

A DATA STORY

Inside TrustMRR: What 1,000 Public Startups Reveal About Real Revenue

A snapshot of the TrustMRR dataset — frozen July 30, 2026

1,000

companies tracked

\$13.5M

combined monthly recurring revenue

\$334M

combined all-time revenue

What is TrustMRR?

TrustMRR is a public leaderboard where indie founders and small startups voluntarily connect their live payment accounts — Stripe, RevenueCat, Paddle, and others — to display verified, real-time revenue instead of self-reported claims.

In a startup world full of inflated screenshots and vanity metrics, TrustMRR's premise is simple: connect your account, and the number speaks for itself.

Why this dataset is unusual

- **Verified, not claimed**

Revenue is pulled directly from payment APIs, not typed in by the founder.

- **Radically transparent**

Public MRR, growth rate, subscriber counts, and even asking price for companies that are for sale.

- **A living market**

Many listed startups are actively on sale — this is also a lens into the micro-acquisition economy.

THE DATASET

1,000 Companies, Frozen in Time

A snapshot of every metric TrustMRR tracks — from revenue and growth to audience and asking price.

1,000

Startups in the snapshot

\$13.47M

Total monthly recurring revenue

\$334.0M

Total all-time revenue reported

70+

Countries represented

29

Categories, led by AI

262

Companies listed for sale

The Median Lies. The Tail Tells the Truth.

Half of the startups on TrustMRR earn less than \$282 a month. The other half includes companies making millions. Revenue on this platform isn't a bell curve — it's a cliff.

Median MRR

\$282

what the typical listed startup earns per month

Mean MRR

\$13,472

47x higher than the median — pulled up by a small number of breakout winners

Meet the tail: the top 5 by MRR

1	Stan Creator monetization	\$3.57M
2	"Stealth Company" Undisclosed	\$747K
3	GojiberryAI AI	\$495K
4	"Stealth Company" Undisclosed	\$364K
5	Rezi AI resume builder	\$260K

One Country Carries the Leaderboard

The US alone generates over half of all combined MRR in the dataset — more than the next seven countries combined.

\$7.50M

US share of total dataset MRR — 55.7% of the \$13.47M tracked

258 startups

are US-based — over 1 in 4 of all companies on the leaderboard, ahead of France (79) and India (59).

AI Is Eating the Leaderboard

Nearly 1 in 5 companies is tagged AI — and the category alone accounts for more MRR than SaaS, Education, and Marketing combined.

MRR by category (top 3)

AI	\$1.81M
SaaS	\$0.59M
Education	\$0.52M

Despite the volume of AI startups, most are early-stage: median MRR in the category still trails behind established SaaS and Fintech peers.

Who Pays More — and How Fast It Can Change

B2B startups out-earn B2C at the median — but at this scale, revenue for any company can swing hard in just 30 days.

MEDIAN MRR BY AUDIENCE TYPE

B2B · 255 cos.

\$1,036

Both · 56 cos.

\$351.5

B2C · 401 cos.

\$181

B2B earns ~6x more than pure B2C at the median.

▲ FASTEST GROWING (30-day MRR)

Hidden Jobs	+1,357%
HotelHero.ai	+1,227%
Hong Xuan Kow	+459%

▼ FASTEST DECLINING (30-day MRR)

Barron Tech LLC	-82%
PolyPick	-67%
Grafics	-64%

A Live Marketplace — Where Not Everyone Shows Their Face

262 companies are listed for sale on TrustMRR, asking nearly \$87M combined — and some of the biggest revenue on the platform stays anonymous.

HOW MUCH ALL-TIME REVENUE IS FROM NAMED VS. ANONYMOUS COMPANIES

130 listings — blank names, "Stealth Company," or "Hidden Business" — still generate \$59.6M in lifetime revenue. Transparency and visibility aren't the same thing on this platform.

A Snapshot Has Gaps — Here's Where

Self-reported storytelling fields are the least complete — a reminder to read qualitative fields as a partial picture, not the full population.

visitors_30d	82.2%	missing — most founders don't connect analytics
revenue_per_visitor_usd	85.8%	missing — depends on the field above
target_persona	36.1%	missing — unlisted qualitative detail
pricing_model	34.3%	missing
value_proposition	28.4%	missing
category / country	~27% / 24%	missing — many stealth listings omit both

THE TAKEAWAY

Real Revenue Is Rare, Concentrated, and Unevenly Told

- Verified revenue is still the exception, not the norm — most listed startups earn under \$300/month, and a tiny few carry the whole leaderboard.
- Geography and category are lopsided: the US and AI dominate volume, but neither guarantees the highest revenue per company.
- Fewer, better-paying B2B customers consistently outperform larger B2C audiences at the median.
- TrustMRR isn't just a leaderboard — with 262 companies for sale, it's also a live, transparent micro-M&A market.
- Some of the strongest performers choose to stay anonymous — transparency and visibility aren't the same thing.
