

A \$30K clue is not a build brief

about \$30K MRR · public snapshot · 30 Jul 2026

EVIDENCE

CONTRACT

PROMPT

WORKING APP

PROOF

By 116 minutes, submit this

- 01 — product + sources
- 02 — feature contract + first prompt
- 03 — public V1 URL
- 04 — acceptance-test evidence

A truthful failed test is evidence. A pretty URL without tests is not.

What should win?

01

Highest revenue

02

Easiest interface

03

**Strongest one-hour
proof**

Hold the answer. Method and evidence beat a confident output.

Three credible products

LIINKS	HABITKIT	QR CODE AI
≈\$30K MRR	≈\$30K MRR	≈\$14K MRR
creator page builder	habit tracker	branded QR platform

Rounded current snapshots · original text only · no logos or screenshots

Liinks leads: 96† / 100

HabitKit 89

QR Code AI 71

† Classroom feasibility release-gated by the golden run

One app. Three roles.

Rich enough to teach state, consumption, and evidence - bounded enough to ship.

Study behavior. Do not borrow identity.

Functional benchmark

YES

Name, logo, copy, assets, code, customer data, trade dress

NO

Unlabelled fake integration

NO

The commercial surface is larger than one hour

Scope is a promise

**Build an original creator page builder whose agreed
core works end to end.**

No new features after minute 49 · last 11 minutes = truth + publication

Plan once. Edit directly. Approve.

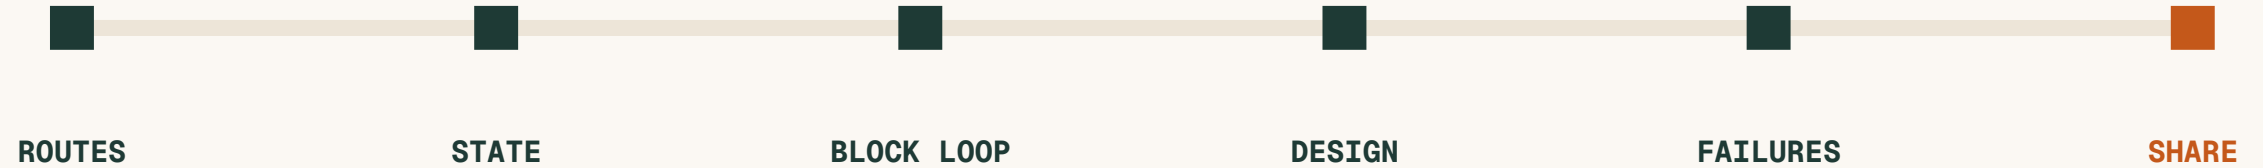

Code changes: none until approval

The six plan questions

- 01 Truth?
- 02 All ATs?
- 03 State explicit?
- 04 Failures named?
- 05 Keyboard path?
- 06 Core first?

Build the vertical slice

CONTRACT / EVIDENCE / SMALLEST NEXT CHANGE

A mock must say what it is

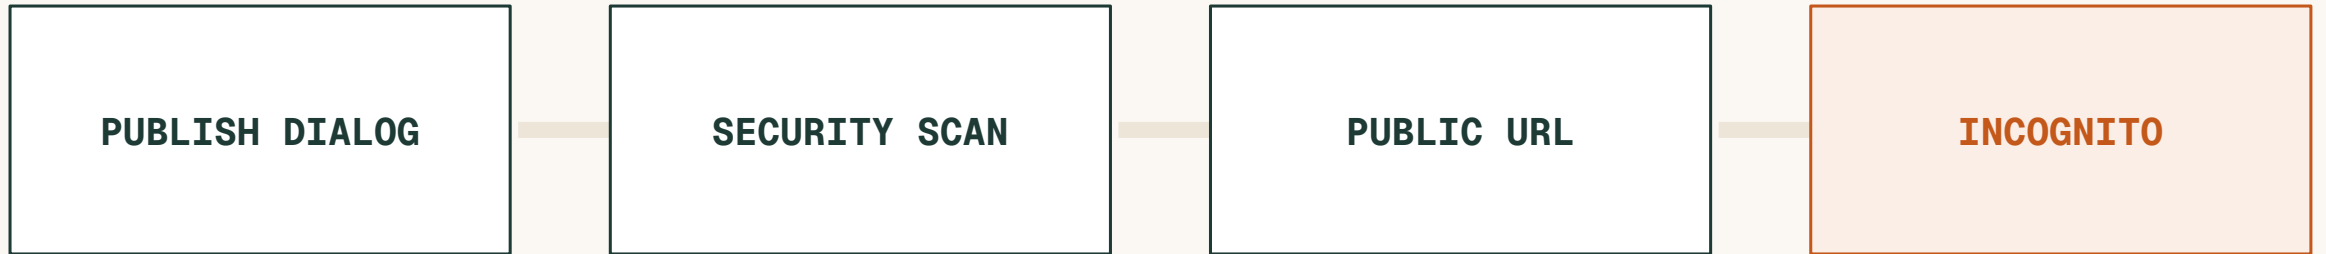

Demo import - no Instagram connection

Demo signup - stored only in this browser

Demo analytics · this browser only

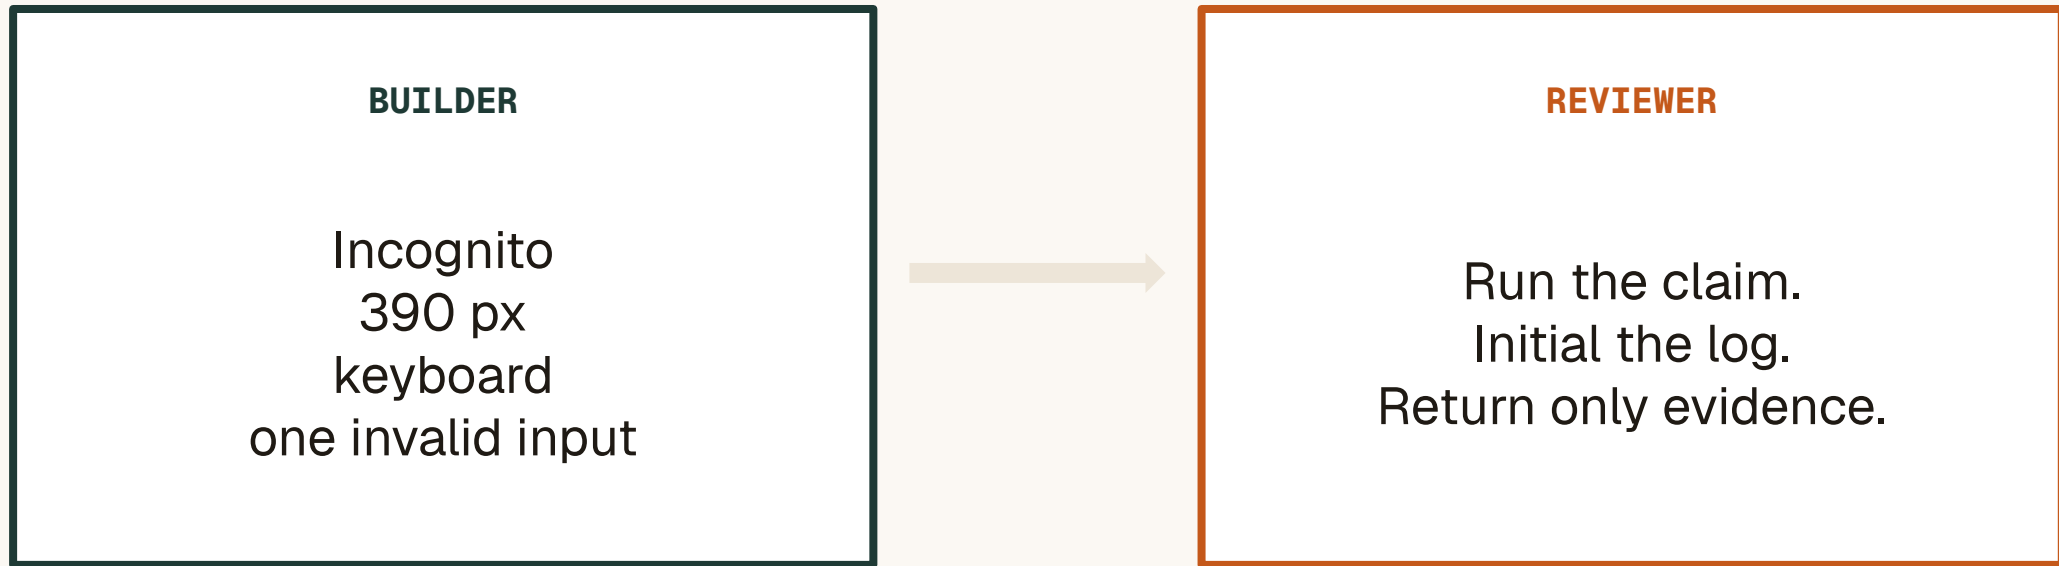

Build agent ≠ AI feature inside the live app

Publish is not “ask the chat”

Free / Pro public apps are accessible to anyone with the link. Use dummy data.

Swap laptops. Break the claim.

Builder owns fixes.

Repair a failed test, not your feelings

AT-07 + AT-10 fail because disabled state is not persisted.

Fix only that path; preserve passing behavior; verify both.

Broad aesthetic prompts at this point are scope failure.

V1 is evidence. V2 is controlled learning.

Verified 30 Jul 2026 · T-7 recheck: 5/day, up to 30/month · no rollover

Your app now needs a system

APP EVENT
