What Is TrustMRR?

1,000 Startups

Verified — not self-reported

4 Core Fields

Revenue · Growth · Pricing · Exit
Market

MRR Defined

Monthly Recurring Revenue —
predictable subscription income

AI Dominates – And It's Not Close

34% of all startups in the dataset are AI or ML companies — nearly double the next category.

Capital and founder attention have decisively shifted toward AI. Every other category is playing catch-up.

AI Companies Grow 2× Faster Than SaaS

48%

AI / ML

Average YoY revenue growth

22%

SaaS

Average YoY revenue growth

2×

The Gap

AI outpaces SaaS by a factor of
two

Premium Pricing Follows Premium Growth

Enterprise-tier startups grow nearly **3× faster** than SMB-focused peers.

Why It Matters

Higher contract values compound faster — and retain longer.

Exit Multiples Reward Growth – Not Size

Exit multiple = how many times annual revenue a buyer pays at acquisition.

Higher growth = higher multiple. A clear, positive relationship – acquirers pay a premium for momentum, not current scale.

The Winning Formula Is Not a Secret

1

AI / ML Category

Highest growth, highest investor demand

2

Enterprise Pricing

3x the growth rate of SMB plays

3

Maximum Exit Value

Growth-driven multiples reward both

One Takeaway

AI + Enterprise = the highest-growth, highest-value combination in the dataset. Everything else is a compromise.

Category

AI / ML leads by a wide margin

Pricing

Enterprise outperforms SMB 3×

Exit

Growth rate drives acquisition multiples
