

Deal Flow Q3: The Autonomous Enterprise Stack

Evaluating 15 category-defining
startups across AEO, Automation, AI
Media, Productivity, and Compliance.

The new enterprise is fully autonomous

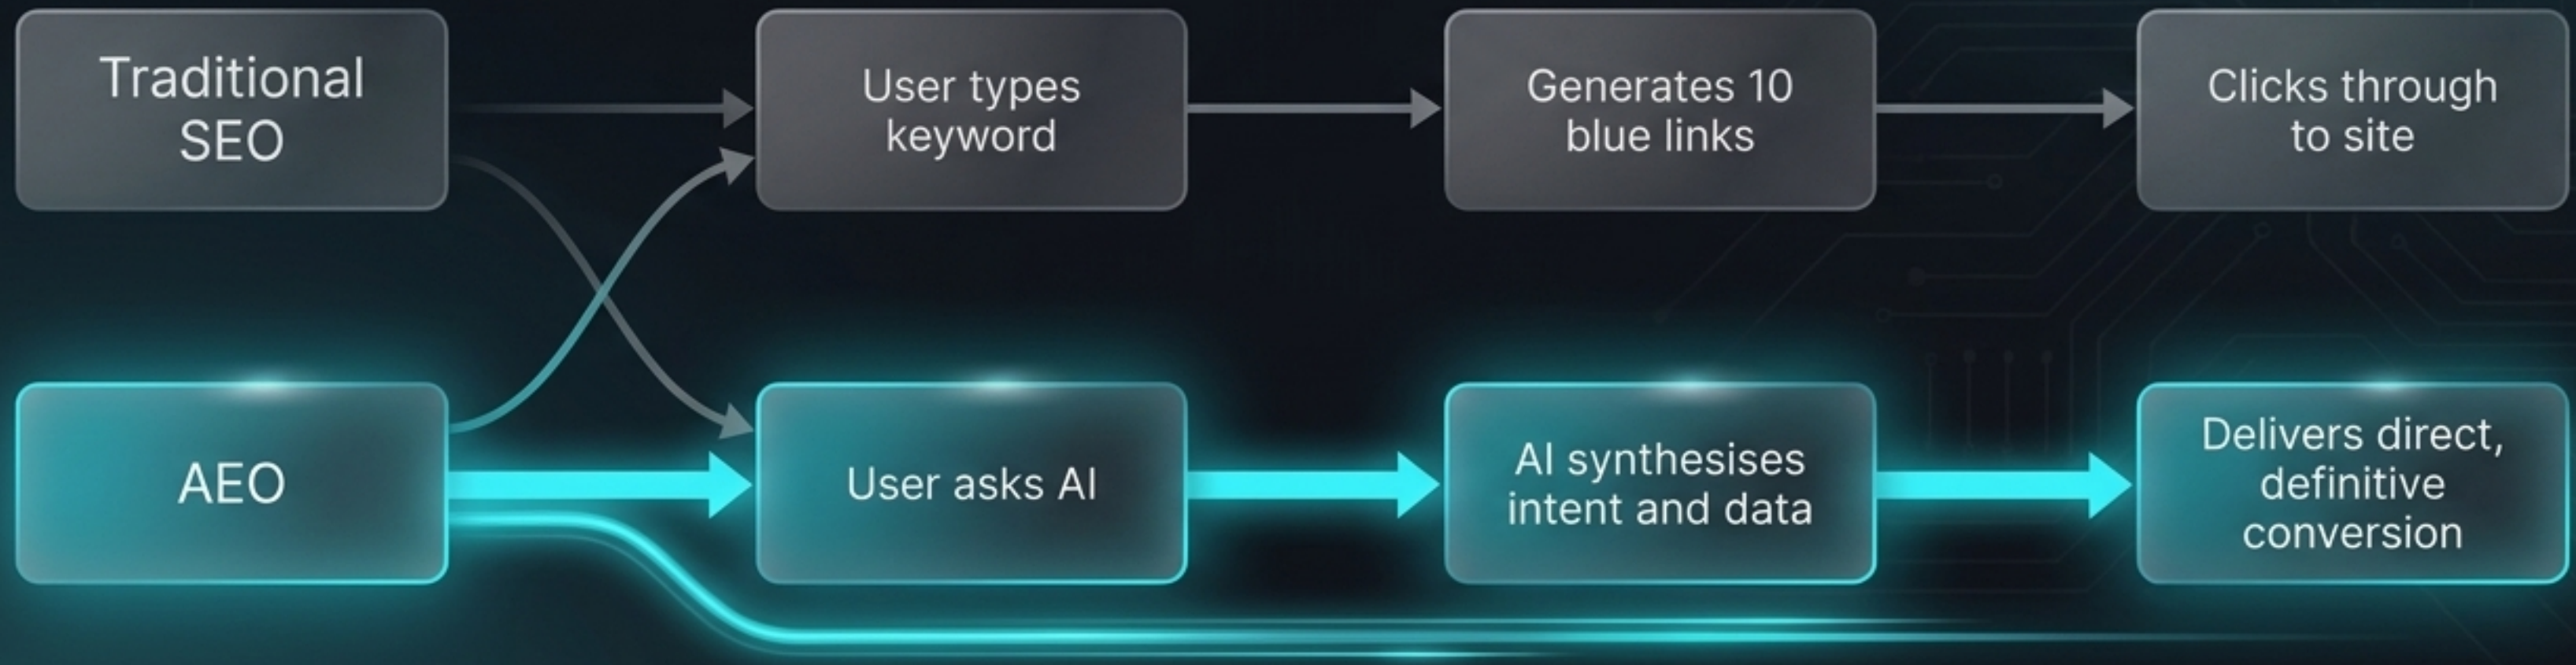

We are tracking a fundamental macroeconomic shift from software as a tool to software as an agent.

This sprint evaluates the essential infrastructural layers of this new economy, determining where to deploy capital.

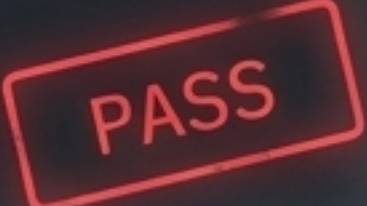

AEO: The Death of the SERP

As LLMs replace traditional search engines, visibility requires optimising for AI synthesis, not keyword indexing. AEO is the new battleground for top-of-funnel discovery.

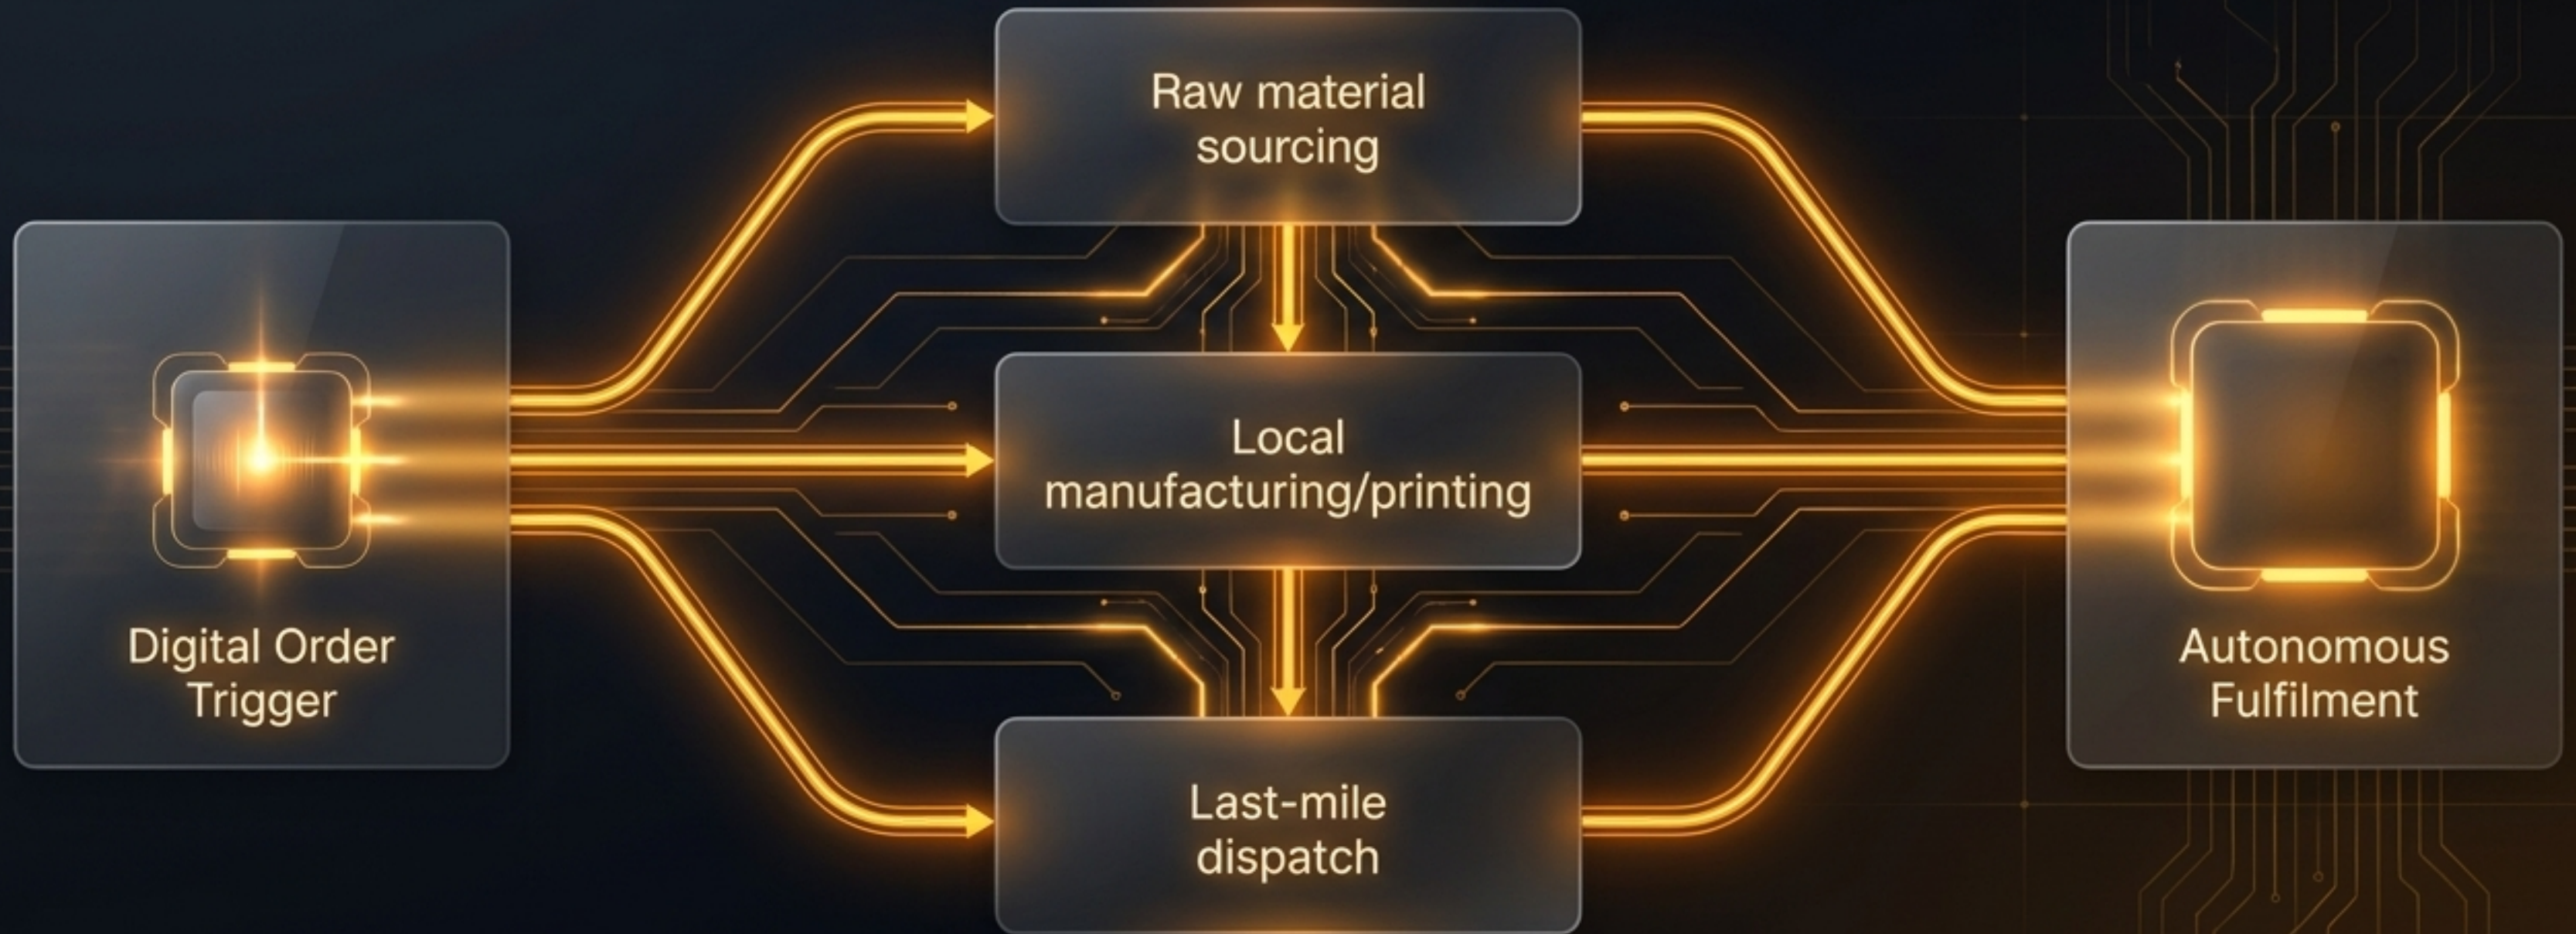

DEAL-FLOW RADAR: AEO COMPARISON MATRIX

Evaluating the essential infrastructural layers of this new economy, determining where to deploy capital.

Notes Market leader with defensible proprietary scraping tech.		Notes Explosive growth, but highly dependent on Reddit API volatility.		Notes Solid UX but lacks integration depth to compete with AEO Engine.	
					

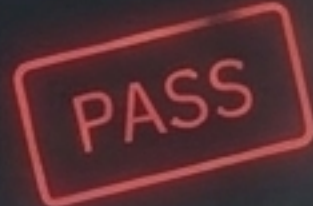

Physical goods at the speed of software

The total abstraction of the supply chain. Startups in this sector are turning physical inventory into an API call, enabling zero-capex product launches and borderless distribution.

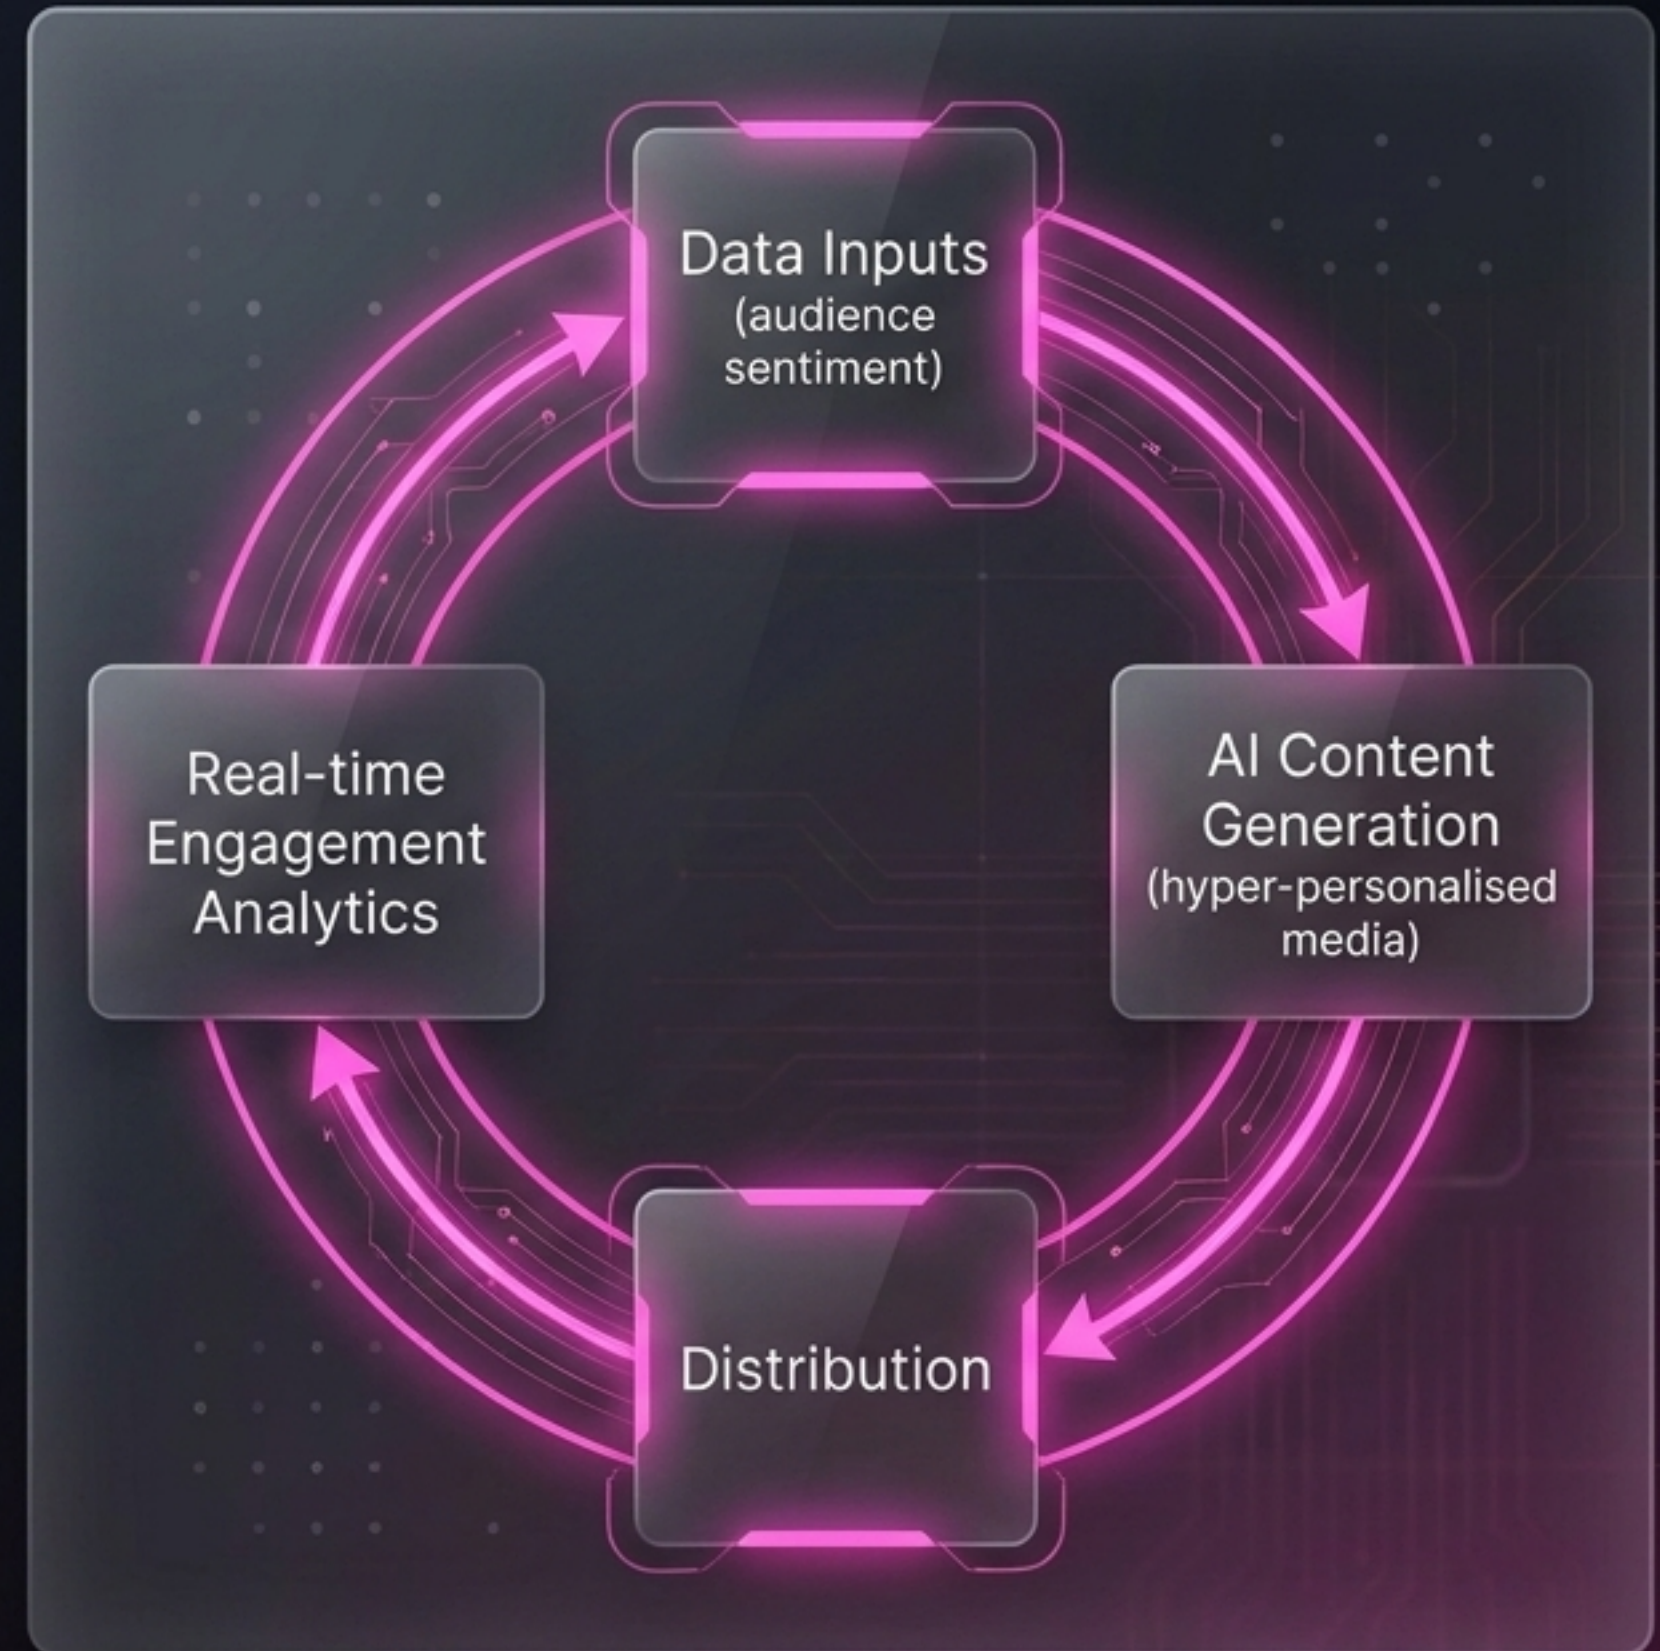

DEAL-FLOW RADAR: SUPPLY INFRASTRUCTURE MATRIX

Evaluates the foundational layers of the physical-digital supply chain for strategic capital deployment.

Notes Unmatched CPG infrastructure; essentially the 'AWS for supplements'.		Notes Good niche in B2B print, but margins are deteriorating due to legacy equipment costs.		Notes Highly capital-efficient bridging of Asian sourcing with US 3PLs.	
					

Infinite, hyper-personalised media

Moving beyond static template creation. The breakthrough is programmatic, intent-matched media generation that adapts in real-time to user engagement signals.

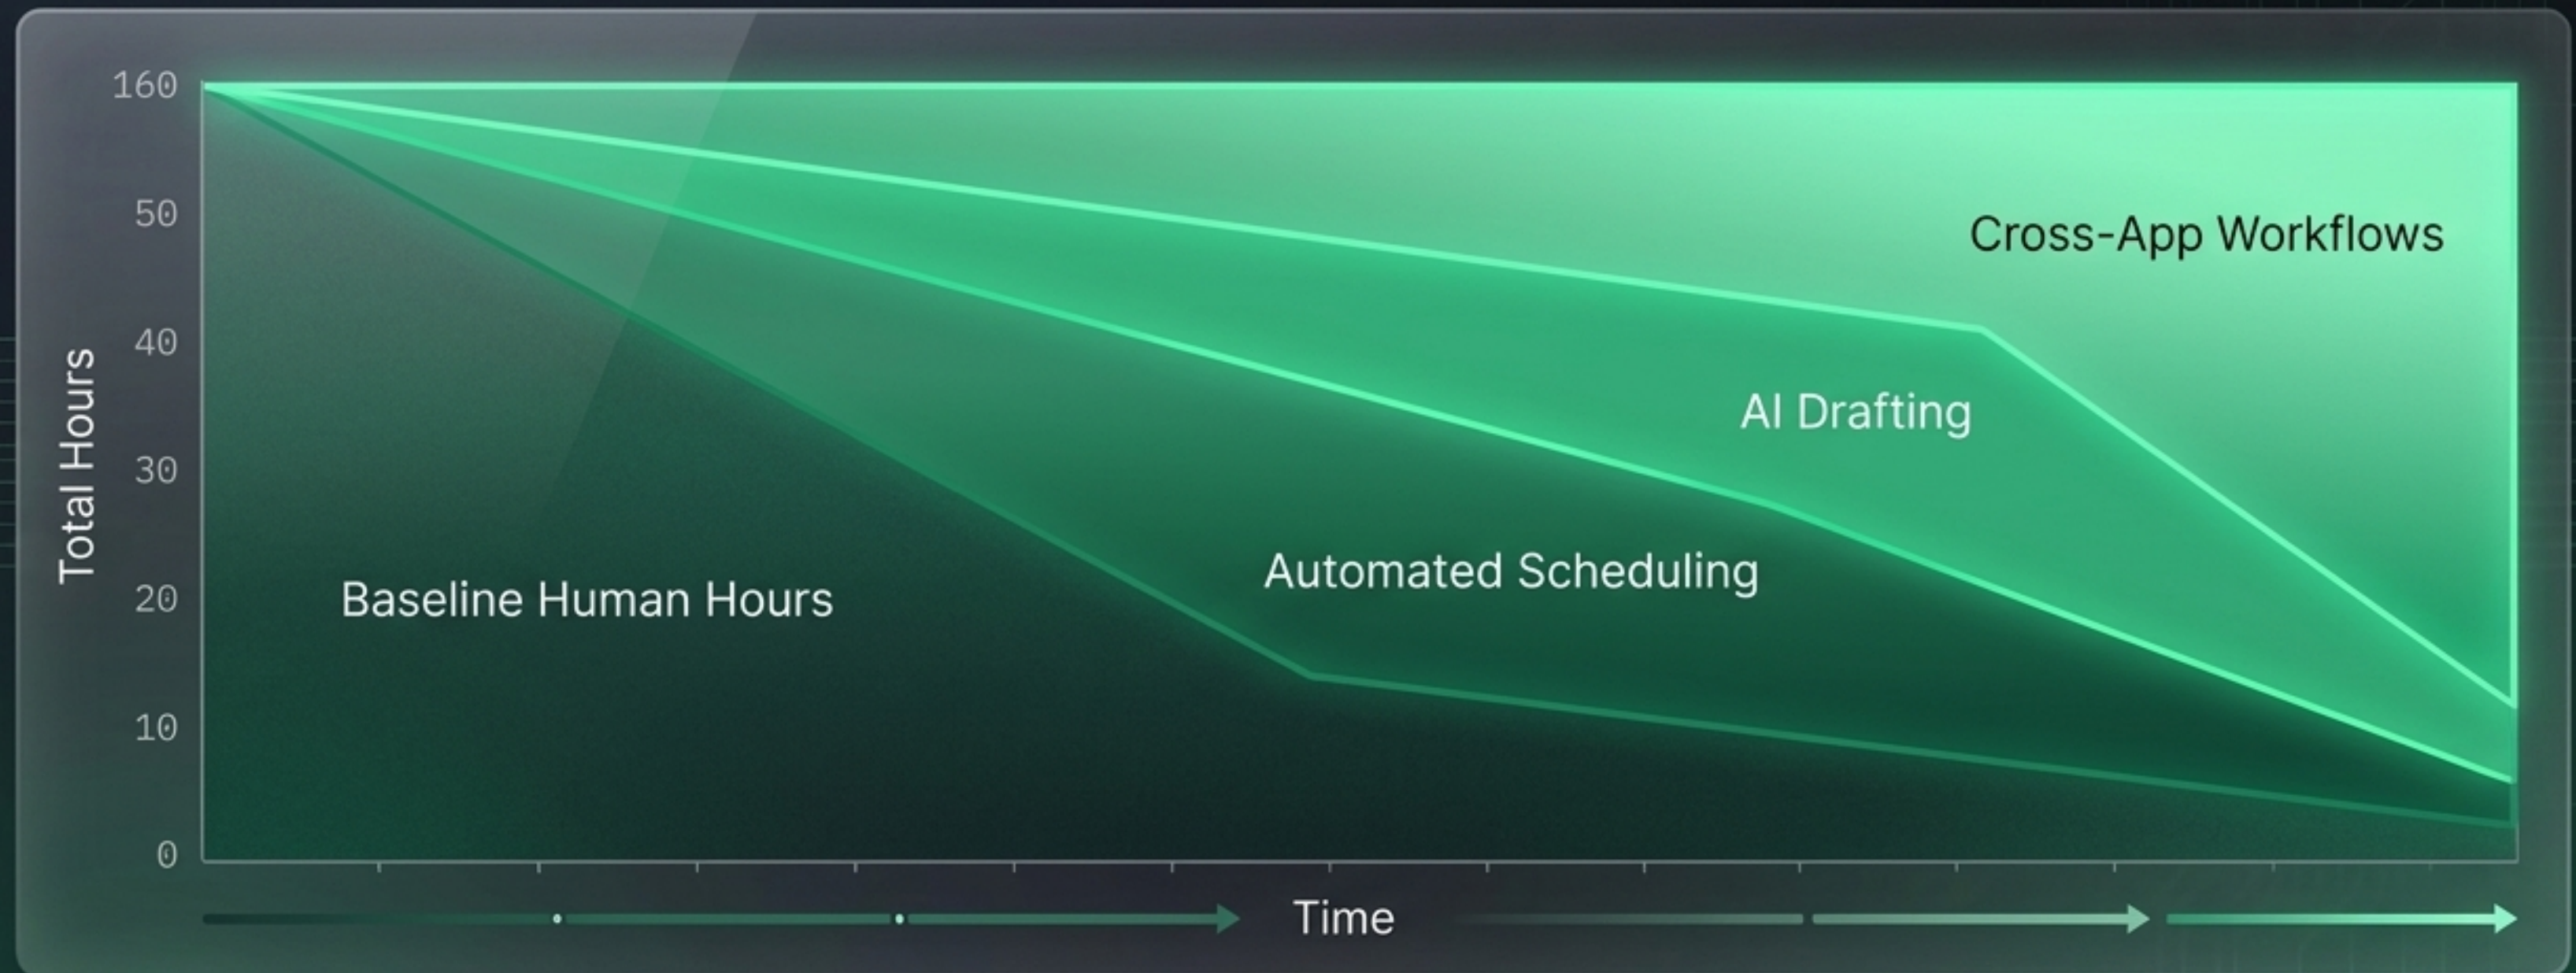

DEAL-FLOW RADAR: GROWTH MATRIX

Evaluates high-growth potential assets for strategic capital deployment.

Notes High stickiness; acts as the primary system of record for social marketing teams.		Notes Incredible video generation tech, but compute costs are eating into gross margins.		Notes Commoditised feature set easily replicated by incumbent platforms.	
STRONG BUY		WATCHLIST (BURN RATE)		PASS	

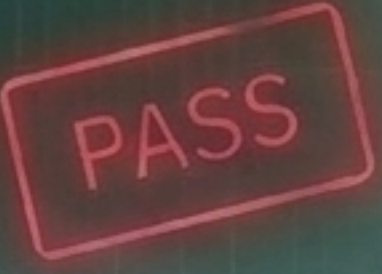

From copilots to autonomous agents

Productivity has shifted from workflow organisation (SaaS 1.0) to autonomous task execution. These tools do not just track work; they complete it.

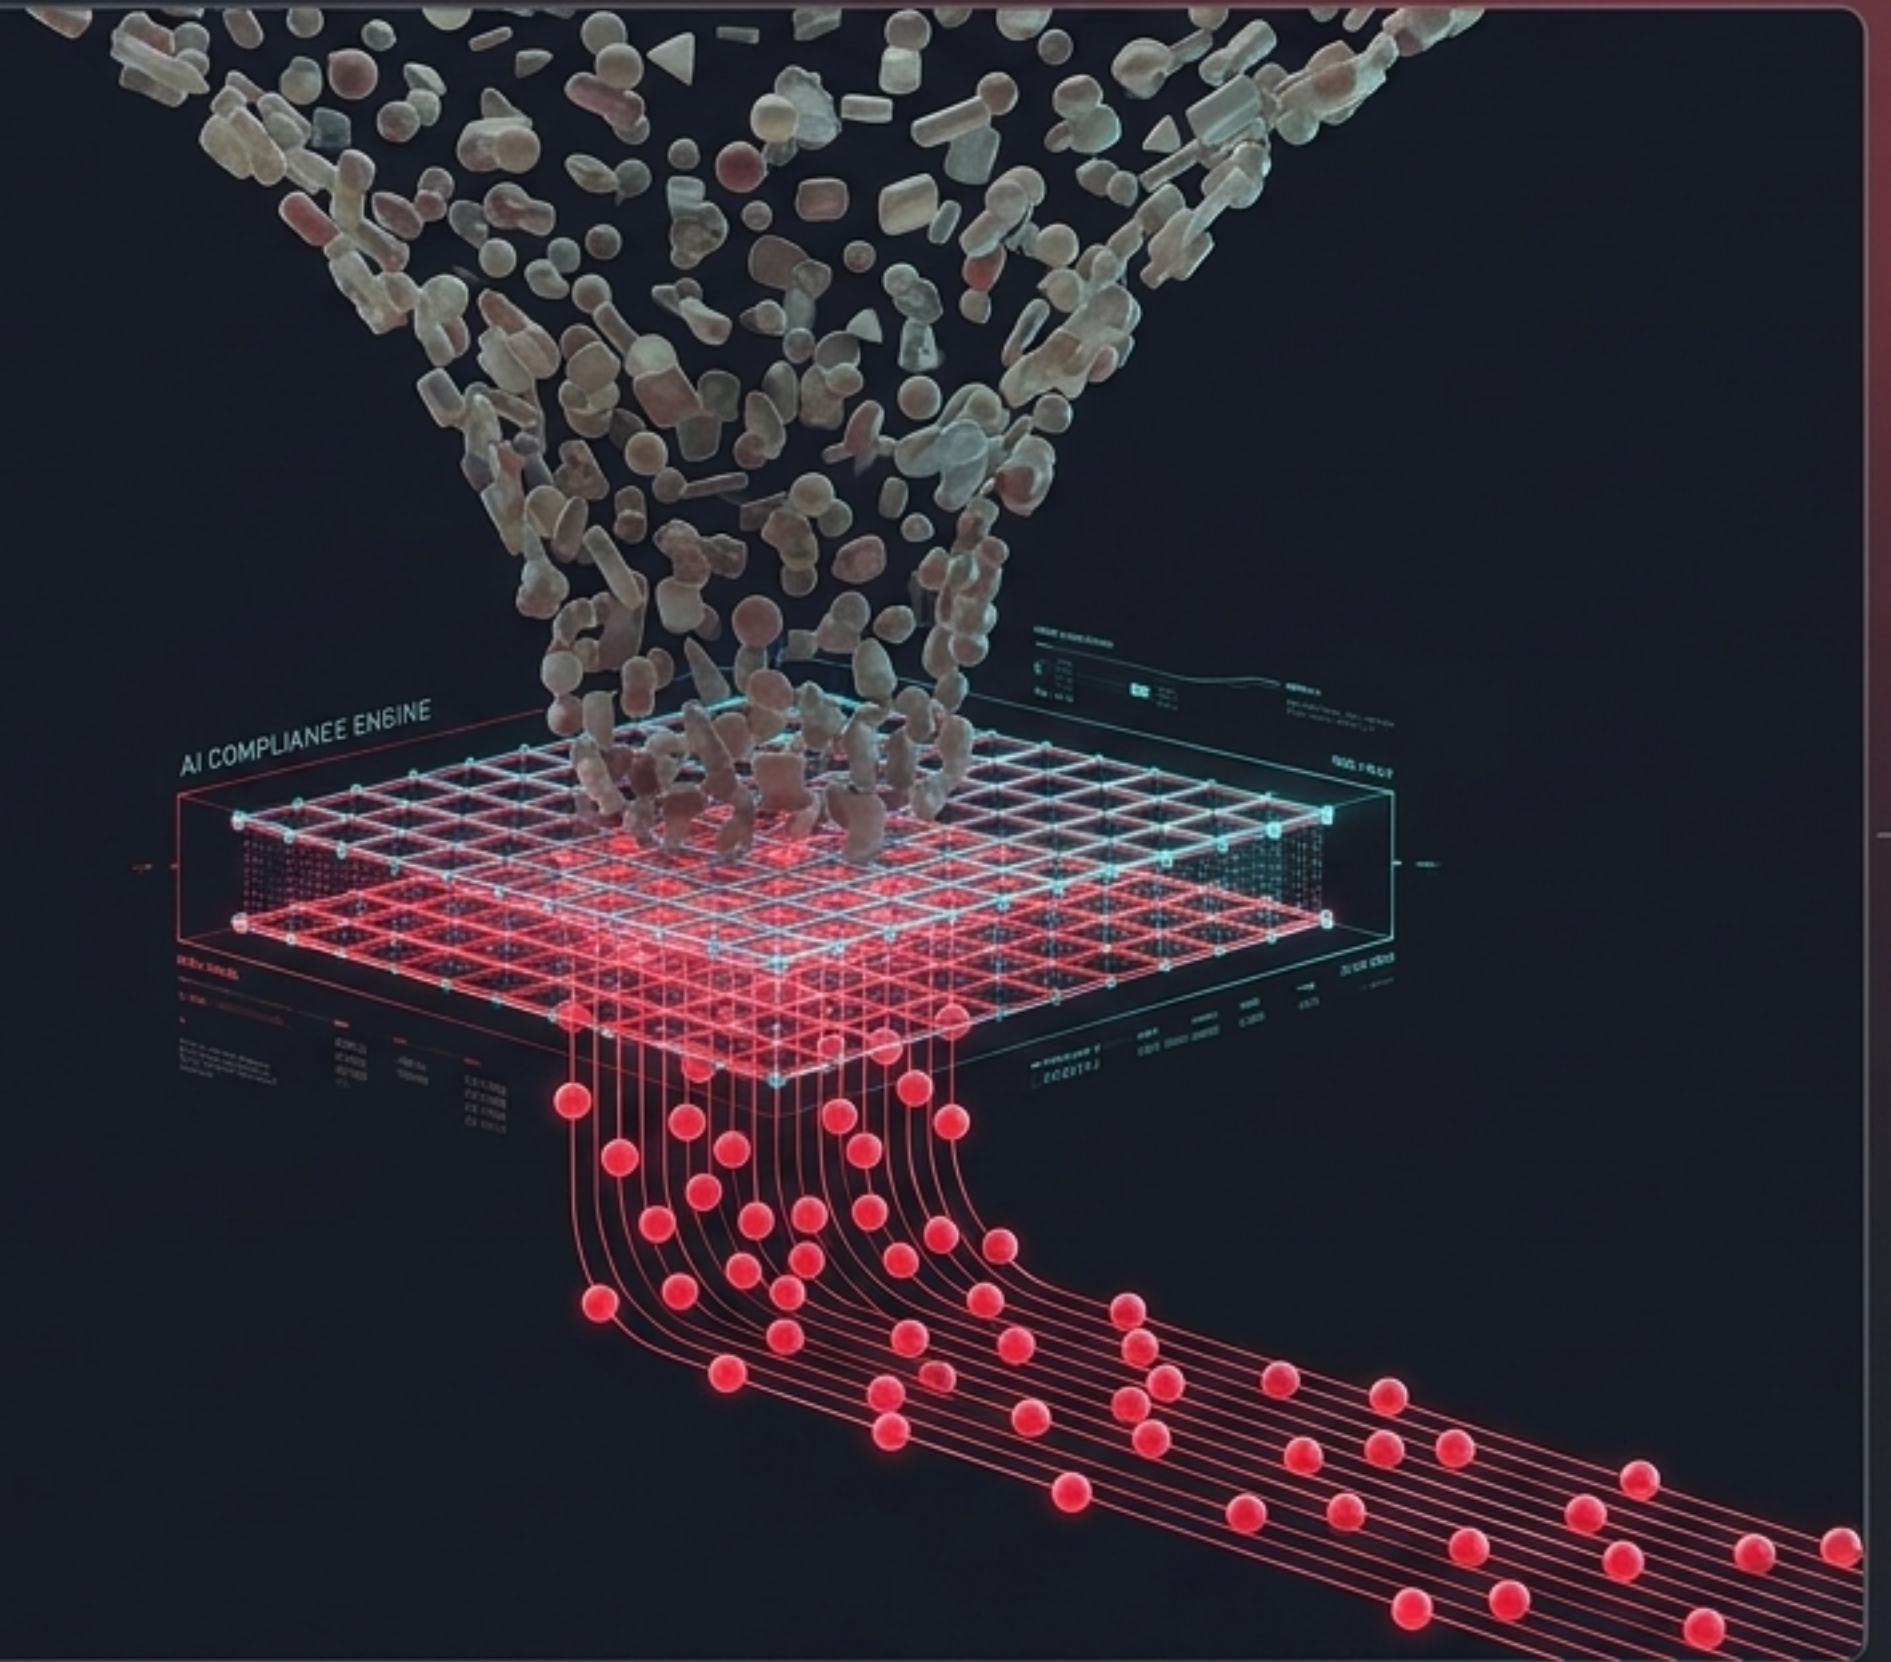

DEAL-FLOW RADAR: OPERATIONS MATRIX

Evaluates high-efficiency potential assets for strategic operational integration.

Notes The definitive creator-economy operating system. Unrivalled GMV processed.		Notes Brilliant pivot to AI-agent led project management. High upside.		Notes Great product for job seekers, but high churn inherent to the use-case.	
					

Real-time regulatory immune systems

As transaction velocities scale exponentially, manual compliance becomes the critical bottleneck. AI agents now provide real-time, deterministic fraud prevention and global regulatory mapping.

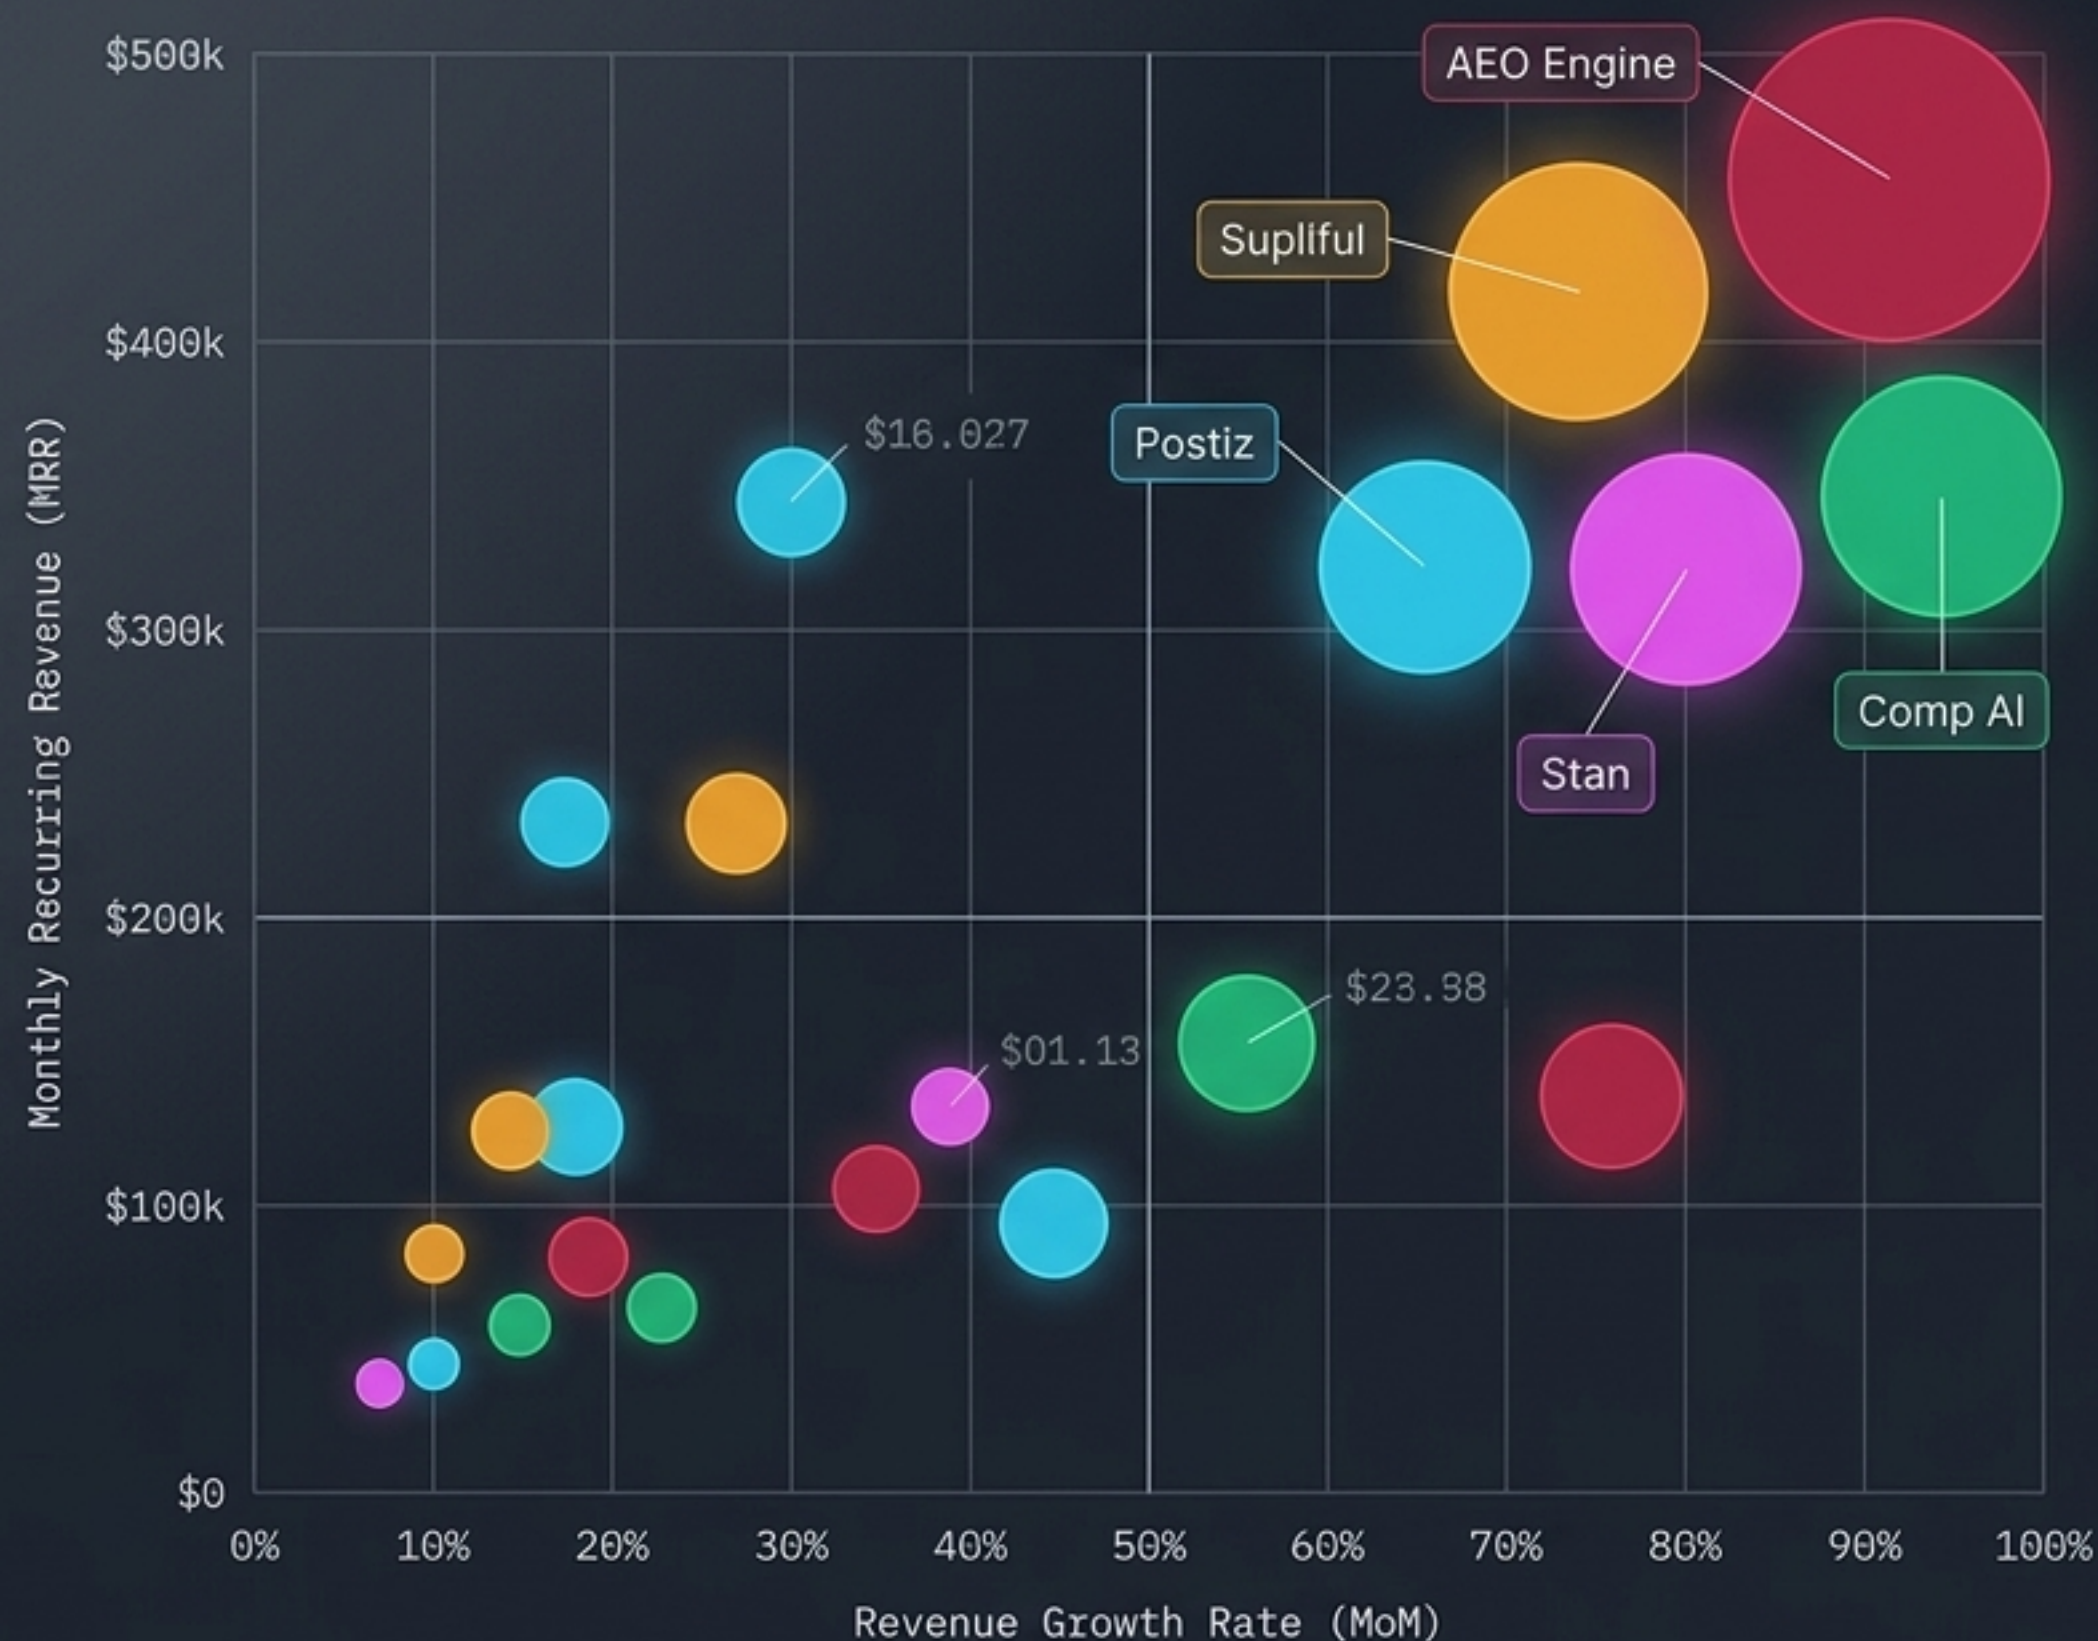

DEAL-FLOW RADAR: COMPLIANCE MATRIX

Evaluates high-efficiency potential assets for strategic regulatory and security integration.
