Prepared as a data narrative · Neutral, factual tone

EXECUTIVE SUMMARY

A snapshot of the indie-startup economy

Across 1,000 tracked startups, revenue is real but heavily concentrated among a small set of breakout performers.

\$334M

Total all-time revenue tracked

\$13.5M

Combined monthly recurring revenue

\$15.6M

Revenue generated in the last 30 days

262

Startups currently listed for sale

\$3.6K

Median all-time revenue per company

34%

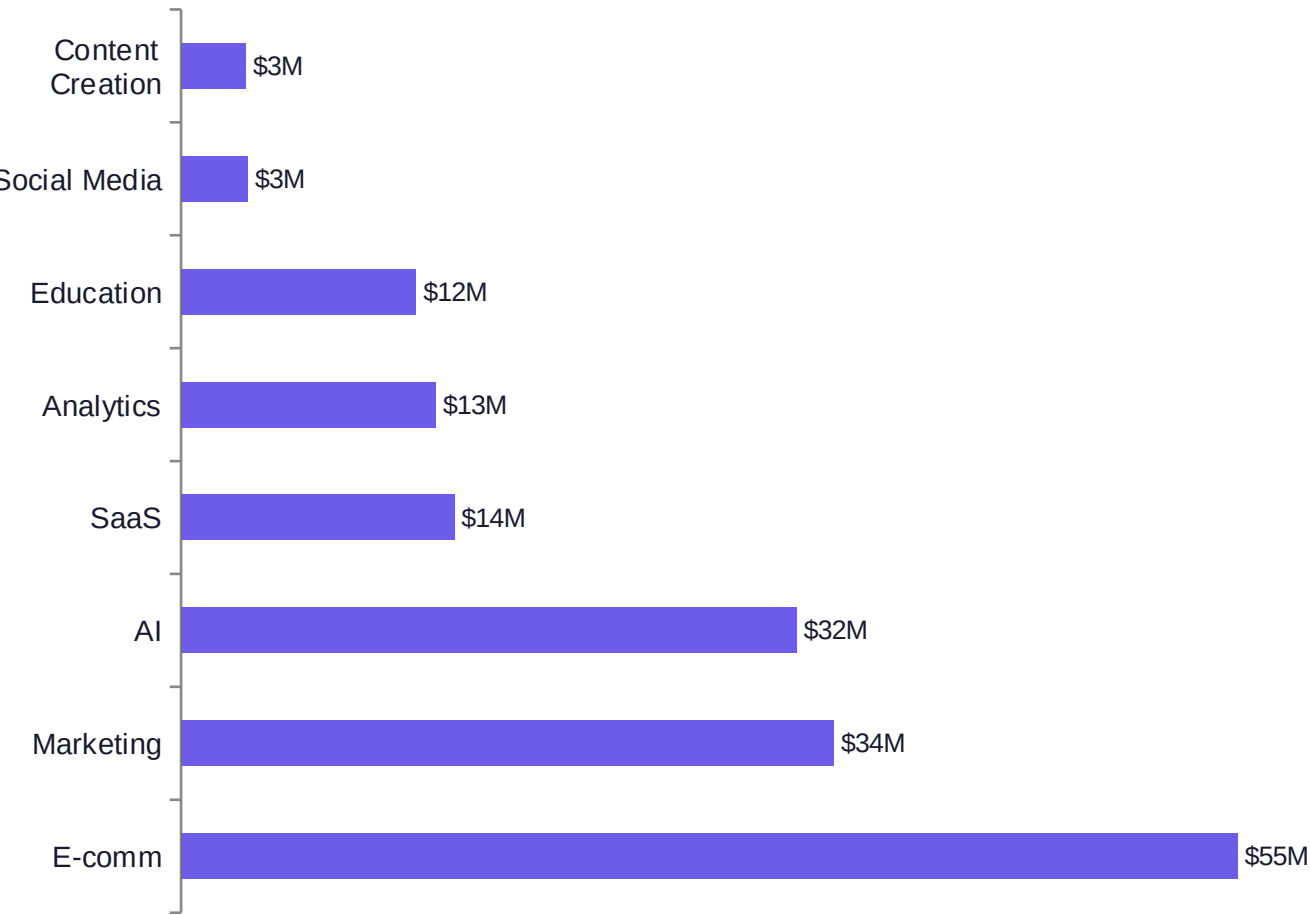

Of startups grew revenue in the last 30 days

Note: the gap between median (\$3.6K) and average revenue per company (\$334.0K) reflects a power-law market — more on the closing slide.

WHERE THE MONEY IS

Categories that are monetising

All-time revenue by category — E-commerce, Marketing and AI lead the pack in total dollars generated.

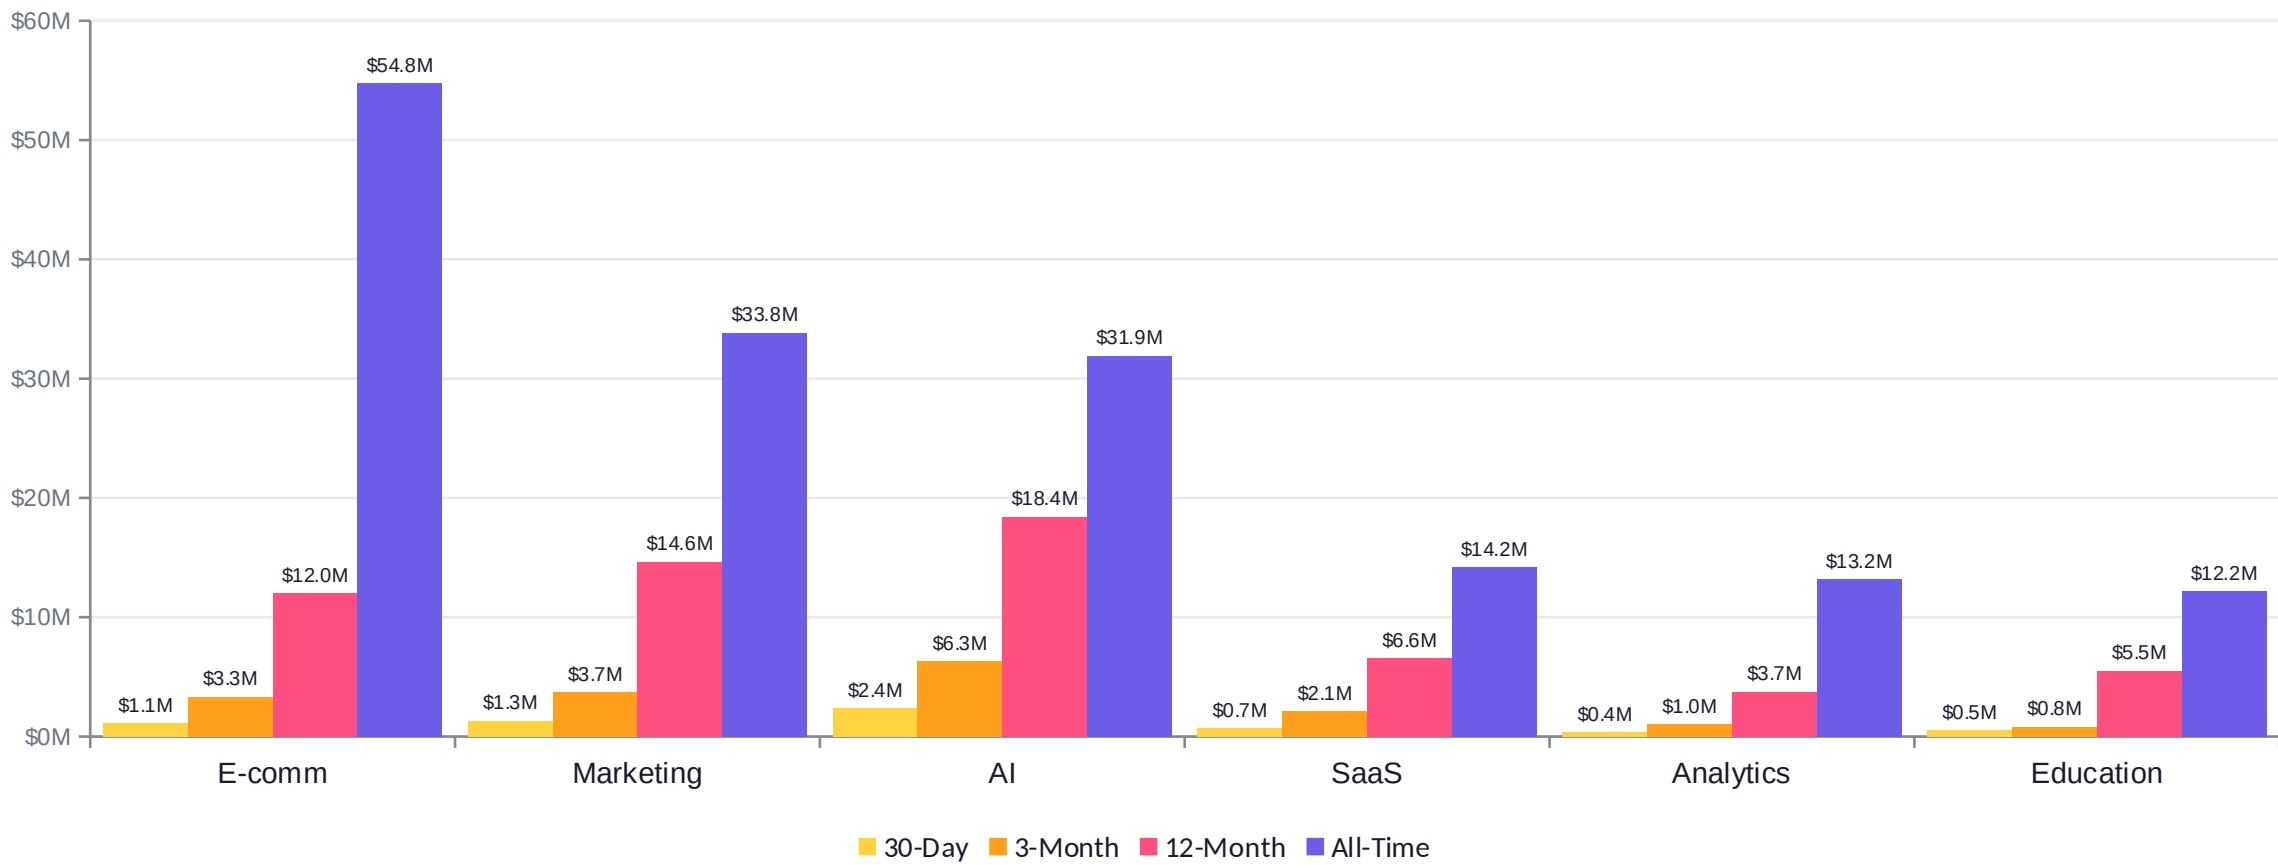

Revenue efficiency (avg. per company)

Defined as a category's total revenue ÷ its number of companies — how much the typical company earns, independent of category size.

E-comm	\$2.9M
19 companies	
Marketing	\$805.9K
42 companies	
Analytics	\$694.7K
19 companies	
Education	\$405.8K
30 companies	

Time to monetise: revenue momentum by category

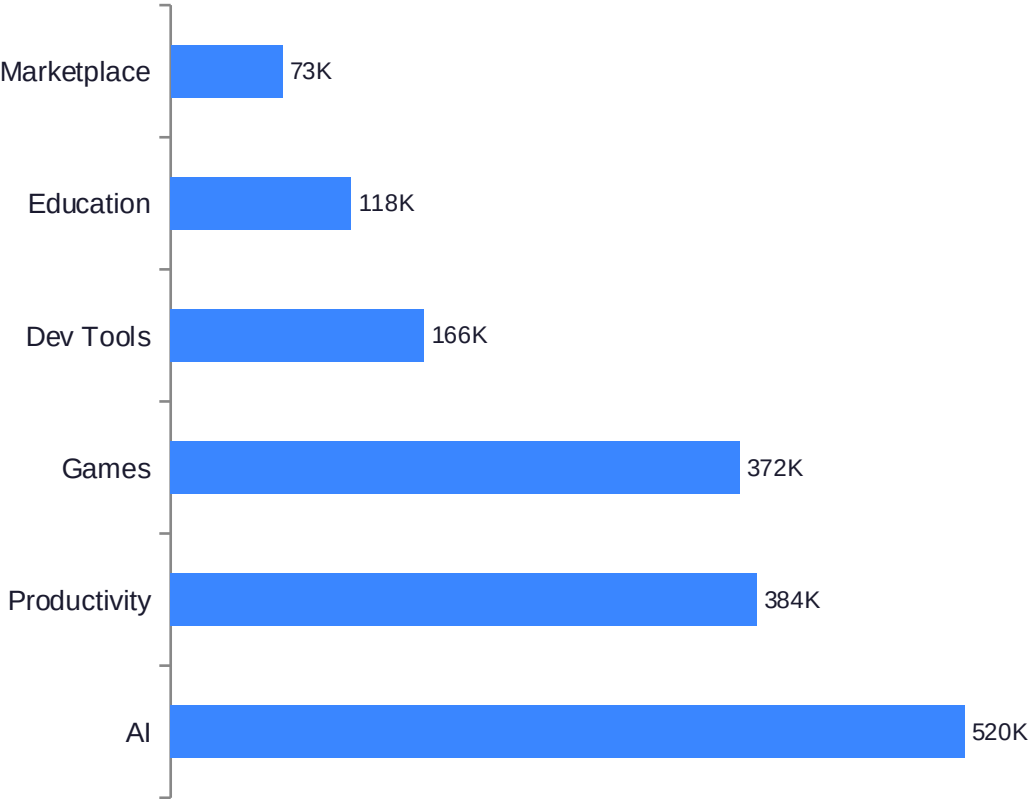

The dataset has no founding dates, so momentum is proxied here by comparing 30-day, 3-month, 12-month and all-time revenue for each category — a faster climb from the 30-day bar to the all-time bar signals quicker monetisation.

Who is getting users?

Traffic data is sparse (visitor counts are reported for ~18% of startups), but where present, AI and Productivity tools pull the most site visitors — while AI also leads on social following.

LEADERBOARD

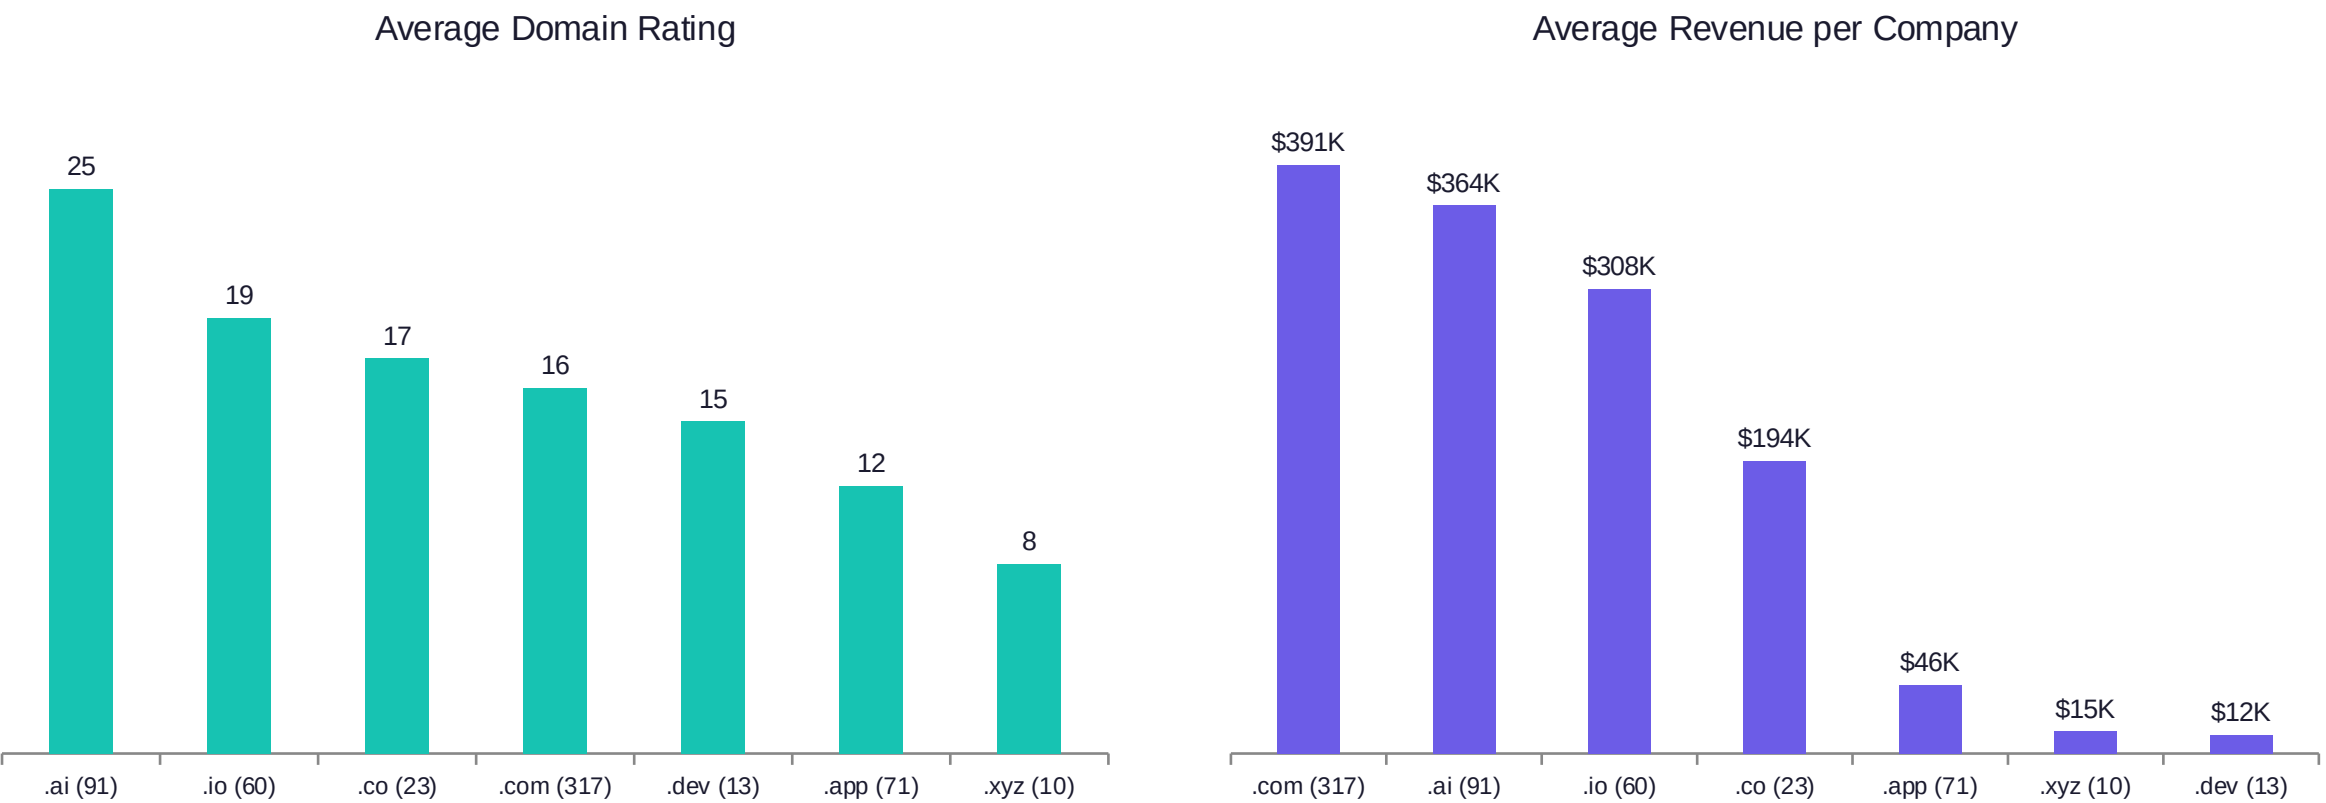

Top 10 revenue-generating companies

Ranked by all-time revenue. A handful of breakout names — several undisclosed — dominate the top of the table.

#	Company	Category	Country	All-Time Revenue	Current MRR
1	Stan	Uncategorized	US	\$76.6M	\$3.6M
2	Brand On Demand, Inc.	E-comm	US	\$51.2M	\$187.5K
3	Stack Influence	Marketing	US	\$26.3M	\$25.7K
4	Stealth Company	Uncategorized	—	\$11.3M	\$364.1K
5	Rezi	AI	US	\$9.7M	\$259.7K
6	Cometly	Analytics	US	\$9.4M	\$207.6K
7	Stealth Company	Uncategorized	GB	\$5.9M	\$161.2K
8	Stealth Company	Uncategorized	US	\$4.8M	\$135.9K
9	DataExpert / TechCreator	Education	US	\$4.5M	\$62.6K
10	Hidden Business	Uncategorized	—	\$4.4M	\$12.0K

Which domain extension performs best?

.com still owns the volume, and among extensions with a reliable sample size (10+ tracked companies), .ai leads on both domain authority and revenue per company.

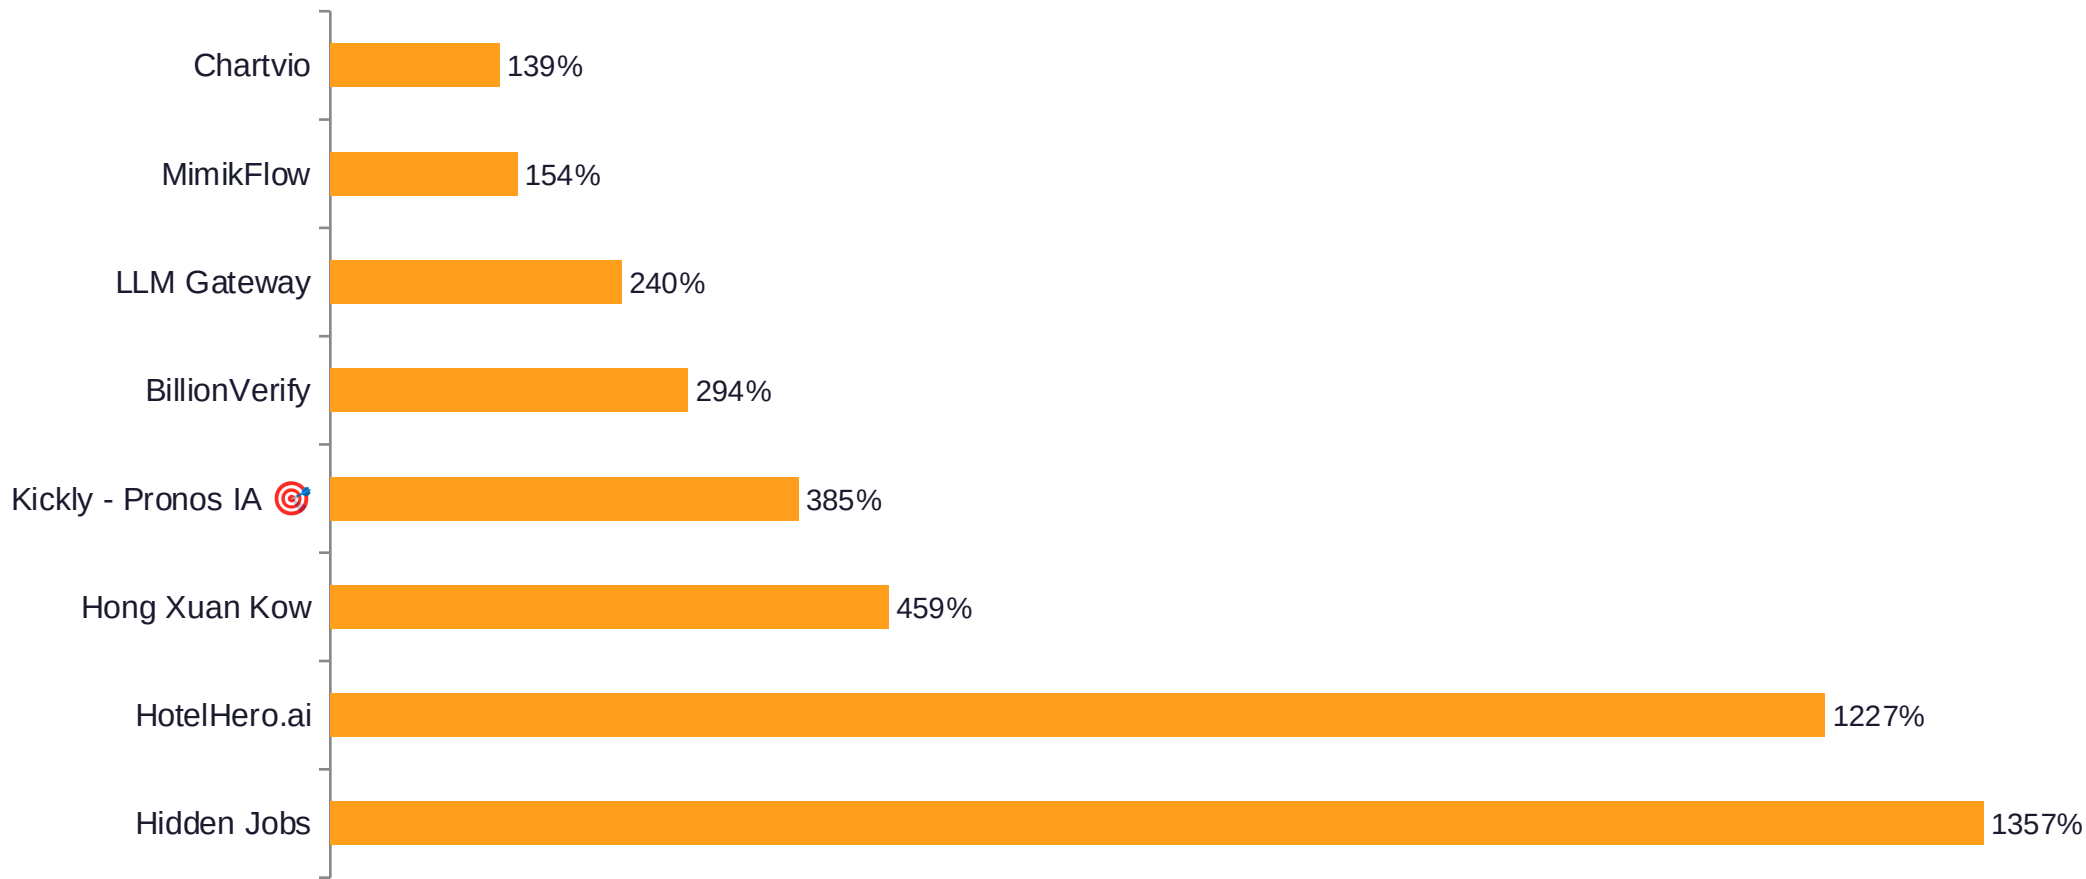

Excluded for small sample size (fewer than 10 tracked companies): .ad, .art, .bg, .bio, .build, .ca, .cc, .chat, and others.

MOMENTUM LEADERS

Fastest-growing MRR (last 30 days)

Filtered to startups with \$1,000+ MRR to avoid noise from tiny, early accounts. AI-category tools dominate the fastest-growing list.

B2B monetises harder — B2C monetises wider

255 B2B startups out-earn 401 B2C startups in total revenue, driven by a ~5x higher average revenue per company.

B2B

THE POWER LAW

Revenue is a winner-take-most market

61%

of total revenue earned by the top 1% of startups
(10 companies)

91%

of total revenue earned by the top 10% of
startups (100 companies)

<0.1%

of total revenue earned by the bottom half of all
startups (500 companies)

Key takeaways

- AI, E-commerce and Marketing generate the most revenue overall — but B2B tools monetise far more efficiently per company than B2C.
- A small number of breakout startups account for the overwhelming majority of tracked revenue; the median company earns very little.
- Among domains with a reliable sample size, .ai carries the highest authority and revenue-per-company, while .com still dominates by volume.
