

Inside the Startup Economy

A Data-Driven Look at 1,000 Micro-SaaS & Indie Startups

TrustMRR Dataset · Revenue, Growth, Category & Geographic Patterns · Frozen 30 Jul 2026

1,000

Startups Tracked

\$13.47M

Combined Monthly Recurring Revenue

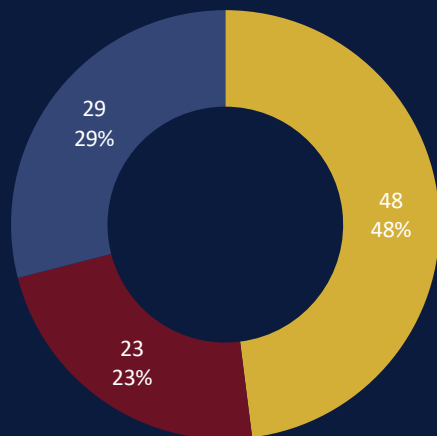

60+

Countries Represented

Revenue Is Brutally Concentrated

A small fraction of tracked startups capture the overwhelming majority of MRR

Where the MRR Actually Lives

■ Top 10 Startups ■ Next 40 (Top 5%) ■ Remaining 950 Startups

48%

of all MRR in the dataset is earned by just the top 10 startups (1% of the sample).

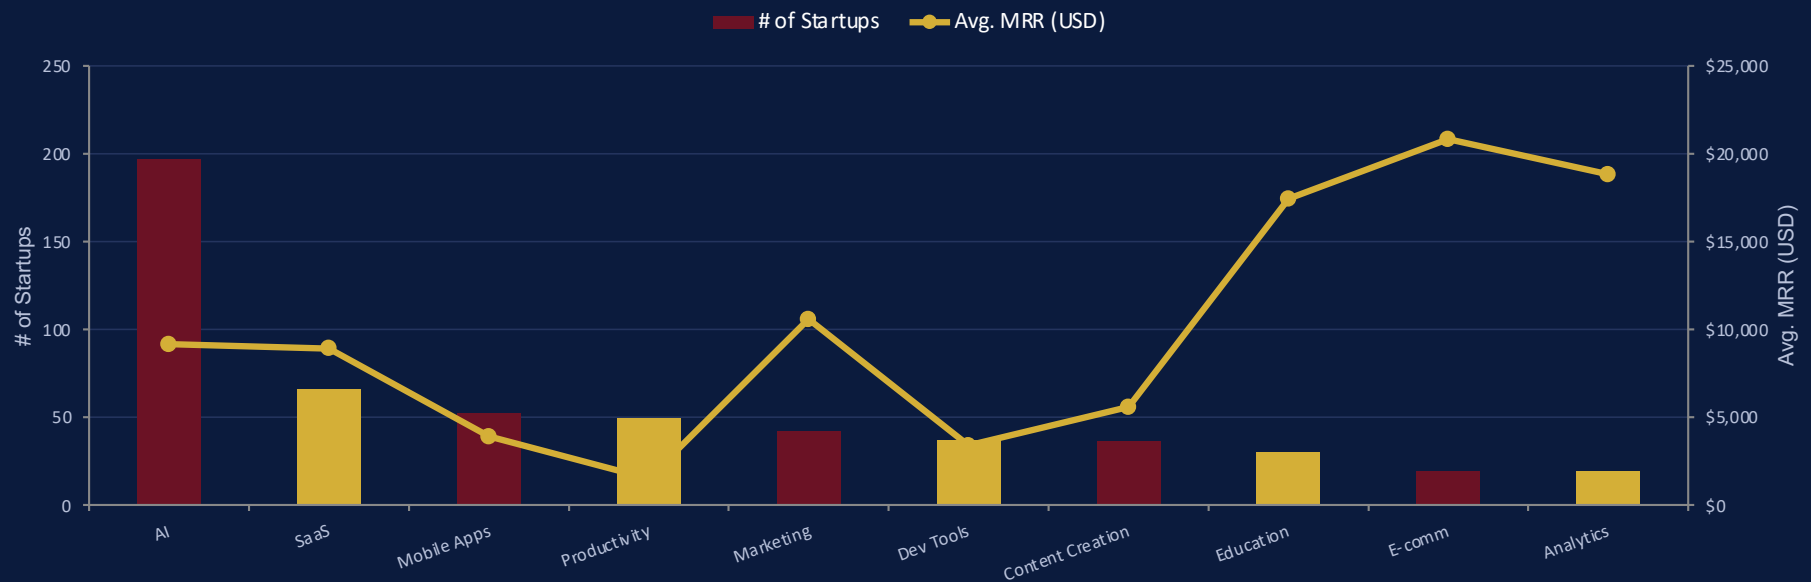

20%

of tracked startups (197 of 1,000) report \$0 in MRR — the flip side of the same distribution.

Takeaway: this is a classic power-law market — a handful of breakout companies (led by Stan at \$3.57M MRR) skew every average.

Crowded ≠ Lucrative

AI draws the most builders, but several smaller categories monetize far better per company

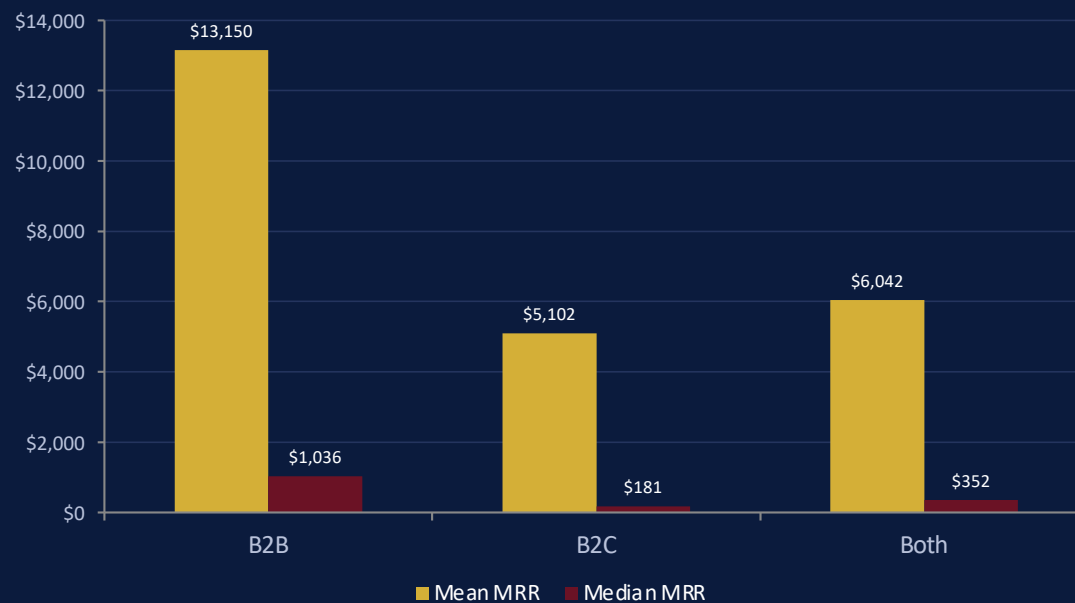

E-comm startups average \$20.8K in MRR — 2.3x AI's average — despite drawing 10x fewer entrants.

B2B Commands the Premium

Business buyers pay more, and pay more consistently, than consumer audiences

Average vs. Median MRR by Audience

2.6x

Higher average MRR for B2B vs. B2C startups

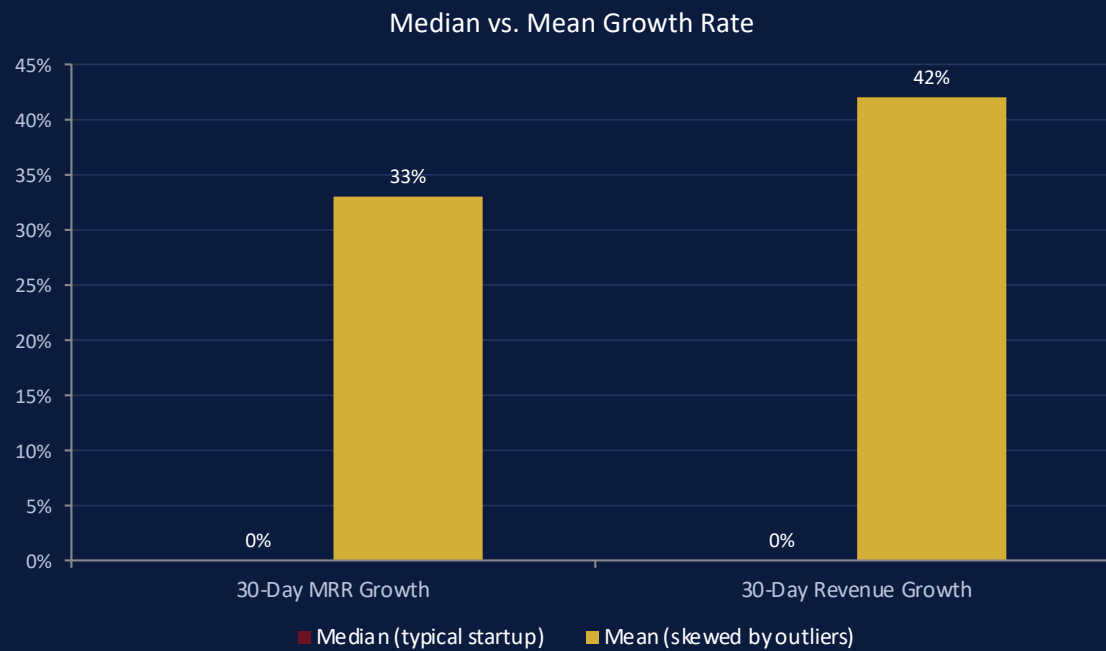

5.7x

Higher median MRR for B2B vs. B2C — an even wider gap than the average

255 B2B · 401 B2C · 56 Both

Most Startups Aren't Growing — A Few Are Exploding

The median startup is flat month over month; a handful of outliers pull the average sharply upward

+12,983%

The single highest 30-day MRR growth rate recorded in the dataset

0%

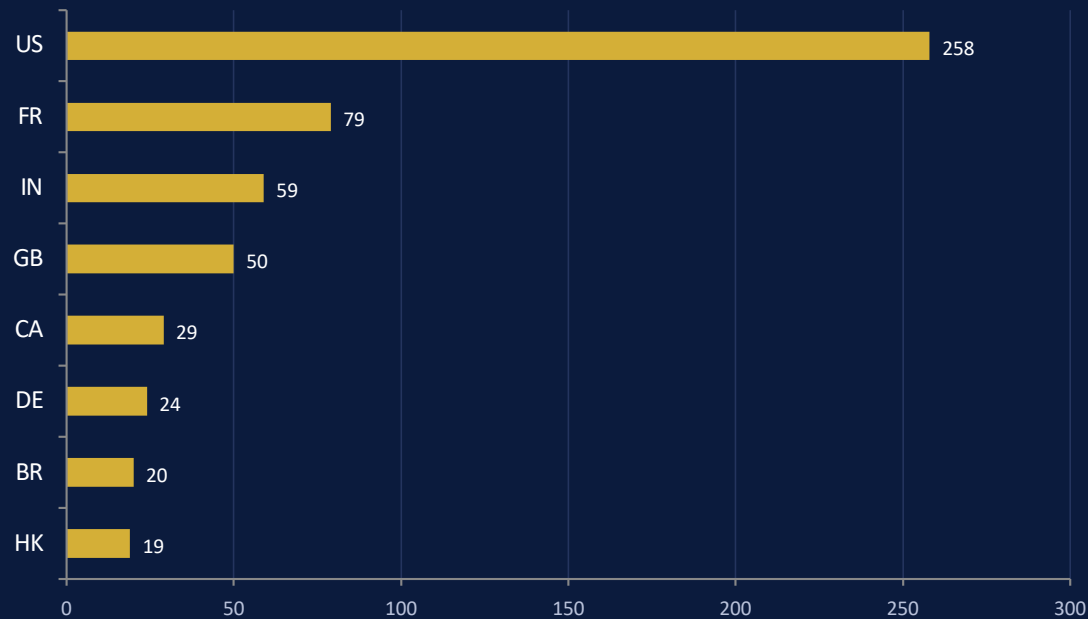

Median 30-day MRR growth — the typical tracked startup is flat

Growth headlines are almost always about the tail, not the norm.

Where They're Based, and Who's Selling

The US dominates by volume; roughly a quarter of tracked startups are listed for acquisition

Top 8 Countries by Startup Count

26%

Of tracked startups (262 of 1,000) are currently listed for sale

\$35K

Median asking price among startups listed for sale

\$10M

Highest single asking price recorded in the dataset
