03

Valuation, Risks & the Recommendation

What real deals trade at, where the exposure sits, and what we would do with capital today.

Real education deals trade at 2.3x–5.8x revenue

ASSET	PRICE	MULTIPLE
ieltsprep site	\$700	5.8x
Yeira LMS	\$130,000	5.5x
Lunchbreak	\$1,500,000	4.0x
WRITING9	\$200,000	3.0x
GenZWrite	\$70,000	2.3x

2.3x–5.8x

REVENUE MULTIPLE RANGE

Listings priced above ~10x on near-zero revenue are noise — not real comps.

What could go wrong

- 01 US-heavy sample**
13 of 30 companies are US-based; findings may not generalize.
- 02 Thin distribution & domain authority**
Median domain rating of 7.5 caps the organic moat.
- 03 B2C-heavy with low ARPU**
25 of 30 are B2C; most subscriptions price under \$15/month.
- 04 Academic-integrity / policy risk**
Lunchbreak and GenZWrite monetize AI-detection evasion.
- 05 Self-reported, point-in-time data**
Figures frozen at 30 Jul 2026; not audited.

Concentration risk is real — mitigate with disciplined deal selection.
