

TrustMRR: The Ultimate Startup Intelligence Database

The private tech ecosystem's best-kept secrets — finally exposed.

The Hidden Goldmine

1,000+ Verified Startups

Tracked in real-time across 50+ countries — the most comprehensive private startup database ever assembled.

The Blind Spots

Founders hiding revenue. Investors missing deals. Researchers flying blind. The private tech ecosystem has kept its secrets — until now.

TrustMRR Reveals All

What the private tech ecosystem has kept secret for years is finally exposed — live financials, M&A intelligence, and market signals in one platform.

What We Reveal

Real Financials

Live MRR, 30-day revenue, and full 12-month pipelines — no estimates, no vanity metrics.

Market Fit Signals

Exact value propositions, target personas, and conversion efficiency benchmarks across every niche.

M&A Intelligence

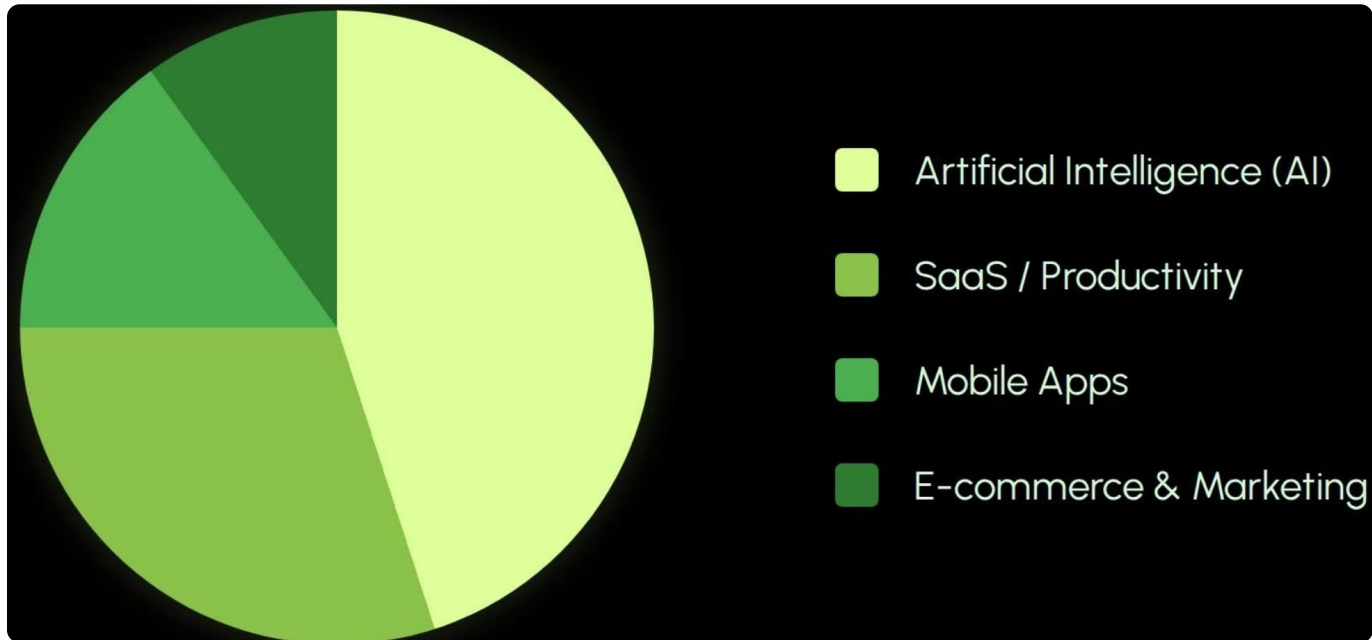

Active deals, live asking prices, and verified revenue multiples before brokers ever list them.

Tech Stack Winners

Which payment providers and tools separate the top earners from everyone else.

The Market Concentration

AI Dominates the Landscape

AI captures 45% of all tracked startups — the single largest concentration in the private SaaS ecosystem. SaaS/Productivity commands another **30%**, cementing itself as the proven recurring revenue engine.

TrustMRR maps exactly where capital is flowing, where founders are building, and where the next wave of outliers will emerge — before the broader market wakes up.

❏ These concentration signals are only visible inside TrustMRR's verified dataset.

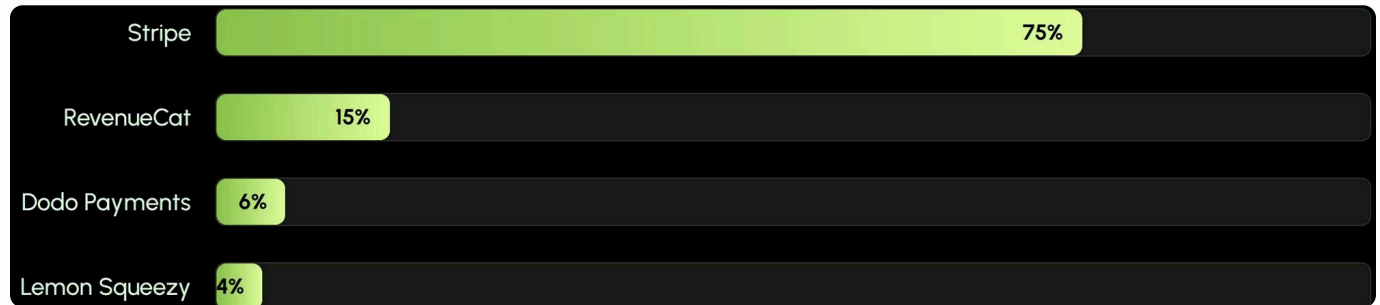

Stripe's Stranglehold

Payment Infrastructure Is the Hidden Moat

75% of top-earning startups run on Stripe.

The gap between Stripe and every competitor — RevenueCat, Dodo, Lemon Squeezy — is staggering. This isn't just a preference. It's a structural advantage baked into the highest-revenue cohort.

TrustMRR identifies the payment stack patterns that correlate with revenue performance — intelligence no broker or analyst report has ever surfaced at this scale.

The Paradox We Solve

Stealth Winners Hiding in Plain Sight

A creator store quietly hitting **\$3.5M MRR** with zero press coverage. Open-source projects generating massive revenue per visitor while VCs overlook them entirely.

Outpacing the Well-Funded

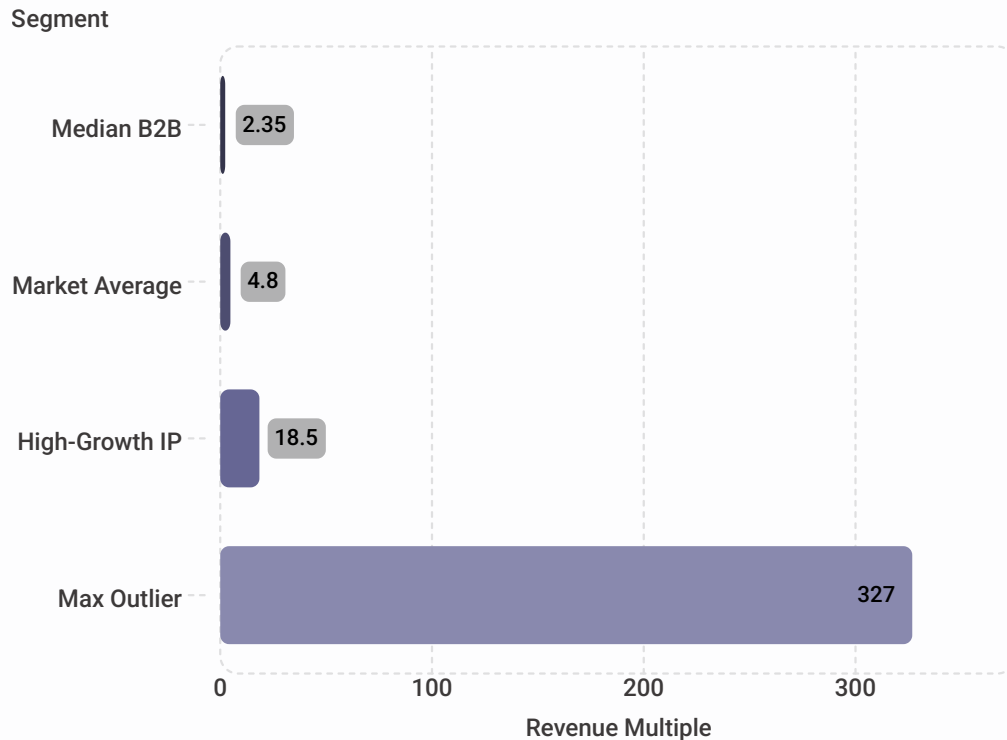

Stealth operations with no funding announcements are quietly beating well-capitalized competitors on revenue efficiency — and nobody outside TrustMRR knows it yet.

TrustMRR Finds the Winners First

Before the market does. Before brokers list them. Before the term sheets arrive. This is the edge that changes outcomes.

M&A Multiples: The Full Spectrum

From Baseline to Extraordinary

The **median B2B multiple sits at 2.35x** — a reliable baseline for valuing private SaaS assets. But the real story is at the extremes.

TrustMRR has tracked outliers hitting **326.8x** revenue multiples — extreme premiums paid for high-growth IP that most investors never even see listed.

The asking price range runs from **\$120 to \$10M**, revealing a vibrant micro-acquisition market operating entirely below the radar of traditional deal flow.

Who Wins With TrustMRR

Founders

Benchmark your MRR against 1,000+ verified peers. Discover the exact pricing models winning in your niche before you set your next price page.

Investors

Filter '**On Sale**' companies instantly. Spot undervalued assets before brokers touch them. Act on deal flow that the rest of the market hasn't seen yet.

Researchers

Analyze macroeconomic trends across the private ecosystem. Measure social traction against revenue reality — and separate hype from genuine performance.

The Data Advantage

1,000+ Startups

Across 50+ countries

Granular Metrics

Domain ratings, social following, exact revenue pipelines

Live M&A Flow

Real-time deal updates and verified asking prices

The Only Platform of Its Kind

No other platform maps the **entire private SaaS ecosystem** with this depth and verification standard. Every metric is sourced, checked, and updated in real time.

From domain authority to 12-month revenue pipelines to live acquisition listings — TrustMRR is the single source of truth for private tech intelligence.

📄 The private SaaS market has never had a Bloomberg terminal. Until now.

Financial Transparency Unlocked

TrustMRR provides the ultimate financial transparency the private tech ecosystem has been begging for.

Move beyond vanity metrics. See **exactly how much startups earn per visitor**. Discover which companies are truly winning — not just the ones with the loudest PR campaigns or the biggest funding announcements.

The era of information asymmetry in private tech is over.
