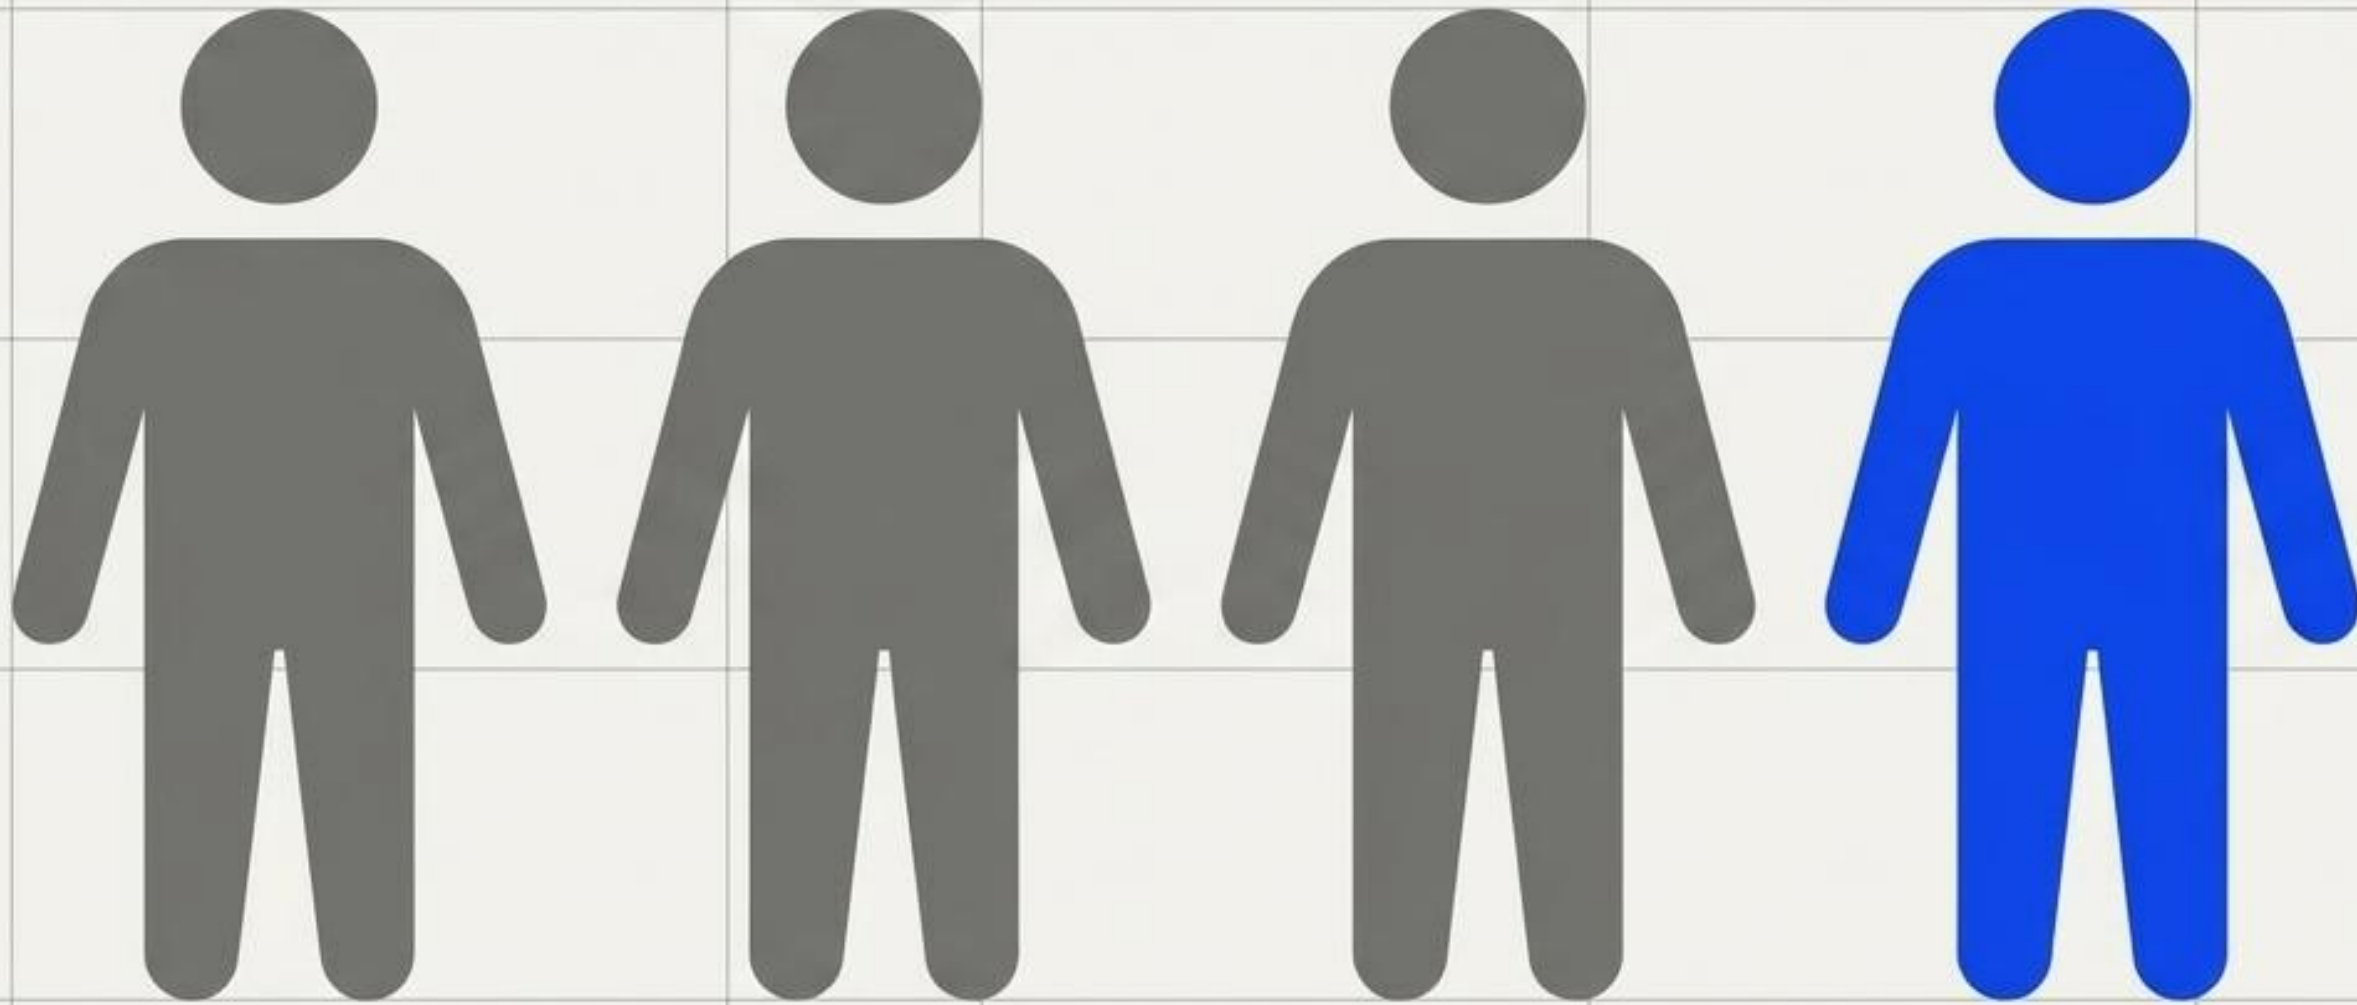

Despite the heavy concentration of AI and SaaS tools, the raw volume of applications is built for consumer audiences rather than enterprise deployment.

Web-first architectures dominate global development hubs.

One in four founders in the dataset are actively looking to exit.

~26% Marked 'On-Sale'.

LIQUIDITY CONTEXT

Combined with a 1.20x SaaS multiple and flat growth metrics, this high concentration of on-sale flags points to an ecosystem highly optimized for micro-acquisitions based on immediate cash flow (revenue per visitor) rather than future scaling potential.

The Ecosystem Baseline reveals a mature, web-first asset class.

The Median Asset Profile

Category:
AI/Web SaaS

Health:
Flat growth (0%), ~\$1.5k MRR

Audience:
B2C leaning

Valuation:
1.20x Multiple

Tech Stack:
Stripe-powered

Status:
On-Sale / Monetization-ready

SaaS and AI dominate volume. Growth is **largely flat at the median**.
A highly meaningful share of this ecosystem is currently **monetization-ready** or **exit-ready**.
