

TRUSTMRR: A LOOK INSIDE 1,000 BOOTSTRAPPED STARTUPS

Revenue, growth, and market patterns across a public dataset of self-reported SaaS and indie startup metrics.

Masters' Union · Session 3 Dataset · Frozen 30 Jul 2026

Dataset Snapshot

1,000 self-reported startups spanning 65 countries and 29 categories.

1,000

Startups tracked

Across 65 countries

\$13.47M

Combined MRR

Median just \$282

\$334M

All-time revenue

Self-reported, all time

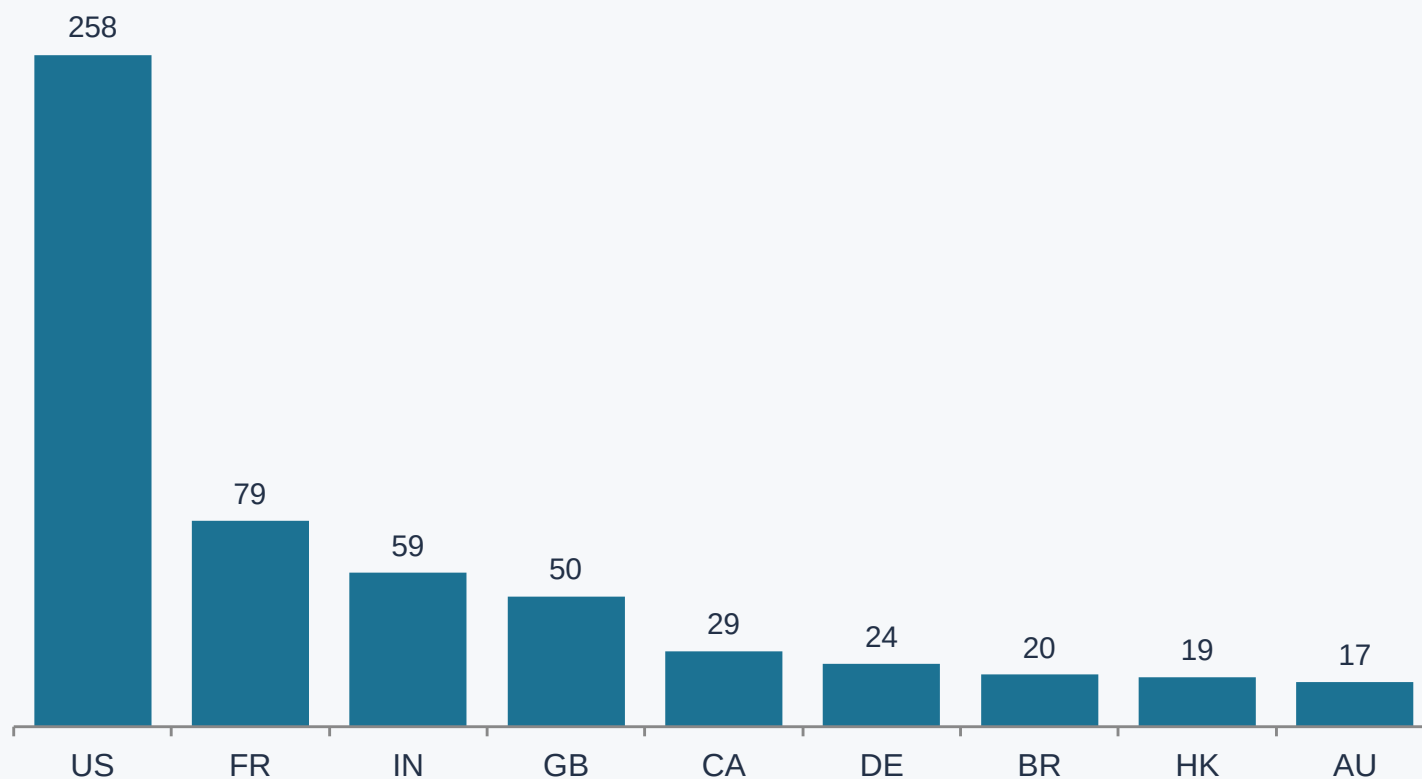

29

Categories tracked

AI leads at 27% of listings

Geographic Footprint

The US anchors the dataset, followed by France, India, and the UK.

241 unlisted

Nearly a quarter of startups omit country — likely stealth or unverified listings.

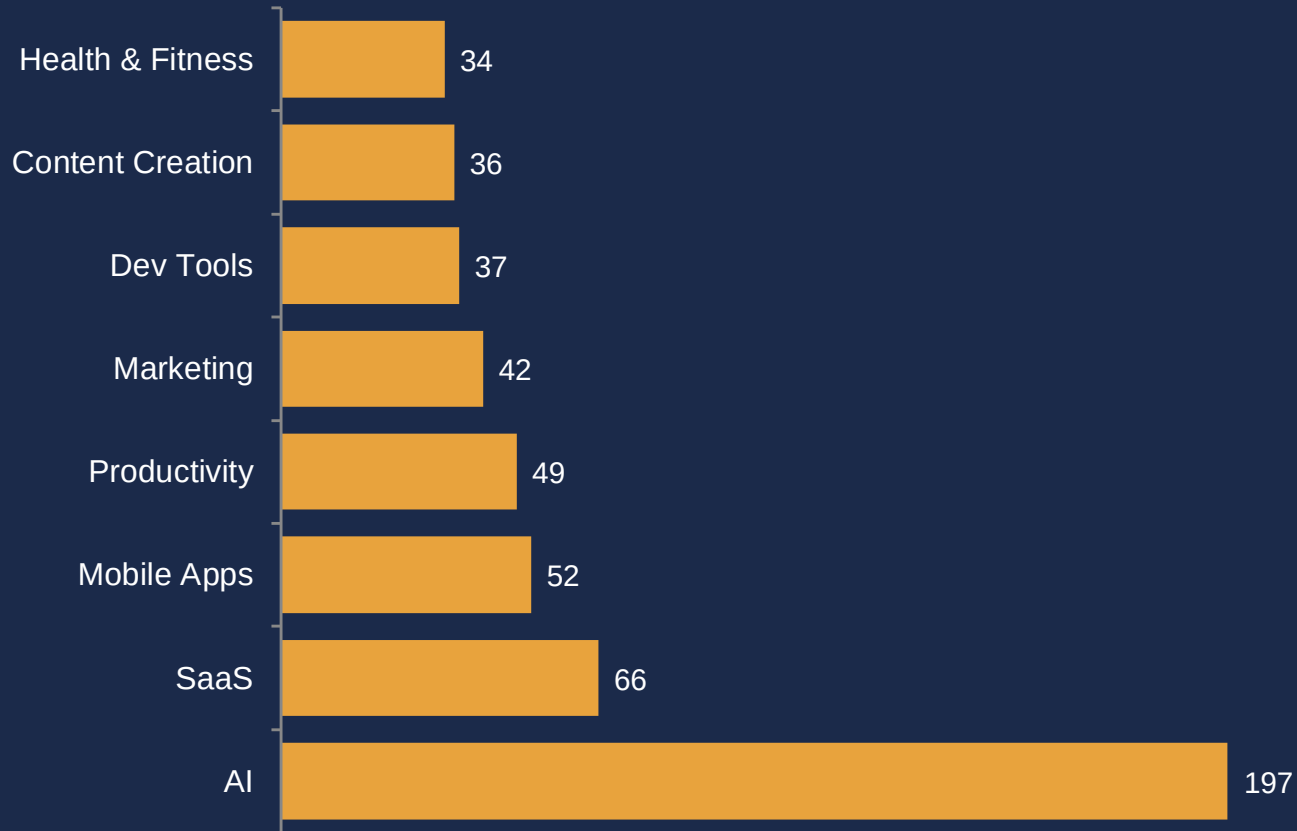

US carries the value

US-based startups hold \$7.5M of the \$13.47M total MRR — 56% from 26% of listings.

Category Landscape

AI dominates listings, but its share of revenue is far more modest.

**AI: 27% of listings,
only 13% of MRR**

197 startups self-identify as AI — more than the next three categories combined — but they generate just \$1.8M of the \$13.47M total MRR, well below their share of listings.

E-comm & Analytics punch above their weight: fewer listings, higher average MRR per startup.

Top Performers by MRR

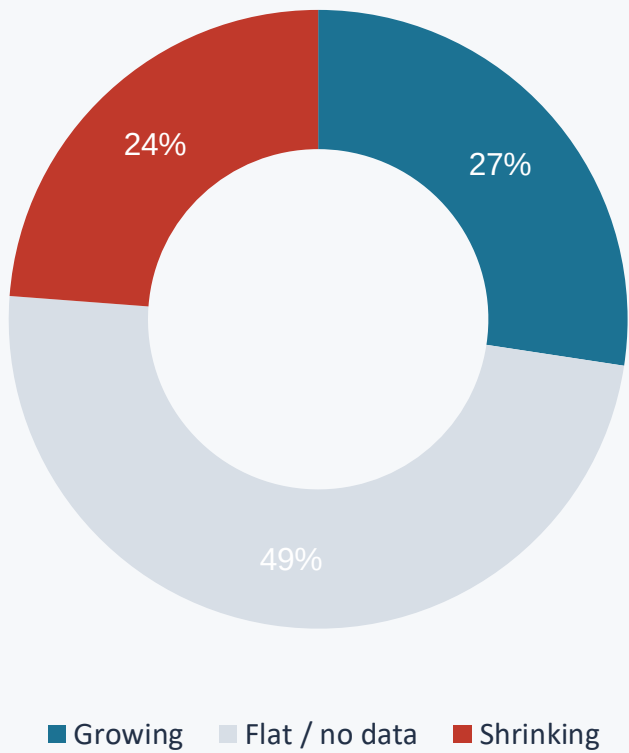

A handful of standouts dwarf the rest of the dataset.

Startup	Country	Category	MRR	All-time Rev.	Growth (30d)
Stan	US	—	\$3.57M	\$76.6M	+0.4%
Stealth Company	—	—	\$747.1K	\$0.6M	-74.3%
GojiberryAI	US	AI	\$494.7K	\$1.5M	+23.6%
Stealth Company	—	—	\$364.1K	\$11.3M	+1.0%
Rezi	US	AI	\$259.7K	\$9.7M	-4.9%
Kibu	US	Education	\$234.3K	\$3.1M	+52.8%
Cometly	US	Analytics	\$207.6K	\$9.4M	+3.0%
1Lookup	US	SaaS	\$207.1K	\$4.2M	-7.5%

Note: "Stealth Company" entries are anonymized listings from the source dataset, not a single repeated company.

Growth Dynamics

Most startups are flat month over month — growth is concentrated in a fast-moving minority.

FASTEST 30-DAY MOVERS (MRR ≥ \$5K)

Hong Xuan Kow	AI	+458.6%
Kickly – Pronos IA	Games	+384.5%
LLM Gateway	AI	+239.5%
SetSmart	SaaS	+100.0%
overrank SEO	Marketing	+91.2%

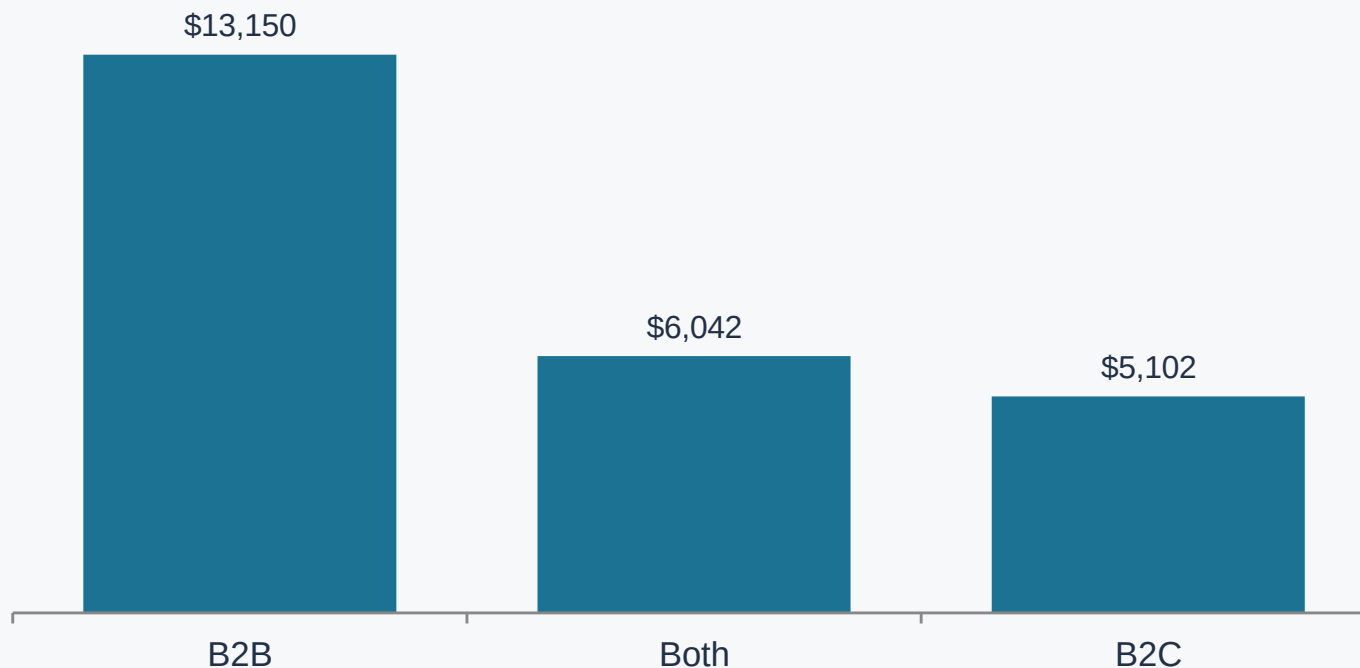

B2B vs. B2C Economics

B2B startups are fewer in number but monetize far more per company — a classic enterprise-value-density pattern.

255 B2B · 401 B2C · 56 both

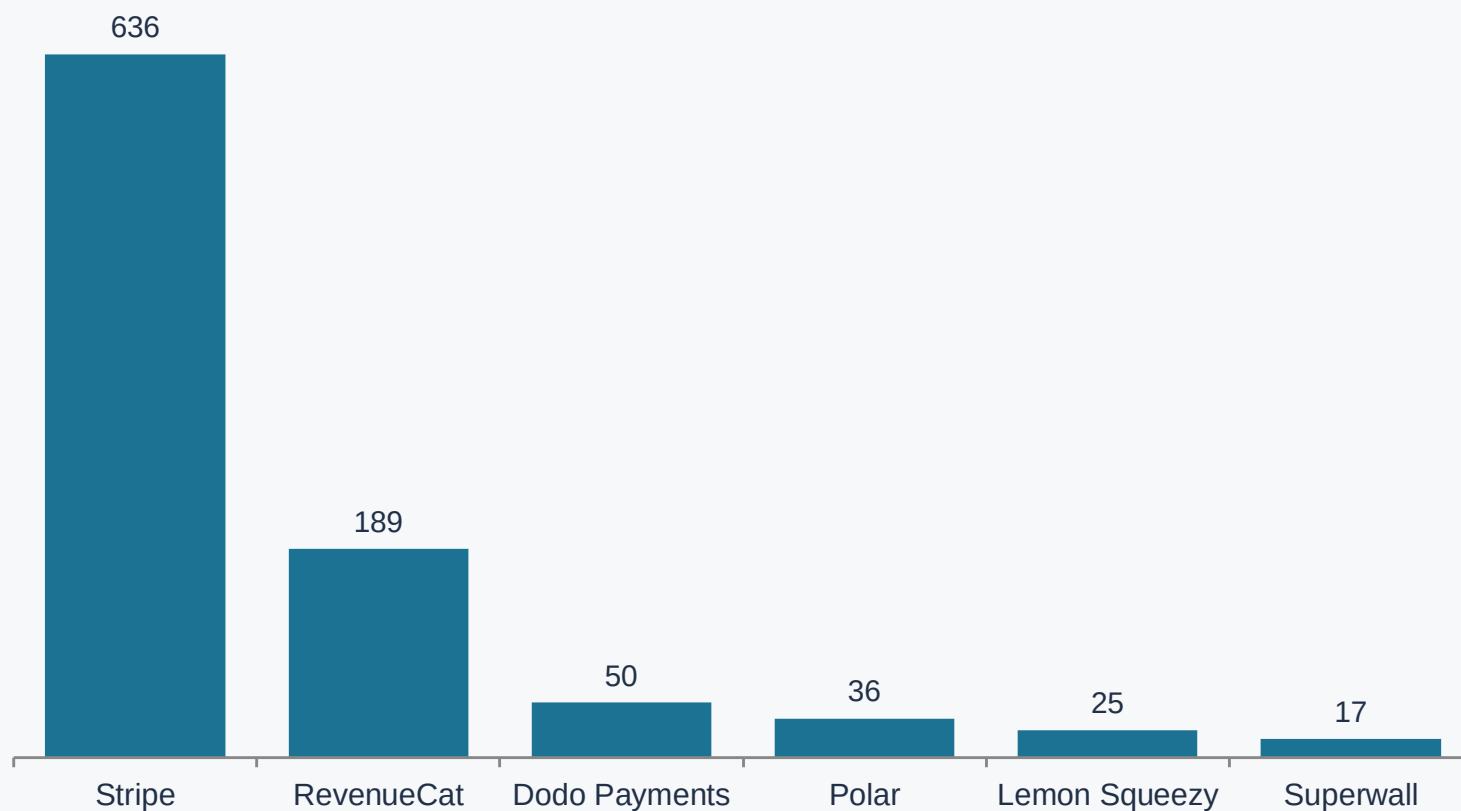

Average MRR per startup, by audience type

B2B companies earn 2.6x more MRR on average than B2C peers — despite representing 36% fewer listings.

Payment Rails

Stripe is the default — used by nearly two-thirds of listed startups.

63.6%

of startups run billing on Stripe alone

RevenueCat is the clear #2, likely reflecting mobile-app subscription billing rather than web SaaS — consistent with Mobile Apps being the third-largest category.

Marketplace Signal

About one in four listed startups is currently for sale.

262

Startups on sale

26.2% of the dataset

\$332K

Avg. asking price

Across on-sale listings

0.0x–2.9x

Revenue multiple range

Most cluster under 2.5x

THE HEADLINE TAKEAWAY

Top 10 startups = 48% of all MRR

Just 1% of listed startups capture nearly half of the dataset's combined MRR — a steep power-law curve typical of bootstrapped and indie SaaS ecosystems, where a few breakout winners dwarf a long tail of early-stage revenue.
