## The dataset

# What is TrustMRR?

TrustMRR is a marketplace-style dataset of 1,000 real startup revenue profiles — frozen on 30 July 2026. Each row is one startup: what it earns, how fast it's growing, who it sells to, whether it's for sale, and where it operates from.

**1,000**

startups profiled

**29**

data fields per row

**30 Jul 2026**

data frozen as of

---

## THE OBJECTIVE

*Not a data dump. One decision: which startup category should I actually build in — backed by evidence, not gut feel.*

# Where we're going

**01**

## The framework

Six signals we're scoring every category on

**02**

## The ranking

Every category, one composite score

**03**

## The concentration test

Why the top score can be a trap

**04**

## The verdict

Dev Tools vs Content Creation, head to head

# Six signals, one score

Every category was scored on these — not on how many companies exist in it

01

## Demand proof

% earning real revenue

02

## Monetization quality

Median MRR, whale-resistant

03

## Momentum

% growing this month

04

## Room to enter

Inverse of market concentration

05

## B2B leverage

% selling to businesses

06

## India relevance

Local presence and earnings

# Every category, ranked

Composite score across all six signals · categories with 15+ startups

# Why the top score can be a trap

Composite score hides who's actually earning the revenue inside each category

## ANALYTICS

## DEV TOOLS

## CONTENT CREATION

# Dev Tools vs Content Creation

The two most defensible bets in the dataset, scored head to head

| SIGNAL                         | DEV TOOLS                 | CONTENT CREATION |
|--------------------------------|---------------------------|------------------|
| Demand proof                   | 92%                       | 92%              |
| Median MRR                     | \$185                     | \$1,254          |
| Momentum (% growing)           | 57%                       | 39%              |
| Market concentration (top co.) | 26%                       | 15%              |
| B2B share                      | 70%                       | 39%              |
| India proof point              | Web3Forms, #1 in category | None yet         |

The recommendation

# Build in Dev Tools. Keep Content Creation on the shelf.

Stronger momentum, deeper B2B lean, and an existing India proof point beat a marginally higher composite score.  
Content Creation stays the backup — most fragmented market we found, just not yet proven locally.

**01**

## Pick a wedge

Fragmented ≠ empty — find the specific gap inside Dev Tools

**02**

## Study the incumbents

Web3Forms, Capgo, Conductor — small, real, beatable

**03**

## Validate before building

Confirm 10 people will pay before writing code
