

TRUSTMRR

The database of verified startup revenues

What the numbers actually say about building profitable products in public.

1,000

verified startups

\$334M

combined lifetime revenue

61.1%

of revenue held by the top 10

~26%

of startups listed for sale

The Company Behind the Data

What TrustMRR is, and why its numbers are worth trusting

TrustMRR is a marketplace and public leaderboard for bootstrapped and indie startups — a place where founders list SaaS products, apps, and digital businesses to be discovered, benchmarked, and acquired.

Every dollar shown is machine-verified — pulled directly from payment providers like Stripe, RevenueCat, and Superwall rather than self-reported by founders. That's the trust the name promises, and it's what makes the numbers behind this story worth believing.

Built by Marc Lou, the indie maker behind ShipFast and a string of profitable one-person products.

A Few Winners, Most of the Pie

How lifetime revenue concentrates at the top of TrustMRR

Stan alone made \$76.6M

More lifetime revenue than hundreds of other startups on TrustMRR combined — a single Stripe-verified creator-commerce platform.

The takeaway: "indie hacker success" is a power law, not a bell curve. The median startup on TrustMRR has earned just \$3,620 lifetime — the story isn't the average, it's the outliers.

Where the Money Lives

Share of lifetime revenue by category across TrustMRR

AI leads on headcount

Nearly 1 in 5 startups on TrustMRR build in AI — more than any other category, even though E-commerce and Marketing out-earn it in total revenue.

Volume vs. value: E-commerce is the smallest of these six categories by company count, yet earns the most — commerce startups scale revenue faster than they scale headcount.

Momentum Is Split Three Ways

30-day revenue growth across active TrustMRR startups

AI is running hot

AI startups grow 75.8% month-over-month on average — nearly double the platform-wide average of 41.9%.

But typical isn't average: the median startup's growth is 0% — a handful of breakout stories pull the mean far above what most founders actually experience month to month.

Every Fourth Startup Is for Sale

TrustMRR isn't just a leaderboard — it's an active acquisition marketplace

262

startups (~26%) currently listed for sale

\$86.8M

combined asking price across listings

2.3x

median revenue multiple among listings

Read together: at a 2.3x median multiple, buying an indie startup on TrustMRR is priced closer to a small-business acquisition than a venture bet — most listings pay for themselves within about 28 months of revenue.

Three Patterns Shaping Indie SaaS

What builders and buyers should take away from TrustMRR

61.1%

Revenue is a power law

held by just the top 10 startups — success is concentrated, not evenly spread.

197

AI leads in count and momentum

startups build in AI, the largest category, growing nearly 2x faster than average.

~26%

It's also a live marketplace

of startups are for sale at a median 2.3x multiple, verified through Stripe.
