

BOARD BRIEFING · JULY 2026

TrustMRR Marketplace Intelligence

Portfolio Health, Concentration Risk, and the Sourcing Opportunity Ahead

SCOPE

1,000 ventures · 65 countries

SNAPSHOT

Frozen 30 Jul 2026

PREPARED FOR

Board of Directors

CLASSIFICATION

Confidential — Board Use Only

Executive Summary

Cohort revenue is re-accelerating — up **44%** vs. the trailing-quarter run-rate — but growth, value, and risk are all concentrated in a thin top tier of the **1,000** ventures tracked.

REVENUE CONCENTRATION SNAPSHOT

TOP 3 BUSINESS INSIGHTS

Real acceleration, narrow base
Run-rate is up 44% vs. the trailing quarter — the gain sits mostly with a few large names.

AI leads on scale and growth
1 in 5 ventures (197) sit in AI, averaging +76% 30-day growth.

B2B commands a value premium
B2B ventures earn ~4x more per venture than B2C (\$22.6K vs. \$5.7K/mo).

TOP 3 RISKS

Concentration risk
The top 10 ventures generate roughly half of all cohort revenue.

Mispriced inventory
44 for-sale listings show zero revenue yet still ask \$4.4M combined.

Bimodal, volatile growth
As many ventures are shrinking (34%) as growing (34%) — no stable middle.

TOP 3 RECOMMENDATIONS

Weight sourcing to AI / B2B
Direct incremental deal flow to the strongest growth and value signal.

Systematize the value screen
Undervalued-deal filter (sub-2.5x + growth) — 29 targets qualify today.

Quarantine zero-revenue asks
Pull the 44 zero-revenue listings pending re-verification.

Where the Marketplace Stands Today

Business Objective: Assess the health, trajectory, and acquisition-readiness of the TrustMRR indie-SaaS marketplace to guide sourcing, diligence, and portfolio decisions.

WHAT THE MARKETPLACE IS

A directory of 1,000 revenue-verified indie SaaS ventures across 65 countries and 29 categories.

Revenue confirmed via connected payment APIs — Stripe covers 64% of the cohort.

262 ventures (26%) are actively listed for acquisition, with asking price and multiple disclosed.

Snapshot frozen 30 Jul 2026 — a point-in-time view, not a live feed.

HOW A VENTURE ENTERS THE PIPELINE

1. Verify

Revenue pulled directly from the connected payment provider.

2. Score

Growth, multiple, and domain-authority metrics computed.

3. List

Owner opts in to list the venture for sale (262 today).

4. Screen

Deal team filters listings for acquisition fit.

What Changed — and Why

The 30-day run-rate jumped 44% above the trailing-quarter average — but nearly half that gain sits inside unlabeled ("stealth") listings, and named-category growth is concentrated in AI and Education.

MONTHLY REVENUE RUN-RATE TREND (\$M)

WHAT DROVE THE 30-DAY GAIN (\$M, VS. 3-MO AVG)

TOP GROWTH DRIVERS

↗	Hong Xuan Kow (AI)	+598%	\$33.2K/mo
↗	Backlinker AI (Marketing)	+577%	\$21.9K/mo
↗	BillionVerify (Marketing)	+548%	\$4.0K/mo
↗	Image-Charts (Dev Tools)	+199%	\$9.1K/mo

TOP DECLINING DRIVERS

↘	Produktstudio.ai (AI)	-52%	\$4.9K/mo
↘	Subbasta (Real Estate)	-51%	\$3.5K/mo
↘	Numbers Game Ltd. (Unlabeled)	-44%	\$4.0K/mo
↘	Virvid.ai (Content Creation)	-44%	\$7.2K/mo

Half the Cohort's Revenue Is Hiding in Plain Sight

30-DAY REVENUE SHARE BY CATEGORY

REVENUE CONCENTRATION (CUMULATIVE)

TOP PERFORMERS

Stan (\$2.84M/mo), Brand On Demand (\$984K/mo), Stack Influence (\$868K/mo) — mature, high-scale outliers, not typical micro-SaaS comparables.

WEAK / DISTRESSED

44 for-sale listings report zero revenue yet still ask \$4.4M combined — likely stale or mispriced inventory.

HIDDEN OPPORTUNITY

29 listings combine a sub-2.5x asking multiple with positive growth — a systematic value screen, e.g. PolyPick (0.1x, +109%).

CONCENTRATION RISK

The top 100 ventures (10% of the cohort) hold 84% of all revenue; the remaining 900 share just 16%.

What Requires the Board's Attention Now

What Management Should Do Next

IMMEDIATE

0–3 MONTHS

Ready to launch

OBJECTIVE

Stop capital loss on mispriced inventory.

RECOMMENDATION

Quarantine zero-revenue for-sale listings from the active deal pipeline pending re-verification.

EXPECTED IMPACT

Removes ~\$4.4M of stale asking value from active consideration

OWNER

Deal Sourcing Team

INVESTMENT

Low — process change only

PRIORITY

High

KPI

listings flagged & re-verified / week

MEDIUM TERM

3–9 MONTHS

In scoping

OBJECTIVE

Systematize sourcing of mispriced assets.

RECOMMENDATION

Launch an "undervalued deal" scoring engine (sub-2.5x multiple + positive growth filter).

EXPECTED IMPACT

Repeatable pipeline of qualifying targets — 29 identified this cycle

OWNER

M&A / Investment Team

INVESTMENT

Medium — tooling + analyst time

PRIORITY

High

KPI

deals sourced via screen; avg. entry multiple

LONG TERM

9–18 MONTHS

Requires Board approval

OBJECTIVE

Build a durable sourcing edge.

RECOMMENDATION

Establish a dedicated AI-category / B2B sourcing thesis, backed by the cohort's growth and value data.

EXPECTED IMPACT

Concentrates capital in the strongest growth (+76%) and value (~4x) segment

OWNER

Portfolio Strategy / Board

INVESTMENT

High — dedicated headcount + capital

PRIORITY

Medium

KPI

AI/B2B share of portfolio revenue; blended growth rate

What Value Do These Recommendations Create?

-\$4.4M

Mispriced ask value removed from active pipeline

<2.5x

Target entry multiple for screened deals vs. 7.8x cohort avg.

29

Pre-qualified undervalued targets ready for diligence

-Hours

Diligence time no longer spent on stale, zero-revenue listings

BEFORE vs. TARGETED STATE

Metric	Today	Targeted State
Avg. deal multiple, active pipeline	7.8x (median 2.3x)	< 2.5x on screened targets
Zero-revenue listings in pipeline	44 listings (\$4.4M ask)	0 — quarantined pending re-verification
Sourcing weight: AI / B2B	~20% AI count / 26% B2B count	Increased weighting per Board-approved thesis

DEAL-PIPELINE CONVERSION — ILLUSTRATIVE SCENARIO

Directional planning range, not a financial forecast — based on the 29 pre-screened targets identified this cycle.

 **BEST CASE** **~29 of 29** All screened targets clear diligence and convert to acquisition.

 **EXPECTED CASE** **~10 of 29** Roughly one-third convert after standard diligence attrition.

 **WORST CASE** **< 5 of 29** Screen is refined; pipeline carries into the next cycle.

Four Quarters to an Active Sourcing Edge

Four Decisions Turn This Dataset Into an Active Sourcing Edge

This cohort is healthy in aggregate but concentrated and partly opaque. The Board's job today is to approve the guardrails and the sourcing edge — not to chase the average.

DECISION	ASK OF THE BOARD	RECOMMENDATION
Quarantine zero-revenue listings	Approve the exclusion policy for the active pipeline	Approve
Fund the undervalued-deal scoring engine	Approve tooling + analyst budget for Q2 build	Approve
AI/B2B dedicated sourcing thesis	Approve a Q3–Q4 pilot; full thesis decided at Q4 review	Approve pilot scope
Enhanced disclosure for "stealth" listings	Approve a minimum-disclosure requirement for listed ventures	Approve

IMMEDIATE NEXT STEPS (0–30 DAYS)

Sign off on the quarantine policy • Allocate scoring-engine budget • Assign horizon owners • Schedule the Q4 thesis review

Half of this cohort's revenue — and most of its risk — sits in a handful of names the Board has not yet actively managed. Approving these four decisions turns a passive dataset into an active sourcing edge.
