

SESSION 1

Digital Fluency for Working Professionals

Prompting, Theory & Research

The Rambo Case: An ITC New Ventures Brief

Ashwin Prasad & Pushpak Teja

P R A

An ITC New Ventures Brief

The Brief

Rambo is ITC's proposed entry into India's energy drink market.

Market size: ₹6,800 Cr and growing

Budget: ₹50 Cr to build a D2C challenger brand

Mandate: Homegrown Indian alternative. Compete hard.

Sting

48% market share

48%

Red Bull

26% market share

26%

Hell

9% market share

9%

Monster

7% market share

7%

Chatting vs. Delegating

CASUAL CHAT

"Write me a pitch for Rambo."

You get: A generic, forgettable paragraph.

The AI had nothing to work with.

✗ Vague in = vague out

STRUCTURED DELEGATION

"You are a brand strategist at ITC. Write a punchy 3-para pitch for Rambo targeting Tier-2 India. Use FOMO-free, aspirational tone."

You get: On-brief, usable copy in under 10 seconds.

✓ Brief well. Get back something real.

"The quality of what you get back is entirely a function of how clearly you brief."

The CO-STAR Framework

C

Context

e.g. "ITC is launching Rambo into India's ₹6,800 Cr energy drink market."

T

Tone

e.g. "Serious but not dry. Authoritative."

O

Objective

e.g. "Write a 3-point investor rationale for entering Tier-2 cities first."

A

Audience

e.g. "ITC senior leadership and potential D2C investors."

S

Style

e.g. "Direct, confident. No jargon. Boardroom-ready."

R

Result

e.g. "Return a structured memo with headers. Max 250 words."

Picking the Right Tool

Claude

BEST FOR

Best for nuanced writing, long-context tasks, and structured thinking.

ChatGPT

BEST FOR

Versatile generalist. Strong plugins and code execution.

Gemini

BEST FOR

Deep integration with Google Workspace. Great for Sheets and Docs.

Perplexity

BEST FOR

Real-time web search with citations. Built for research.

Tip: Use Perplexity to research, Claude to think, Gemini to present.

LLM Theory Canvas

01 LLM / Model / Wrapper

LLM = the brain. Model = a trained version. Wrapper = the app on top (e.g. Claude.ai wraps the Claude model).

02 Token

The unit an LLM reads and writes. Roughly $\frac{3}{4}$ of a word. Cost and speed are measured in tokens.

03 Context Window

Everything the model can 'see' in one conversation. Larger window = remembers more of your thread.

04 Temperature

Controls creativity. Low = precise and predictable. High = varied and imaginative.

05 Knowledge Cutoff

The date the model's training data ends. It does not know things that happened after this.

Hallucination

When AI is confidently, completely wrong.

"What studies prove energy drinks boost focus in India?"

According to a 2022 AIIMS New Delhi study published in the *Indian Journal of Nutrition*, energy drinks containing taurine improved sustained attention by 23% in adults aged 22–35. The study surveyed 1,400 participants across 6 metros...

That study does not exist. That journal is fabricated. The numbers are invented.

The S.C.E.N.E. Framework

S

Subject

What is the main focus?

C

Composition

Framing, angle,
perspective

E

Environment

Setting, time of day,
backdrop

N

Note

Mood, feel, emotion

E

Execution

Style — photo, 3D,
illustration, etc.

Rambo example:

"A young man in a Tier-2 city chai stall, reaching for a red can. Golden hour light. Gritty, aspirational. Photorealistic."

Three Tools Worth Bookmarking

PERSISTENT CONTEXT

Claude Projects

Give Claude a brief, brand guidelines, or a dataset once — it remembers across every conversation in the project.

VIDEO SUMMARISATION

NoteGPT

Paste any YouTube or podcast link. Get a timestamped summary, key insights, and shareable notes in under 30 seconds.

YOUR RESEARCH HUB

NotebookLM

Upload PDFs, decks, and articles. NotebookLM becomes a searchable AI assistant over your entire source library.

Build a Rambo Tier-2 Pitch Deck.

Minimum 6 slides. Use AI. Bring it to Session 2.

Which tools you use and how you prompted: part of the debrief.

SESSION 2

Digital Fluency for Working Professionals

Presentations & Data Analysis

Ashwin Prasad & Pushpak Teja

P R A

Homework Debrief

What worked?

Which prompt got you closest to what you wanted?

Which tool surprised you?

Where did things click?

What frustrated you?

Where did AI give you something useless?

What did you have to redo?

What felt slow or unclear?

The Presentation Workflow

01

Structured Prompt

You write the brief.
Role, objective, audience, format.

02

AI Draft

AI generates structure and initial copy.
Fast. Imperfect. Useful.

03

You Edit

You shape the story.
Your voice, your judgement, your final call.

Common mistake: Asking AI to 'make a deck' without a brief. Garbage in, garbage out.

Brand Identity Encoding

Give AI a 'brand block' at the start of any creative brief. It remembers.

BRAND BLOCK

Rambo

Brand: Rambo Energy Drink

Audience: Ambitious 18-28 yr olds, Tier-2 India

Tone: Bold, grounded, never try-hard

Voice: Direct. Confident. A bit irreverent.

Colours: Red, black, white

Avoid: Western influencer clichés

BRAND BLOCK

Praxel

Brand: Praxel – Career & Skilling Platform

Audience: Working professionals, 25-45

Tone: Honest, warm, practical. No hype.

Voice: Straight talk. Warm heart. No BS.

Tagline: Beside you as work evolves.

Avoid: EdTech clichés, false urgency

Two Paths to Insight

PATH 01

Gemini in Google Sheets

Open your spreadsheet. Ask Gemini directly inside Sheets. No exports, no setup.

Best for: Small-medium datasets you already have in Drive.

or

PATH 02

Upload CSV to LLM

Upload your CSV directly to Claude or ChatGPT. Ask questions in plain language.

Best for: Ad hoc analysis, pattern spotting, narrative summaries.

→ **Business Insight**

Stop processing data. Start conversing with it.

"Which cities in this dataset show the highest repeat purchase rate for energy drinks?"

"Summarise the top 3 patterns you see in the demographic data outliers."

"If Rambo enters Jaipur first, what does this data say about the risk?"

The AI has the data.

You ask the question.

The insight is yours.

THE ARC

You researched.
You built a deck.
You analysed data.
In 4 hours.

That's your Monday morning, changed.

Coming next week.

Clone a voice.

Generate a video.

**Build a workflow that runs while
you sleep.**
