

Channel & Sector Economics: Where To Lean In

Active subscriptions and revenue by customer type — TrustMRR portfolio

12.6x

more all-time revenue per B2B subscriber
than per B2C subscriber

B2B

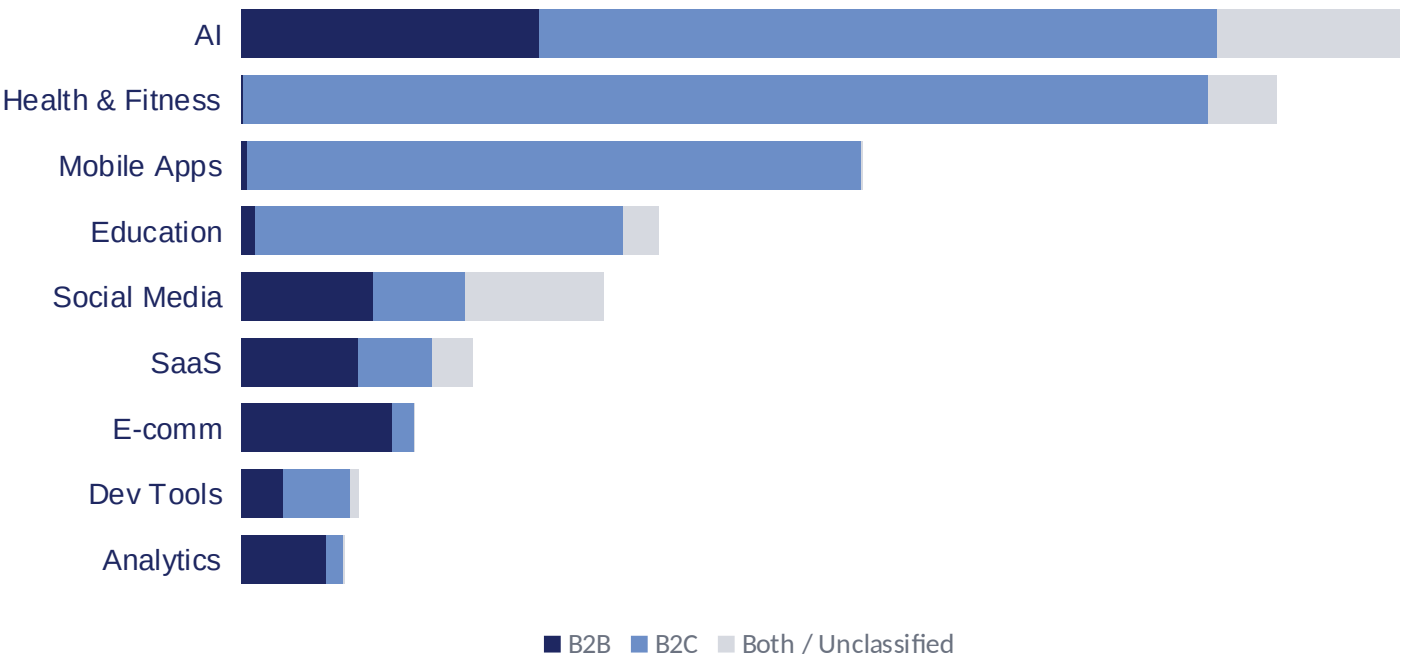

8% of subscriptions → 42% of all-time revenue

B2C

31% of subscriptions → 13% of all-time revenue

Still 9.9x more revenue per subscriber on a trailing 12-month basis — the gap isn't just legacy accounts.

Active Subscriptions by Sector & Customer Type

- **Double down:** Analytics (82%), E-comm (87%), and SaaS (50%) already run mostly B2B — the highest-value mix in the portfolio.
- **Whitespace:** Health & Fitness, Mobile Apps, and Education carry 82K+ subscribers combined but are 95%+ consumer — headroom to introduce a B2B tier at B2B-level economics.
