

MEET BOB THE BUILDER

He can build anything. He just picked the wrong plot of land.

Bob is a solo founder with a laptop, no funding and no co-founder. He wants one thing: an app that earns real money. His instinct is to build an AI tool, because that is what everyone builds. TrustMRR is 1,000 products that already made that choice — with verified revenue attached to every one. Bob can read the outcome before he pours a single foundation.

BOB

Solo founder · pre-revenue

THE JOB

Build one app that makes money

THE BUDGET

His own time. No capital.

THE INSTINCT

"I'll build an AI tool."

THE RISK

197 people already did

1,000

products already built on this site

80.3%

of them earn something

\$282

median monthly revenue

26.5%

of all revenue belongs to one product

Bob gets five decisions. This site can answer four of them.

Which category?

29 labelled categories, 726 rows

ANSWERABLE

No launch dates

No founding, launch or listing date field exists. Every claim here is a cross-section, not a time series.

Which audience?

712 rows state B2B / B2C / Both

ANSWERABLE

Which pricing model?

657 rows disclose pricing

ANSWERABLE

No churn or cost

No churn, CAC, margin or headcount fields. Revenue is gross, not profit.

Which gateway?

1,000 rows name a provider

ANSWERABLE

What will I earn?

No dates, no cohorts, no churn

NOT ANSWERABLE

One snapshot

Frozen 30 Jul 2026. Only movement signal is mrr_growth_30d_pct, on 893 of 1,000 rows.

BOB'S CALL

"So the site can't tell me what I'll earn. Fine — it can tell me where the money already is."

The site sells proof — and that proof is Bob's distribution

- 1 Every one of the 1,000 listings is bound to a live payment-provider API key. Revenue is read from the rails, not typed in by the founder.
- 2 TrustMRR lists itself: \$22,333 MRR · \$263,633 all-time · 17 subscriptions · domain rating 68 · 73,326 visitors in 30 days · Singapore · B2B.
- 3 The site has an exit gate: 262 listings are flagged on sale, \$86.8M in combined asks, median ask \$35,000 at a median 2.3x revenue.

WHAT A LISTING PLUGS INTO

BOB'S CALL

"Listing isn't vanity. It's a profile on a DR-68 domain with 73k monthly visitors — that's free footfall."

CHOOSING THE PLOT

Bob's instinct is the worst plot on the site

- 1 29 labelled categories cover 726 of 1,000 products. AI is the largest at 197 — nearly 3x the next, SaaS at 66. It is where Bob was heading.
- 2 Crowding does not pay. AI's median MRR is \$446 and only 18.3% clear \$10k. Analytics has 19 products, a \$1,294 median and 31.6% clearing \$10k.
- 3 The floor is Productivity: 49 products, median MRR \$42.20, and just 6.1% above \$10k — the worst hit rate of any category with $n \geq 10$.

BOB'S CALL

"I was about to build the 198th AI tool. One in five of them clears \$10k. I'd rather take better odds."

DRAWING THE BLUEPRINT

Two lines on the blueprint are worth a 9x median

- 1 B2B products post a median MRR of \$1,036 across 255 rows. B2C posts \$181 across 401 — a 5.7x gap on the same platform.
- 2 Tiered subscription converts best: 211 products, 92.9% with live MRR, median \$1,077. Freemium is 249 products at a \$149 median.
- 3 Gateway is a consequence, not a choice. 644 of 1,000 route through Stripe carrying 87.7% of MRR; 97 of the 106 B2B-subscription products use it.

THE SAME SITE, THREE POSITIONS

B2C + Freemium

159 products
12.6% clear \$10k

\$142

median MRR

All products

1,000 products
21.2% clear \$10k

\$282

median MRR

B2B + Subscription

106 products
25.5% clear \$10k

\$1,284

median MRR

BOB'S CALL

"Same effort either way. Charging a business a subscription is the cheapest decision I'll ever make."

THE GROUND TRUTH

Bob should plan for \$282, not \$13,472

- 1 Total MRR is \$13,471,682 across 1,000 products. Mean \$13,472. Median \$282. Among only the 803 that earn, the median is \$1,036.
- 2 Stan alone holds 26.5% of ecosystem MRR. The top 10 hold 48.0%, the top 50 hold 70.6%, the top 100 hold 81.8%.
- 3 591 products earn under \$1,000/month. The bottom 500 combined hold 0.19% of all MRR. Only 16 products clear \$100k.

BOB'S CALL

"The average is a fantasy. If I hit \$1,036 a month I've already beaten half the site that earns anything."

The tallest buildings on this site were not built from a plan

#	PRODUCT	CATEGORY	MRR	SHARE	SUBS
1	Stan	—	\$3,569,654	26.5%	101,590
2	Stealth Company	—	\$747,069	5.5%	1,677
3	GojiberryAI	AI	\$494,668	3.7%	4,642
4	Stealth Company	—	\$364,101	2.7%	2,134
5	Rezi	AI	\$259,701	1.9%	10,749
6	Kibu	Education	\$234,319	1.7%	375
7	Cometly	Analytics	\$207,616	1.5%	307
8	1Lookup	SaaS	\$207,064	1.5%	655

Best category by hit rate: Analytics — 19 products, 100% monetized, 31.6% above \$10k. Worst: Productivity — 49 products, median \$42.20, 6.1% above \$10k.

3 of the top 8

are anonymous or uncategorised — the two largest earners have no category label, so the leaderboard can't teach Bob what to build

Rank 2 is unstable

\$747,069 MRR against \$440,104 of 12-month revenue, with 30-day MRR growth of -74.3%. A spike, not a business

r = 0.906

correlation between active_subscriptions and MRR (n=1,000). Subscriber count is the only variable that tracks revenue

BOB'S CALL

"Nobody at the top is copyable. But subscribers track revenue at r = 0.906 — that's the number I chase."

The toolkit is proof and footfall. There is no capital and no foreman.

WHAT THE DATA EVIDENCES

Revenue verification

1,000 / 1,000 rows carry a live gateway connection and a full revenue series

A public profile page

1,000 / 1,000 rows have a trustmrr_url, hosted on a domain-rating-68 site

Peer benchmarking

893 rows expose 30-day growth; 726 a category; 712 an audience type

An exit gate

262 listings on sale, \$86.8M in asks, median 2.3x revenue

WHAT THE DATA DOES NOT EVIDENCE

No capital or funding field

No mentorship, accelerator or programme field

No community, support-ticket or SLA field

No credits, discounts or vendor perks field

73,326

visitors to trustmrr.com in 30 days — the footfall a listing actually buys

BOB'S CALL

"No money, no mentor, no shortcuts. What I get is proof and traffic — and I have to build the rest."

HAZARDS ON SITE

Every ranking Bob is about to trust rests on 43.5% of the money

RANKING RISK

56.5%

of ecosystem MRR sits in the 274 rows with no category label, including the two largest earners. Category rankings describe the labelled minority of the money.

FUNNEL BLIND SPOT

822 / 1,000

products have no traffic data and 858 no revenue-per-visitor. The path from visitor to dollar is invisible for roughly 85% of the site.

STAGNATION RISK

381 of 893

products with a growth figure are exactly flat at 0.0%; 238 are negative. The median month here is a month where nothing moves.

EXIT RISK

0.0x – 326.8x

range of asking multiples across 262 listings, median 2.3x. Rolely asks \$4,000 on \$76 of annual revenue. Exit pricing is unanchored.

BOB'S CALL

Underserved plots worth a look: Analytics (19, 100% monetized) · Sales (13, 100%) · Fintech (16, 93.8%) · Customer Support (5, median \$5,163)

Score the plots on four things Bob can verify — not on size

COMPOSITE = 35% median MRR rank + 25% hit-rate rank + 20% monetization-rate rank + 20% thinness rank (fewer competitors scores higher). 18 categories with n ≥ 10.

RANK	CATEGORY	N	MEDIAN MRR	MONETIZED	HIT RATE	SCORE
1	Analytics	19	\$1,294	100%	31.6%	86.5
2	Sales	13	\$1,036	100%	30.8%	83.1
3	Education	30	\$2,142	93.3%	26.7%	77.5
4	Marketing	42	\$1,586	88.1%	31.0%	73.1
5	Fintech	16	\$500	93.8%	25.0%	69.3
6	Content Creation	36	\$1,254	91.7%	25.0%	66.3
...	AI ← Bob's instinct	197	\$446	86.3%	18.3%	46.1
17	Dev Tools	37	\$185	83.8%	8.1%	28.9
18	Productivity	49	\$42	85.7%	6.1%	17.8

BOB'S CALL

"AI ranks 11th of 18. Analytics and Sales rank 1st and 2nd. That settles where I dig."

Ranks 7–16 omitted for space: Games 55.6 · E-comm 54.6 · Health & Fitness 54.4 · Social Media 51.9 · AI 46.1 · Mobile Apps 43.3 · SaaS 38.1 · Real Estate 36.5 · Utilities 35.8 · Design Tools 31.2. Weights are analyst judgement; inputs are raw.

What Bob Builds

A B2B analytics or sales tool, priced as a tiered subscription, billed through Stripe.

01

Analytics and Sales are the only plots where every product earns.

19 and 13 products, 100% with live MRR, hit rates of 31.6% and 30.8% against AI's 18.3%.

02

B2B plus subscription is a 9x median over the freemium default.

106 products, median \$1,284 and 25.5% above \$10k, versus 159 B2C-freemium products at \$142 and 12.6%.

03

Stripe is the only gateway with proven scale at this position.

644 of 1,000 products, 87.7% of ecosystem MRR, and 97 of the 106 B2B-subscription products already on it.

THE MAIN RISK

Thin plots. Analytics is 19 products and Sales 13 — and 56.5% of site revenue sits in unlabelled rows, so the ranking rests on a minority of the money.

BOB'S NEXT ACTION

Pull the 19 Analytics and 13 Sales rows. Read their `value_proposition` and `target_persona` fields. Find the persona none of those 32 serve. That is the product.

Bob's closing insight: on this site the hard part was never building — 89.9% of products earned something. The hard part is charging a business enough to matter.

Every derived number, its formula, and its source fields

DERIVED METRIC	FORMULA	FIELDS USED	MISSING / AMBIGUOUS
Total MRR — \$13,471,682	SUM(mrr_usd)	mrr_usd	None — 0 nulls
Median MRR — \$282 / monetized \$1,036	MEDIAN(mrr_usd) · MEDIAN(mrr_usd WHERE >0)	mrr_usd	None
% monetized — 80.3%	COUNT(mrr_usd>0) / 1000	mrr_usd	None
Ever earned — 89.9%	COUNT(revenue_all_time_usd>0) / 1000	revenue_all_time_usd	None
Concentration — top 10 = 48.0%	SUM(top-10 mrr_usd) / SUM(mrr_usd)	mrr_usd	None
Hit rate — e.g. Analytics 31.6%	COUNT(mrr_usd≥10000) / category count	mrr_usd, category	274 rows unlabelled
Gateway share — Stripe 87.7%	SUM(mrr_usd) by first provider / total	payment_provider, mrr_usd	19 rows list 2+ providers
Pricing buckets — 7 groups	Keyword classification of free text	pricing_model	343 nulls; 616 unique strings
B2B/B2C medians — \$1,036 / \$181	MEDIAN(mrr_usd) grouped by audience	audience_type, mrr_usd	288 nulls
Cohort median — \$1,284	MEDIAN WHERE B2B AND sub/enterprise	audience_type, pricing_model	Depends on bucketing
Composite score — Analytics 86.5	Weighted percentile ranks 35/25/20/20	mrr_usd, category	Weights are analyst judgement
Correlations — 0.906 / 0.024 / 0.215	Pearson r, complete pairs only	active_subscriptions, x_followers, domain_rating	n = 1000 / 984 / 714
Median multiple — 2.3x	MEDIAN(revenue_multiple stripped of 'x')	revenue_multiple, on_sale	738 nulls; range 0.0x–326.8x

Raw = direct field aggregation. Derived = computed or classified by the analyst. All source fields named above.

What not to conclude from this deck

Do not read association as causation

B2B products earn more than B2C products on this platform. The dataset cannot show that switching to B2B raises revenue — there is no before/after and no time dimension.

Do not treat thin categories as proven

Analytics n=19, Sales n=13, Customer Support n=5, Legal / Crypto & Web3 / News each n=1. A single product moves these medians materially.

Do not generalise from the leaderboard

Stan holds 26.5% of MRR with no category label. Rank 2's MRR (\$747,069) exceeds its own 12-month revenue (\$440,104) while shrinking 74.3% — treat it as a data spike.

Do not infer growth trends

No launch, founding or listing dates exist. mrr_growth_30d_pct covers 893 rows and 381 of those are exactly 0.0% — this is a snapshot, not a trajectory.

Do not assume the category ranking covers the money

274 unlabelled rows hold 56.5% of ecosystem MRR. All category conclusions describe the labelled 43.5%.

Do not claim founder support beyond the schema

No funding, mentorship, community, credits or service-level fields exist. Any such claim cannot be determined from the provided data.

Fields with the weakest coverage: revenue_per_visitor_usd 14.2% · visitors_30d 17.8% · asking_price_usd 26.1% · revenue_multiple 26.2% · target_persona 63.9% · pricing_model 65.7%

Coverage percentages are exact non-null counts over 1,000 rows.
